**“Take up one idea.**

**Make that one idea you’re life-think of it, dream of it, and live on that idea.**

**Let the brain muscles, nerves, every part of your body be full of that idea  
and just leave every other idea alone.**

**This is the way to success” Swami Vivekananda**

## PRELIMINARY DEFINITIONS AND NOMENCLATURES

**Academic Council:** The Academic Council is the highest academic body of the institute and is responsible for the maintenance of standards of instruction, education and examination within the institute. Academic Council is an authority as per UGC regulations and it has the right to take decisions on all academic matters including academic research.

**Academic Autonomy:** Means freedom to an institute in all aspects of conducting its academic programs, granted by UGC for Promoting Excellence.

**Academic Year:** It is the period necessary to complete an actual course of study within a year. It comprises two consecutive semesters i.e., Even and Odd semester.

**AICTE:** Means All India Council for Technical Education, New Delhi.

**Autonomous Institute:** Means an institute designated as autonomous by University Grants Commission (UGC), New Delhi in concurrence with affiliating University (Jawaharlal Nehru Technological University, Hyderabad) and State Government.

**Backlog Course:** A course is considered to be a backlog course if the student has obtained a failure grade (F) in that course.

**Basic Sciences:** The courses offered in the areas of Mathematics, Physics, Chemistry, Biology etc., are considered to be foundational in nature.

**Betterment:** Betterment is a way that contributes towards improvement of the students' grade in any course(s). It can be done by either (a) re-appearing or (b) re-registering for the course.

**Board of Studies (BOS):** BOS is an authority as defined in UGC regulations, constituted by Head of the Organization for each of the departments separately. They are responsible for curriculum design and updation in respect of all the programs offered by a department.

**Certificate course:** It is a course that makes a student gain hands-on experience and skill required for holistic development in a specific area/field.

**Choice Based Credit System:** The credit based semester system is one which provides flexibility in designing curriculum and assigning credits based on the course content and hours of teaching along with provision of choice for the student in the course selection.

**Compulsory course:** Course required to be undertaken for the award of the degree as per the program.

**Commission:** Means University Grants Commission (UGC), New Delhi.

**Continuous Internal Examination:** It is an examination conducted towards internal assessment.

**Course:** A course is a subject offered by the University for learning in a particular semester.

**Course Outcomes:** The essential skills that need to be acquired by every student through a course.

**Credit:** A credit is a unit that gives weight to the value, level or time requirements of an academic course. The number of 'Contact Hours' in a week of a particular course determines its credit value. One credit is equivalent to one lecture hour per week.

**Credit point:** It is the product of grade point and number of credits for a course.

**Cumulative Grade Point Average (CGPA):** It is a measure of cumulative performance of a student over all the completed semesters. The CGPA is the ratio of total credit points secured by a student in various courses in all semesters and the sum of the total credits of all courses in all the semesters. It is expressed upto two decimal places.

**Curriculum:** Curriculum incorporates the planned interaction of students with instructional content, materials, resources and processes for evaluating the attainment of Program Educational Objectives.

**Degree with Specialization:** A student who fulfills all the program requirements of her/his discipline and successfully completes a specified set of professional elective courses in a specialized area is eligible to receive a degree with specialization like Structural Engineering, Embedded Systems, CSE, etc.

**Department:** An academic entity that conducts relevant curricular and co-curricular activities, involving both teaching and non-teaching staff and other resources in the process of study for a degree.

**Detention in a course:** Student who does not obtain minimum prescribed attendance in a course shall be detained in that particular course.

**Dropping from the Semester:** A student who doesn't want to register for any semester can apply in writing in prescribed format before commencement of that semester.

**Elective Course:** A course that can be chosen from a set of courses. An elective can be Professional Elective and/or Open Elective.

**Evaluation:** Evaluation is the process of judging the academic performance of the student in her/his courses. It is done through a combination of continuous internal assessment and semester end examinations.

**Grade:** It is an index of the performance of the students in a said course. Grades are indicated by alphabets.

**Grade Point:** It is a numerical weight allotted to each letter grade on a 10 point scale.

**Institute:** Means Institute of Aeronautical Engineering, Hyderabad unless indicated otherwise by the context.

**Massive Open Online Course (MOOC):** MOOC courses inculcate the habit of self learning. MOOC courses would be additional choices in all the elective group courses.

**Pre-requisite:** A course, the knowledge of which is required for registration into higher level course.

**Core:** The courses that are essential constituents of each engineering discipline are categorized as professional core courses for that discipline.

**Professional Elective:** A course that is discipline centric. An appropriate choice of minimum number of such electives as specified in the program will lead to a degree with specialization.

**Program:** Means, Master of Technology (M.Tech) degree program / UG degree program: B.Tech.

**Program Educational Objectives:** The broad career, professional and personal goals that every student will achieve through a strategic and sequential action plan.

**Project work:** It is a design or research based work to be taken up by a student during his/her second year to achieve a particular aim. It is a credit based course and is to be planned carefully by the student.

**Re-Appearing:** A student can reappear only in the semester end examination for the theory component of a course, subject to the regulations contained herein.

**Registration:** Process of enrolling into a set of courses in a semester of a Program.

**Regulations:** The regulations, common to all M.Tech programs offered by Institute are designated as "IARE-R18" and are binding on all the stakeholders.

**Semester:** It is a period of study consisting of 15 to 18 weeks of academic work equivalent to normally 90 working days. The odd semester starts usually in July and even semester in December.

**Semester End Examinations:** It is an examination conducted for all courses offered in a semester at the end of the semester.

**S/he:** Means "she" and "he" both.

**Student Outcomes:** The essential skill sets that need to be acquired by every student during her/his program of study. These skill sets are in the areas of employability, entrepreneurial, social and behavioral.

**University:** Means the Jawaharlal Nehru Technological University Hyderabad, Hyderabad.

**Withdraw from a Course:** Withdrawing from a course means that a student can drop from a course within the first two weeks of the odd or even semester (deadlines are different for summer sessions). However s/he can choose a substitute course in place of it by exercising the option within 5 working days from the date of withdrawal.

**Words 'he', 'him', 'his', occur, they imply 'she', 'her', 'hers' also.**

## **FOREWORD**

The autonomy is conferred to Institute of Aeronautical Engineering (IARE), Hyderabad by University Grants Commission (UGC), New Delhi based on its performance as well as future commitment and competency to impart quality education. It is a mark of its ability to function independently in accordance with the set norms of the monitoring bodies like J N T University Hyderabad (JNTUH), Hyderabad and AICTE. It reflects the confidence of the affiliating University in the autonomous institution to uphold and maintain standards it expects to deliver on its own behalf and thus awards degrees on behalf of the college. Thus, an autonomous institution is given the freedom to have its own **curriculum, examination system and monitoring mechanism**, independent of the affiliating University but under its observance.

IARE is proud to win the credence of all the above bodies monitoring the quality in education and has gladly accepted the responsibility of sustaining, if not improving upon the standards and ethics for which it has been striving for more than a decade in reaching its present standing in the arena of contemporary technical education. As a follow up, statutory bodies like Academic Council and Boards of Studies are constituted with the guidance of the Governing Body of the institute and recommendations of the JNTUH to frame the regulations, course structure and syllabi under autonomous status.

The autonomous regulations, course structure and syllabi have been prepared after prolonged and detailed interaction with several expertise solicited from academics, industry and research, in accordance with the vision and mission of the institute to order to produce a quality engineering graduate to the society.

All the faculty, parents and students are requested to go through all the rules and regulations carefully. Any clarifications needed are to be sought at appropriate time and with principal of the college, without presumptions, to avoid unwanted subsequent inconveniences and embarrassments. The Cooperation of all the stake holders is sought for the successful implementation of the autonomous system in the larger interests of the college and brighter prospects of engineering graduates.

**PRINCIPAL**

# INSTITUTE OF AERONAUTICAL ENGINEERING (Autonomous)

## ACADEMIC REGULATIONS

### M.Tech. Regular Two Year Degree Program (for the batches admitted from the academic year 2018 - 20)

For pursuing two year postgraduate Master Degree program of study in Engineering (M.Tech) offered by Institute of Aeronautical Engineering under Autonomous status and herein after referred to as IARE.

#### 1.0 CHOICE BASED CREDIT SYSTEM

The Indian Higher Education Institutions (HEI's) are changing from the conventional course structure to Choice Based Credit System (CBCS) along with introduction to semester system at first year itself. The semester system helps in accelerating the teaching learning process and enables vertical and horizontal mobility in learning.

The credit based semester system provides flexibility in designing curriculum and assigning credits based on the course content and hours of teaching. The choice based credit system provides a 'cafeteria' type approach in which the students can take courses of their choice, learn at their own pace, undergo additional courses and acquire more than the required credits and adopt an interdisciplinary approach to learning.

Choice Based Credit System (CBCS) is a flexible system of learning and provides choice for students to select from the prescribed elective courses. A course defines learning objectives and learning outcomes and comprises of lectures / tutorials / laboratory work / field work / project work / mini project work with seminar/ viva / seminars / presentations / self-study etc. or a combination of some of these.

Under the CBCS, the requirement for awarding a degree is prescribed in terms of number of credits to be completed by the students.

The CBCS permits students to:

1. Choose electives from a wide range of elective courses offered by the departments of the Institute.
2. Undergo additional courses of interest.
3. Adopt an inter-disciplinary approach in learning.
4. Make the best use of expertise of the available faculty.

#### 2.0 MEDIUM OF INSTRUCTION

The medium of instruction shall be English for all courses, examinations, seminar presentations and project work. The curriculum will comprise courses of study as given in course curriculum in accordance with the prescribed syllabi.

#### 3.0 ELIGIBILITY FOR ADMISSION

The admissions for category A and B seats shall be as per the guidelines of Telangana State Council for Higher Education (TSCHE) in consonance with government reservation policy.

- a) Under Category A: 70% of the seats are filled based on GATE/PGECET ranks.
- b) Under Category B: 30% seats are filled on merit basis as per guidelines of TSCHE.

#### 4.0 UNIQUE COURSE IDENTIFICATION CODE

Every specialization of the M.Tech programme will be placed in one of the groups as listed in the Table 1.

**Table 1: Group of Courses**

S. No	Specialization	Offering Department	Code
1	Structural Engineering	Civil Engineering	ST
2	Electrical Power Systems	Electrical and Electronics Engineering	EPS
3	CAD / CAM	Mechanical Engineering	CC
4	Embedded Systems	Electronics and Communication Engineering	ES
5	Computer Science and Engineering	Computer Science and Engineering	CS
6	Aerospace Engineering	Aeronautical Engineering	AE

#### 5.0 TYPES OF COURSES

Courses in a programme may be of four kinds: **Core, Elective, Open and Audit.**

##### 5.1 Core Course:

There may be a core course in every semester. This is the course which is to be compulsorily studied by a student as a core requirement to complete the requirement of a program in said discipline of study.

##### 5.2 Elective Course:

Electives provide breadth of experience in respective branch and applications areas. Elective course is a course which can be chosen from a pool of courses. It may be:

- Supportive to the discipline of study
- Providing an expanded scope
- Enabling an exposure to some other discipline/domain
- Nurturing student's proficiency/skill.

There shall be five professional core elective groups out of which students can choose not more than two courses from each group. Overall, students can opt for four professional elective courses which suit their project work in consultation with the faculty advisor/mentor. In addition, one course from each of the two open electives has to be selected. A student may also opt for more elective courses in his/her area of interest.

##### 5.3 Open Elective Course:

An elective may be discipline centric focusing on those courses which add generic proficiency to the students or may be chosen from supportive/general discipline called as "Open Elective".

##### 5.4 Audit Course:

The value added courses are audit courses offered through joint ventures with various organizations providing ample Scope for the students as well as faculty to keep pace with the latest technologies pertaining to their chosen fields of study. A plenty of value added programs will be proposed by the departments one week before the commencement of class work. The students are given the option to choose the courses according to their desires and inclinations as they choose the desired items in a cafeteria. The expertise gained through the value added programs should enable them to face the formidable challenges of the future and also assist them in exploring new opportunities. Its result shall be declared with "Satisfactory" or "Not Satisfactory" performance.

## 6.0 SEMESTER STRUCTURE

The institute shall follow semester pattern. An academic year shall consist of a first semester and a second semester and the summer term. Each semester shall be of 23 weeks (Table 2) duration and this period includes time for course work, examination preparation and conduct of examinations. Each main semester shall have a minimum of 90 working days; out of which number of contact days for teaching / practical shall be 75 and 15 days shall be for examination preparation. The duration for each semester shall be a minimum of 17 weeks of instruction. The Academic Calendar is declared at the beginning of the academic year as given in Table2.

**Table 2: Academic Calendar**

<b>FIRST SEMESTER (23 weeks)</b>	I Spell Instruction Period	9 weeks	21 weeks	
	I Mid Examinations	1 week		
	II Spell Instruction Period	8 weeks		
	II Mid Examinations	1 week		
	Preparation and Practical Examinations	2 weeks		
	Semester End Examinations	2 weeks		
<b>Semester Break and Supplementary Exams</b>			2 weeks	
<b>SECOND SEMESTER (23 weeks)</b>	I Spell Instruction Period	9 weeks	21 weeks	
	I Mid Examinations	1 week		
	II Spell Instruction Period	8 weeks		
	II Mid Examinations	1 Week		
	Preparation & Practical Examinations	2 weeks		
	Semester End Examinations	2 weeks		
<b>Summer Vacation and Supplementary Exams</b>			4 weeks	
<b>THIRD SEMESTER</b>	I Spell Instruction Period	9 weeks	18 weeks	
	I Mid Examinations	1 week		
	II Spell Instruction Period	8 weeks		
	II Mid Examinations	1 week		
	Project Work Phase – I			
	Semester End Examinations	1 week		
<b>FOURTH SEMESTER</b>	Project Work Phase - II	18 eeks		

## 7.0 PROGRAM DURATION

A student shall be declared eligible for the award of M.Tech degree, if he/she pursues a course of study and completes it successfully in not less than two academic years and not more than four academic years. A student, who fails to fulfill all the academic requirements for the award of the degree within four academic years from the year of his/her admission, shall forfeit his/her seat in M.Tech course.

- A student will be eligible for the award of M.Tech degree on securing a minimum of 5.0/10.0 CGPA.
- In the event of non-completion of project work and/or non-submission of the project report by the end of the fourth semester, the candidate shall re-register by paying the semester fee for the project. In such a case, the candidate will not be permitted to submit the report earlier than three months and not later than six months from the date of registration.

## 8.0 CURRICULUM AND COURSE STRUCTURE

The curriculum shall comprise Core Courses, Elective Core Courses, Laboratory Course, Mini Project with Seminar, Internship, Project Work-1 and Project Work-2.

Each Theory and Laboratory course carries credits based on the number of hours / week as follows:

- **Lecture Hours (Theory):** 1 credit per lecture hour per week.
- **Laboratory Hours (Practical):** 1 credit for 2 practical hours, 2 credits for 3 or 4 practical hours per week.
- **Project Work:** 1 credit for 2 hours of project work per week.

8.1 Credit distribution for courses offered is shown in Table 3.

**Table 3: Credit distribution**

S. No	Course	Hours	Credits
1	Core Courses	3	3
2	Professional Core Elective Courses	3	3
3	Audit Courses	2	0
4	Laboratory Courses	4	2
5	Open Elective Courses	3	3
6	Mini Project with Seminar	2	2
7	Project Work-1 Dissertation	20	10
8	Project Work-2 Dissertation	32	16

8.2 Course wise break-up for the total credits:

<b>Total Theory Courses (12)</b> Core Courses (04)+Professional Core Electives (05) + Open Electives (01)	04@3credits + 05 @ 3 credits + 01@3 credits	30
Total Laboratory Courses (03)	04@2credits	08
Mini Project with Seminar(01)	1 @2credit	02
Research Methodology and IPR	1 @2 credit	02
Project Work-1	1 @10credit	10
Project Work-2	1 @16credits	16
<b>TOTAL CREDITS</b>		<b>68</b>

## 9.0 EVALUATION METHODOLOGY

### 9.1 Theory Course:

Each theory course will be evaluated for a total of 100 marks, with 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). Out of 30 marks allotted for CIE during the semester, marks are awarded by taking average of two sessional examinations.

#### 9.1.1 Semester End Examination (SEE):

The SEE shall be conducted for 70 marks of 3 hours duration. The syllabus for the theory courses shall be divided into FIVE units and each unit carries equal weightage in terms of marks distribution.

The question paper pattern shall be as defined below. Two full questions with ‘either’ ‘or’ choice will be drawn from each unit. Each question carries 14 marks. There could be a maximum of three sub divisions in a question.

The emphasis on the questions is broadly based on the following criteria:

50 %	To test the objectiveness of the concept
30 %	To test the analytical skill of the concept
20 %	To test the application skill of the concept

### 9.1.2 Continuous Internal Assessment (CIA):

For each theory course the CIA shall be conducted by the faculty/teacher handling the course as given in Table 4. CIA is conducted for a total of 30 marks, with 25 marks for Continuous Internal Examination (CIE) and 05 marks for Technical Seminar and Term Paper.

**Table 4: Assessment pattern for Theory Courses**

COMPONENT	THEORY		TOTAL MARKS
	CIE Exam (Sessional)	Technical Seminar and Term Paper	
Max. CIA	25	5	30

#### Continuous Internal Examination (CIE):

Two CIE exams shall be conducted at the end of the 9<sup>th</sup> and 17<sup>th</sup> week of the semester respectively. The CIE exam is conducted for 25 marks of 2 hours duration, consisting of 5 one mark compulsory questions in part-A and 4 questions in part-B. The student has to answer any 4 questions out of five questions, each carrying 5 marks. Marks are awarded by taking average of marks scored in two CIE exams.

#### Technical Seminar and Term Paper:

Two seminar presentations are conducted during I year I semester and II semester. For seminar, a student under the supervision of a concerned faculty member, shall identify a topic in each course and prepare the term paper with overview of topic. The evaluation of Technical seminar and term paper is for maximum of 5 marks. Marks are awarded by taking average of marks scored in two Seminar Evaluations.

## 9.2 Laboratory Course:

Each lab will be evaluated for a total of 100 marks consisting of 30 marks for internal assessment and 70 marks for semester end lab examination. Out of 30 marks of internal assessment, continuous lab assessment will be done for 20 marks for the day to day performance and 10 marks for the final internal lab assessment. The semester end lab examination for 70 marks shall be conducted by two examiners, one of them being a internal examiner and another is external examiner, both nominated by the Principal from the panel of experts recommended by Chairman, BOS.

All the drawing related courses are evaluated in line with lab courses. The distribution shall be 30 marks for internal evaluation (20 marks for day-to-day work, and 10 marks for internal tests) and 70 marks for semester end lab examination. There shall be ONE internal test for 10 marks each in a semester.

### 9.3 Project work

Normally, the project work should be carried out at Host Institute (Institute of Aeronautical Engineering). However, it can also be carried out in any of the recognized Educational Institutions, National Laboratories, Research Institutions, Industrial Organizations, Service Organizations or Government Organizations with the prior permission from the guide and concerned Head of the Department. A student shall submit the outcome of the project work in the form of a dissertation.

- 9.3.1 The student shall submit the project work synopsis at the end of III semester for Phase-I of project evaluation. The Phase-I of project work shall be evaluated by Project Review Committee (PRC) at the end of the third semester for a maximum of 100 marks. Head of the Department (HOD) shall constitute a PRC comprising of senior faculty of the specialization, Guide and Head of the Department.
- 9.3.2 The first phase of project work is to be carried out in IV semester for Phase –II of Project work. The student will be allowed to appear for final viva voce examination at the end of IV semester only if s/he has submitted s/he project work in the form of paper for presentation/ publication in a conference/journal and produce the proof of acceptance of the paper from the organizers/publishers.
- 9.3.3 The student shall submit the project work in the form of dissertation at least four weeks ahead of the completion of the program. Head of the Department shall constitute an Internal Evaluation Committee (IEC) comprising of the Chairman BOS (PG), HOD and Guide. As per convenes of all meeting for open pre-submission seminar evaluation of the student. If the open pre-submission seminar by a student is not satisfactory, another seminar shall be scheduled within two weeks.

The evaluation of the project work and the marks allotted are as under:

S. No	Project Phases	Mode	Evaluation Committee	Marks
1	Phase - I	Continuous evaluation at the end of III Semester	Guide	30
2		Evaluation at the end of III Semester	Project Review Committee (PRC) comprising of senior faculty of the specialization, guide and HOD.	70
<b>Total (Phase – I)</b>				<b>100</b>
3	Phase - II	An open pre-submission seminar by the student	The Internal Evaluation Committee (IEC) comprising of the Chairman, BOS (PG), HOD and guide wherein the HOD convenes its meeting.	30
4		End Semester Examination (An open seminar followed by viva-voce)	The External Evaluation Committee (EEC) comprising of External Examiner, HOD and guide wherein the HOD shall be the chairman of the committee.	70
<b>Total (Phase-II)</b>				<b>100</b>

9.3.4 As soon as a student submits his project work, Principal shall appoint the External Examiner among the panel of examiners recommended by the Chairman, BOS (PG).

9.3.5 The Principal shall schedule the End Semester Examination in project work soon after the completion of the study of program and a student can appear for the same provided s/he has earned

successfully all the requisite credits. The student shall produce the dissertation duly certified by the guide and HOD during the Examination.

- 9.3.6 The project reports of M.Tech students who have not completed their course work successfully will be evaluated in that semester itself and the result sent confidentially to the Controller of Examinations. The results of the project work evaluation will be declared by the Controller of Examinations only after the successful completion of the courses by those students.

## **10.0 ATTENDANCE REQUIREMENTS AND DETENTION POLICY**

- 10.1 It is desirable for a candidate to put on 100% attendance in each course. In every course (theory/laboratory), student has to maintain a minimum of 80% attendance including the days of attendance in sports, games, NCC and NSS activities to be eligible for appearing in Semester End Examination of the course.
- 10.2 For cases of medical issues, deficiency of attendance in each course to the extent of 15% may be condoned by the College Academic Committee (CAC) on the recommendation of Head of the Department if his/her attendance is between 80% to 65% in every course, subjected to submission of medical certificate and other needful documents to the concerned department.
- 10.3 The basis for the calculation of the attendance shall be the period prescribed by the institute by its calendar of events. For late admission, attendance is reckoned from the date of admission to the program.
- 10.4 However, in case of a student having less than 65% attendance in any course, s/he shall be detained in the course and in no case such process will be relaxed.
- 10.5 Students whose shortage of attendance is not condoned in any subject are not eligible to write their semester end examination of that courses and their registration shall stand cancelled.
- 10.6 A prescribed fee shall be payable towards Condonation of shortage of attendance.
- 10.7 A candidate shall put in a minimum required attendance at least in three (3) theory courses for getting promoted to next higher class / semester. Otherwise, s/he shall be declared detained and has to repeat semester.
- 10.8 A student shall not be promoted to the next semester unless he satisfies the attendance requirement of the present semester, as applicable. They may seek readmission into that semester when offered next. If any candidate fulfills the attendance requirement in the present semester, s/he shall not be eligible for readmission into the same class.

## **11.0 CONDUCT OF SEMESTER END EXAMINATIONS AND EVALUATION**

- 11.1 Semester end examination shall be conducted by the Controller of Examinations (COE) by inviting Question Papers from the External Examiners.
- 11.2 Question papers may be moderated for the coverage of syllabus, pattern of questions by Semester End Examination Committee chaired by Head of the Department one day before the commencement of semester end examinations.
- 11.3 Internal Examiner shall prepare a detailed scheme of valuation.
- 11.4 The answer papers of semester end examination should be evaluated by the internal examiner immediately after the completion of exam and the award sheet should be submitted to COE in a sealed cover before the same papers are kept for second evaluation by external examiner.
- 11.5 In case of difference is more than 15% of marks, the answer paper shall be re-evaluated by a third examiner appointed by the Examination Committee and marks awarded by him shall be taken as final.

11.6 HOD shall invite 3-9 external examiners to evaluate all the end semester answer scripts on a prescribed date(s). Practical laboratory exams are conducted involving external examiners.

11.7 Examination Control Committee shall consolidate the marks awarded by internal and external examiners to award grades.

## **12.0 SCHEME FOR THE AWARD OF GRADE**

12.1 A student shall be deemed to have satisfied the minimum academic requirements and earn the credits for each theory course, if s/he secures:

- i. Not less than 40% marks for each theory course in the semester end examination, and
- ii. A minimum of 50% marks for each theory course considering both CIA and SEE

12.2 A student shall be deemed to have satisfied the minimum academic requirements and earn the credits for each Laboratory / Seminar and Technical Writing / Project, if s/he secures

- i. Not less than 40% marks for each Laboratory / Seminar / Project course in the semester end examination,
- ii. A minimum of 50% marks for each Laboratory / Mini project with Seminar / Project course considering both internal and semester end examination.

12.3 If a candidate fails to secure a pass in a particular course, it is mandatory that s/he shall register and reappear for the examination in that course during the next semester when examination is conducted in that course. It is mandatory that s/he should continue to register and reappear for the examination till s/he secures a pass.

## **13.0 LETTER GRADES AND GRADE POINTS**

13.1 Performances of students in each course are expressed in terms of marks as well as in Letter Grades based on absolute grading system. The UGC recommends a 10point grading system with the following letter grades as given below:

<b>Range of Marks</b>	<b>Grade Point</b>	<b>Letter Grade</b>
100 - 80	10	S (Superior)
70 – 79	9	A+ (Excellent)
60 – 69	8	A (Very Good)
55 – 59	7	B+ (Good)
50 – 54	6	B (Average)
Below 50	0	F (Fail)
Absent	0	Ab (Absent)
Authorized Break of Study	0	ABS

13.2 A student is deemed to have passed and acquired to correspondent credits in particular course if s/he obtains any one of the following grades: “S”, “A+”, “A”, “B+”, “B”.

13.3 A student obtaining Grade “F” shall be considered Failed and will be required to reappear in the examination.

13.4 “SA” denotes shortage of attendance (as per item 10) and hence prevention from writing Semester End Examination.

13.5 At the end of each semester, the institute issues grade sheet indicating the SGPA and CGPA of the student. However, grade sheet will not be issued to the student if s/he has any outstanding dues.

## 14.0 COMPUTATION OF SGPA AND CGPA

The UGC recommends to compute the Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA). The credit points earned by a student are used for calculating the Semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA), both of which are important performance indices of the student. SGPA is equal to the sum of all the total points earned by the student in a given semester divided by the number of credits registered by the student in that semester. CGPA gives the sum of all the total points earned in all the previous semesters and the current semester divided by the number of credits registered in all these semesters. Thus,

$$SGPA = \frac{\sum_{i=1}^n (C_i G_i)}{\sum_{i=1}^n C_i}$$

Where,  $C_i$  is the number of credits of the  $i^{th}$  course and  $G_i$  is the grade point scored by the student in the  $i^{th}$  course and  $n$  represent the number of courses in which a student's is registered in the concerned semester.

$$CGPA = \frac{\sum_{j=1}^m (C_j S_j)}{\sum_{j=1}^m C_j}$$

Where,  $S_j$  is the SGPA of the  $j^{th}$  semester and  $C_j$  is the total number of credits upto the semester and  $m$  represent the number of semesters completed in which a student registered upto the semester.

The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.

## 15.0 ILLUSTRATION OF COMPUTATION OF SGPA AND CGPA

### 15.1 Illustration for SGPA

Course Name	Course Credits	Grade letter	Grade point	Credit Point (Credit x Grade)
Course 1	3	A	8	3 x 8 = 24
Course 2	4	B+	7	4 x 7 = 28
Course 3	3	B	6	3 x 6 = 18
Course 4	3	S	10	3 x 10 = 30
Course 5	3	C	5	3 x 5 = 15
Course 6	4	B	6	4 x 6 = 24
	<b>20</b>			<b>139</b>

Thus,  $SGPA = 139 / 20 = 6.95$

### 15.2 Illustration for CGPA

Semester 1	Semester 2	Semester 3	Semester 4
Credit: 20 SGPA: 6.9	Credit: 22 SGPA: 7.8	Credit: 25 SGPA: 5.6	Credit: 26 SGPA: 6.0

Thus,  $CGPA = \frac{20 \times 6.9 + 22 \times 7.8 + 25 \times 5.6 + 26 \times 6.0}{93} = 6.51$

## 16.0 PHOTOCOPY / REVALUATION

A student, who seeks the revaluation of the answer script, is directed to apply for the photocopy of his/her semester examination answer paper(s) in the theory course(s) within 2 working days from the declaration of results in the prescribed format to the Controller of Examinations through the Head of the Department. On receiving the photocopy, the student can consult with a competent member of faculty and seek the opinion for revaluation. Based on the recommendations, the student can register for the revaluation with prescribed fee. The Controller of Examinations shall arrange for the revaluation and declare the results. Revaluation is not permitted to the courses other than theory courses.

## 17.0 GRADUATION REQUIREMENTS

The following academic requirements shall be met for the award of M .Tech degree.

17.1 Student shall register and acquire minimum attendance in all courses and secure 68 credits.

17.2 A student who fails to earn 68 credits within four consecutive academic years from the year of his/her admission with a minimum CGPA of 5.0, shall forfeit his/her degree and his/her admission stands cancelled.

## 18.0 AWARD OF DEGREE

Classification of degree will be as follows:

CGPA $\geq$ 7.5	CGPA $\geq$ 6.5 and < 7.5	CGPA $\geq$ 5.5 and < 6.5	CGPA $\geq$ 5.0 and < 5.5	CGPA < 5.0
<b>First Class with Distinction</b>	<b>First Class</b>	<b>Second Class</b>	<b>Pass Class</b>	<b>Fail</b>

- a) In case a student takes more than one attempt in clearing a course, the final marks secured shall be indicated by \* mark in the marks memo.
- b) All the candidates who register for the semester end examination will be issued grade sheet by the Institute. Apart from the semester wise marks memos, the institute will issue the provisional certificate subject to the fulfillment of all the academic requirements.

## 19.0 IMPROVEMENT OF GRADE:

A candidate, after becoming eligible for the award of the degree, may reappear for the final examination in any of the theory courses as and when conducted for the purpose of improving the aggregate and the grade. But this reappearance shall be within a period of two academic years after becoming eligible for the award of the degree.

However, this facility shall not be availed of by a candidate who has taken the Original Degree Certificate. Candidates shall not be permitted to reappear either for CIE in any course or for Semester End Examination (SEE) in laboratory courses (including Project Viva-voce) for the purpose of improvement.

## 20.0 TERMINATION FROM THE PROGRAM

The admission of a student to the program may be terminated and the student may be asked to leave the institute in the following circumstances:

- a) The student fails to satisfy the requirements of the program within the maximum period stipulated for that program.
- b) The student fails to satisfy the norms of discipline specified by the institute from time to time.

### **21.0 WITH-HOLDING OF RESULTS**

If the candidate has not paid any dues to the college / if any case of indiscipline / malpractice is pending against him/her, the results of the candidate will be withheld. The issue of the degree is liable to be withheld in such cases.

### **22.0 GRADUATION DAY**

The institute shall have its own annual Graduation Day for the award of Degrees to students completing the prescribed academic requirements in each case, in consultation with the University and by following the provisions in the Statute.

The college shall institute prizes and medals to meritorious students annually on Graduation Day. This will greatly encourage the students to strive for excellence in their academic work.

### **23.0 DISCIPLINE**

Every student is required to observe discipline and decorum both inside and outside the institute and not to indulge in any activity which will tend to bring down the honor of the institute. If a student indulges in malpractice in any of the theory / practical examination, continuous assessment examinations he/she shall be liable for punitive action as prescribed by the Institute from time to time.

### **24.0 GRIEVANCE REDRESSAL COMMITTEE**

The institute shall form a Grievance Redressal Committee for each course in each department with the Course Teacher and the HOD as the members. This Committee shall solve all grievances related to the course under consideration.

### **25.0 TRANSITORY REGULATIONS**

25.1 A student who has been detained in any semester of previous regulations for not satisfying the attendance requirements shall be permitted to join in the corresponding semester of this regulation.

25.2 Semester End Examination in each course under the regulations that precede immediately these regulations shall be conducted three times after the conduct of last regular examination under those regulations. Thereafter, the failed students, if any, shall take examination in the equivalent papers of these regulations as suggested by the Chairman, BOS concerned.

### **26.0 REVISION OF REGULATIONS AND CURRICULUM**

The Institute from time to time may revise, amend or change the regulations, scheme of examinations and syllabi if found necessary and on approval by the Academic Council and the Governing Body shall come into force and shall be binding on the students, faculty, staff, all authorities of the Institute and others concerned.

**FAILURE TO READ AND UNDERSTAND  
THE REGULATIONS IS NOT AN EXCUSE**

## **PROFESSIONAL CORE ELECTIVE COURSES**

### **PROFESSIONAL CORE ELECTIVE – I**

<b>Course Code</b>	<b>Course Title</b>
BCCB03	Advanced Machine Design
BCCB04	Design for Manufacturing and Assembly
BCCB05	Computer Graphics

### **PROFESSIONAL CORE ELECTIVE – II**

<b>Course Code</b>	<b>Course Title</b>
BCCB06	Mechanics and Manufacturing Methods of Composites
BCCB07	Precision Engineering
BCCB08	Rapid prototype Technologies

### **PROFESSIONAL CORE ELECTIVE – III**

<b>Course Code</b>	<b>Course Title</b>
BCCB13	Experimental stress Analysis
BCCB14	Intelligent Manufacturing Systems
BCCB15	Tribology

### **PROFESSIONAL CORE ELECTIVE – IV**

<b>Course Code</b>	<b>Course Title</b>
BCCB16	Industrial Robotics
BCCB17	Special Manufacturing Process
BCCB18	Optimization Techniques

### **PROFESSIONAL CORE ELECTIVE – V**

<b>Course Code</b>	<b>Course Title</b>
BCCB22	Automation in Manufacturing
BCCB23	Flexible Manufacturing Systems
BCCB24	Design and Fabrication of Composites

### OPEN ELECTIVE COURSES

Course Code	Course Title
BCSB25	Business Analytics
BCSB26	Industrial Safety
BCSB27	Operations Research
BCSB28	Cost Management of Engineering Projects
BCSB29	Composite Materials
BCSB30	Waste to Energy

### AUDIT COURSES

Course Code	Course Title
BCSB32	English for Research Paper Writing
BCSB33	Disaster Management
BCSB34	Sanskrit for Technical Knowledge
BCSB35	Value Education
BCSB36	Constitution of India
BCSB37	Pedagogy Studies
BCSB38	Stress Management by Yoga
BCSB39	Personality Development through Life Enlightenment Skills

# SYLLABUS

(I – IV SEM)

## ADVANCED CAD

<b>I SEMSTER: CAD/CAM</b>									
Course Code	Category	Hours / Week			Credits	Maximum Marks			
		L	T	P		C	CIA	SEE	Total
BCCB01	Core	3	-	-	3	30	70	100	
<b>Contact Classes: 45</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>		<b>Total Classes: 45</b>			
<b>OBJECTIVES:</b>									
<b>The course should enable the students to</b>									
I. Understand of basic trends in design and modelling applicable to CAD/CAM.									
II. Applying the CAD tools for designing.									
III. Create surface and geometric models.									
<b>UNIT-I</b>	<b>PRINCIPLES OF COMPUTER GRAPHICS</b>							<b>Classes : 09</b>	
Principles of computer graphics: Introduction, graphic primitives, point plotting, lines, Bresenham's circle algorithm, ellipse, transformation in graphics, coordinate systems, view port, 2D and 3D transformation, hidden surface removal, reflection, shading and generation of character.									
<b>UNIT-II</b>	<b>CAD TOOLS</b>							<b>Classes : 09</b>	
Definition of CAD Tools, Types of system, CAD/CAM system evaluation criteria, brief treatment of input and output devices. Graphics standard, functional areas of CAD, Modeling and viewing, software documentation, efficient use of CAD software; Geometric modeling: Types of mathematical representation of curves, wire frame models wire frame entities parametric representation of synthetic curves hermite cubic splines Bezier curves Bezier splines rational curves.									
<b>UNIT-III</b>	<b>SURFACE MODELING</b>							<b>Classes: 09</b>	
Mathematical representation surfaces, surface model, surface entities surface representation.									
Parametric representation of surfaces, plane surface, rule surface, surface of revolution, tabulated cylinder.									
<b>UNIT-IV</b>	<b>PARAMETRIC REPRESENTATION OF SYNTHETIC SURFACES</b>							<b>Classes: 09</b>	
Parametric representation of synthetic surfaces: Hermite Bicubic surface, Bezier surface, Bezier Spline surface, COONs surface, Blending surface Sculptured surface, Surface manipulation; Displaying, Segmentation, Trimming, Intersection, Transformations (both 2D and 3D).									
<b>UNIT-V</b>	<b>GEOMETRIC MODELLING-3D</b>							<b>Classes : 09</b>	
Geometricmodelling-3D: Solid modeling, solid representation, boundary representation (13-rep), Constructive solid geometry (CSG). CAD/CAM exchange: Evaluation of data, exchange format, IGES data representations and structure, STEP Architecture, implementation, ACIS and DXF; Design applications: Mechanical tolerances, mass property calculations, finite element modeling and analysis and mechanical assembly; Collaborative engineering: Collaborative design, principles, approaches, tools, design systems.

## MATHEMATICAL METHODS IN ENGINEERING

<b>I SEMSTER: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
BCCB02	Core	L	T	P	C	CIA	SEE	Total
		3	-	-	3	30	70	100
<b>Contact Classes: 45</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>			<b>Total Classes: 45</b>	
<b>OBJECTIVES:</b>								
I. Develop a basic understanding of a range of mathematics tools with emphasis on engineering applications. II. Solve problems with techniques from advanced linear algebra, ordinary differential equations and multi- variable differentiation. III. Develop skills to think quantitatively and analyse problems critically								
<b>UNIT-I</b>	<b>INTRODUCTION TO PROBABILITY</b>						<b>Classes : 09</b>	
Theory Probability Theory and Sampling Distributions. Basic probability theory along with examples. Standard discrete and continuous distributions like Binomial, Poisson, Normal, Exponential etc. Central Limit Theorem and its significance. Some sampling distributions like $X^2$ , t, F.								
<b>UNIT-II</b>	<b>TESTING OF STATISTICAL HYPOTHESIS</b>						<b>Classes : 09</b>	
Testing a statistical hypothesis, tests on single sample and two samples concerning means and variances. ANOVA: One – way, Two – way with/without interactions.								
<b>UNIT-III</b>	<b>ORDINARY DIFFERENTIAL EQUATIONS</b>						<b>Classes: 09</b>	
Ordinary linear differential equations solvable by direct solution methods; solvable nonlinear Ordinary Differential Equations’.								
<b>UNIT-IV</b>	<b>PARTIAL DIFFERENTIAL EQUATIONS AND CONCEPTS IN SOLUTION TO BOUNDARY VALUE PROBLEMS</b>						<b>Classes: 09</b>	
First and second order partial differential equations; canonical forms.								
<b>UNIT-V</b>	<b>MAJOR EQUATION TYPES ENCOUNTERED IN ENGINEERING AND PHYSICAL SCIENCES</b>						<b>Classes : 09</b>	
Solution methods for wave equation, D’Alembert solution, potential equation, properties of harmonic functions, maximum principle, solution by variable separation method.								
<b>Text Books:</b>								
1. J. B. Doshi, “Differential Equations for Scientists and Engineers”, Narosa, New Delhi. 1 <sup>st</sup> Edition, 2013 2. Douglas C. Montgomery, “Design and Analysis of Experiments” Wiley Student Edition. 7 <sup>th</sup> Edition, 2010.								
<b>Reference Books:</b>								
1. S. P. Gupta, “Statistical Methods”, S. Chand & Sons, 37 <sup>th</sup> revised Edition 2010. 2. Erwin Kreyszig, “Advanced Engineering Mathematics”, Wiley India, 9 <sup>th</sup> Edition, 2009.								

## ADVANCED MACHINE DESIGN

<b>I SEMSTER: CAD/CAM</b>									
Course Code	Category	Hours / Week			Credits	Maximum Marks			
BCCB03	Elective	L	T	P	C	CIA	SEE	Total	
		3	-	-	3	30	70	100	
<b>Contact Classes: 45</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>		<b>Total Classes: 45</b>			
<b>OBJECTIVES:</b>									
The course should enable the students to									
<ul style="list-style-type: none"> <li>I. Apply the systematic engineering design process including, problem definition, information collection, concept generation &amp; selection, and design configuration to design of mechanical systems and elements.</li> <li>II. Identify and apply applicable theoretical methods of stress and strain determination for mechanical systems and elements under various external and internal loads.</li> <li>III. Interpret design based on Fatigue &amp; Creep with analytical analysis.</li> <li>IV. Analyze the stresses produced in circular and non-circular rotating disk and cylinders.</li> </ul>									
<b>UNIT-I</b>	<b>GENERAL DESIGN PROCEDURE</b>							<b>Classes : 09</b>	
Design Philosophies, DFA, DFM, Reliability, Concurrent Engineering, Aesthetics and Ergonomics, Brief review of principal stresses, Theories of Failure. Advanced Materials, Composite Materials, ceramics and super alloys. Mechanics of Anisotropic materials.									
<b>UNIT-II</b>	<b>DESIGN BASED ON FATIGUE</b>							<b>Classes : 09</b>	
Design against fatigue, factors affecting fatigue behavior, Theoretical stress concentration factor and notch sensitivity factor. Fatigue under complex stresses, cumulative fatigue design. Linear damage (Miner's Rule), Manson's method.									
<b>UNIT-III</b>	<b>DESIGN BASED ON CREEP</b>							<b>Classes: 09</b>	
True stress and true strain, creep phenomenon, creep parameters, stress relaxation. Designing components subjected to creep.									
<b>UNIT-IV</b>	<b>ROTATING DISCS AND ROTATING CYLINDER</b>							<b>Classes: 09</b>	
Rotating Discs and Rotating Cylinder Discs with uniform thickness. Discs with uniform strength. Stresses in rotating cylinder with and without internal pressures.									
<b>UNIT-V</b>	<b>DESIGN OF CIRCULAR AND NON-CIRCULAR PLATES &amp; FRACTURE MECHANICS</b>							<b>Classes : 09</b>	
Design of Circular and Non-Circular Plates with different loading conditions and supports & Fracture Mechanics: Griffith theory, Concept of SIF and KIC Crack Tip Plasticity. Determination of plastic zone. Size and shape. Fatigue crack propagation and life estimation									
<b>Text Books:</b>

## DESIGN FOR MANUFACTURING AND ASSEMBLY

<b>I SEMSTER: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
BCCB04	Elective	L	T	P	C	CIA	SEE	Total
		3	-	-	3	30	70	100
<b>Contact Classes: 45</b>		<b>Tutorial Classes: Nil</b>			<b>Practical Classes: Nil</b>		<b>Total Classes: 45</b>	
<b>OBJECTIVES:</b>								
<p><b>The course should enable the students to</b></p> <p>I. Understanding the basics of Computer Graphics needed for CAD/ CAM applications.</p> <p>II. Applying the geometrical modeling for computer graphics.</p> <p>III. Applying data structures in computer graphics.</p>								
<b>UNIT-I</b>	<b>INTRODUCTION TO DESIGN</b>							<b>Classes : 09</b>
<p>Introduction: Design philosophy steps in design process, general design rules for manufacturability, basic principles of design Ling for economical production, creativity in design; Materials selection of materials for design developments in material technology, criteria for material selection, material selection interrelationship with process selection process selection charts.</p>								
<b>UNIT-II</b>	<b>MACHINING PROCESS</b>							<b>Classes : 09</b>
<p>Machining process: Overview of various machining processes, general design rules for machining, dimensional tolerance and surface roughness, design for machining, ease of redesigning of components for machining ease with suitable examples. General design recommendations for machined parts; Metal casting: Appraisal of various casting processes, selection of casting process, general design considerations for casting, casting tolerances, use of solidification simulation in casting design, product design rules for sand casting.</p>								
<b>UNIT-III</b>	<b>METAL JOINING</b>							<b>Classes: 09</b>
<p>Metal joining: Appraisal of various welding processes, factors in design of weldments, general design constitution guidelines, pre and post treatment of welds, effects of thermal stresses in weld joints, design of brazed joints; Forging, design factors for forging, closed dies forging design, parting lines of die drop forging die design general design recommendations.</p> <p>Extrusion and sheet metal work: Design guidelines for extruded sections, design principles for punching, blanking, bending, deep drawing, Keeler Goodman forming line diagram, component design for blanking.</p>								
<b>UNIT-IV</b>	<b>ASSEMBLY ADVANTAGES</b>							<b>Classes: 09</b>
<p>Assembly advantages: Development of the assemble process, choice of assemble method assemble advantages social effects of automation, automatic assembly transfer systems: Continuous transfer, intermittent transfer, indexing mechanisms, and operator, paced free, transfer machine</p>								
<b>UNIT-V</b>	<b>DESIGN OF MANUAL ASSEMBLY</b>							<b>Classes : 09</b>
<p>Design of manual assembly: Design for assembly fits in the design process, general design guidelines for manual assembly, development of the systematic DFA methodology, assembly efficiency, classification system for manual handling, classification system for manual insertion and fastening, effect of part symmetry on handling time, effect of part thickness and size on handling time, effect of weight on handling time, parts requiring two hands for manipulation, effects of combinations of factors, effect of symmetry effect of chamfer design on insertion operations, estimation of insertion time.</p>

## COMPUTER GRAPHICS

<b>I SEMSTER: CAD / CAM</b>									
Course Code	Category	Hours / Week			Credits	Maximum Marks			
BCCB05	Elective	L	T	P	C	CIA	SEE	Total	
		3	-	-	3	30	70	100	
<b>Contact Classes: 45</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>		<b>Total Classes: 45</b>			
<b>OBJECTIVES:</b>									
The course should enable the students to									
I. Understanding the basics of Computer Graphics needed for CAD/ CAM applications.									
II. Applying the geometrical modeling for computer graphics.									
III. Applying data structures in computer graphics.									
<b>UNIT-I</b>	<b>INTRODUCTION TO COMPUTER GRAPHICS</b>							<b>Classes : 09</b>	
Introduction: Role of computer graphics in CAD/CAM, configuration of graphic workstations, menu design and graphical user interfaces, customization and parametric programming.									
<b>UNIT-II</b>	<b>GEOMETRIC TRANSFORMATIONS, PROJECTIONS AND FUNDAMENTALS OF 2D AND 3D TRANSFORMATIONS</b>							<b>Classes : 09</b>	
Geometric transformations and projections: Vector representation of geometric entities, homogeneous coordinate systems; Fundamentals of 2D and 3D transformations: reflection, translation, rotation, scaling, and shearing, various types of projections.									
<b>UNIT-III</b>	<b>DEVELOPMENT OF GEOMETRICAL MODELLING</b>							<b>Classes: 09</b>	
Curves: Modeling planar and space curves, analytical and synthetic approaches, non-parametric and parametric equations.									
Surfaces: Modeling of bi-parametric freedom surfaces, Coons, Bezier, B-spline, and NURBS surfaces, surface manipulation techniques.									
<b>UNIT-IV</b>	<b>GEOMETRICAL MODELING</b>							<b>Classes: 09</b>	
Geometric Modeling: Geometric modeling techniques, wireframe modeling, solid modeling: B Rep CSG, hybrid modelers, feature based, parametric and variation modeling.									
<b>UNIT-V</b>	<b>DATA STRUCTURES IN COMPUTER GRAPHICS</b>							<b>Classes : 09</b>	
Data Structure in Computer Graphics: Introduction to product data standards and data structures, data-base integration for CIM.

## MECHANICS AND MANUFACTURING METHODS OF COMPOSITES

<b>I SEMSTER: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
<b>BCCB06</b>	<b>Elective</b>	L	T	P	C	CIA	SEE	Total
		<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>	<b>30</b>	<b>70</b>	<b>100</b>
<b>Contact Classes: 45</b>	<b>Tutorial Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 45</b>			
<p><b>OBJECTIVES:</b></p> <p><b>The course should enable the students to:</b></p> <p>I. Understand the role of matrix, fiber and filler in the design of polymer/metal matrix composites.</p> <p>II. Elucidate linear elastic properties by rule of mixture, fabrication of composites, mechanical and tribological properties, and fracture behaviour of composite materials.</p> <p>III. Assortment of suitable Fabrication method for different Composite Materials</p>								
<b>UNIT-I</b>	<b>BASIC CONCEPTS AND CHARACTERISTICS</b>						<b>Classes : 09</b>	
<p>Geometric and Physical definitions, natural and man-made composites, Aerospace and structural applications, types and classification of composites, Fibres- Glass, Silica, Kevlar, carbon, boron, silicon carbide, and boron carbide fibres. Particulate composites, Polymer composites, Thermoplastics, Thermosets, Metal matrix and ceramic composites.</p>								
<b>UNIT-II</b>	<b>MICROMECHANICS</b>						<b>Classes : 09</b>	
<p>Unidirectional composites, constituent materials and properties, elastic properties of a lamina, properties of typical composite materials, laminate characteristics and configurations. Characterization of composite properties. Coordinate transformations: Hooke's law for different types of materials, Hooke's law for two dimensional unidirectional lamina, Transformation of stress and strain, Numerical examples of stress strain transformation, Graphic interpretation of stress – strain relations. Off - axis, stiffness modulus, off - axis compliance.</p>								
<b>UNIT-III</b>	<b>ELASTIC BEHAVIOR OF UNIDIRECTIONAL COMPOSITES</b>						<b>Classes: 09</b>	
<p>Elastic constants of lamina, relationship between engineering constants and reduced stiffness and compliances, analysis of laminated composites, constitutive relations. Strength of unidirectional lamina: Micro mechanics of failure, Failure mechanisms.</p> <p>Strength of an orthotropic lamina, Strength of a lamina under tension and shear maximum stress and strain criteria, application to design. The failure envelope, first ply failure, free-edge effects. Micro mechanical predictions of elastic constants.</p>								
<b>UNIT-IV</b>	<b>ANALYSIS OF LAMINATED COMPOSITE PLATES</b>						<b>Classes: 09</b>	
<p>Introduction, thin plate theory, specially orthotropic plate, cross and angle ply laminated plates, problems using thin plate theory.</p>								
<b>UNIT-V</b>	<b>MANUFACTURING METHODS</b>						<b>Classes : 09</b>	
<p>Autoclave, tape production, moulding methods, filament winding, hand layup, pultrusion,RTM</p>

## PRECISION ENGINEERING

<b>I SEMSTER: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
BCCB07	Elective	L	T	P	C	CIA	SEE	Total
		3	-	-	3	30	70	100
<b>Contact Classes: 45</b>		<b>Tutorials Classes: Nil</b>		<b>Practical Classes: Nil</b>		<b>Total Classes: 45</b>		
<b>OBJECTIVES:</b>								
<b>The course should enable the students to:</b>								
I. Understanding the basics of tolerances.								
II. Applying the tolerance analysis and tolerance charting technique for a process.								
III. Understanding the basics fundamentals of nanotechnology.								
<b>UNIT-I</b>	<b>CONCEPT OF ACCURACY AND TOLERANCE ZONE CONVERSION</b>						<b>Classes: 09</b>	
Concepts of accuracy: Introduction, concept of accuracy of machine tools, spindle and displacement accuracies, accuracy of numerical control systems, errors due to numerical interpolation displacement measurement system and velocity lags; geometric dimensioning and tolerancing: Tolerance zone conversions, surfaces, features, features of size, datum features, datum Oddly configured and curved surfaces as datum features, equalizing datums datum feature of representation; form controls, orientation controls logical approach to tolerancing.								
<b>UNIT-II</b>	<b>DATUMS</b>						<b>Classes: 09</b>	
Datum systems: Design of freedom, grouped datum systems, different types, two and three mutually perpendicular grouped datum planes; Grouped datum system with spigot and recess, pin and hole; Grouped datum system with spigot and recess pair and tongue, slot pair, computation of transnational and rotational accuracy, geometric analysis and application.								
<b>UNIT-III</b>	<b>TOLERANCE ANALYSIS</b>						<b>Classes: 09</b>	
Tolerance analysis: Process capability, mean, variance, skewness, Kurtosis, process capability metrics, Cp, Cpk, Cost aspects, feature tolerances.								
Geometric tolerances; surface finish, review of relationship between attainable tolerance grades and different machining process, cumulative effect of tolerances sure fit law, normal law and truncated normal law.								
<b>UNIT-IV</b>	<b>TOLERANCE CHARTING TECHNIQUES</b>						<b>Classes: 09</b>	
Tolerance charting techniques: Operation sequence for typical shaft type of components, preparation of process drawings for different operations, tolerance worksheets and centrally analysis, examples, design features to facilitate machining; datum features, functional and manufacturing components design, machining considerations, redesign for manufactured.								
<b>UNIT-V</b>	<b>MEASURING SYSTEM PROCESSING</b>						<b>Classes: 09</b>	
In Processing or In-Situ measurement of position of processing, point-post process and on machine measurement of dimensional features and surface-mechanical and optical measuring systems; working systems of CMM; Laser alignment and testing.								
<b>Text Books:</b>

## RAPID PROTOTYPE TECHNOLOGIES

<b>I SEMSTER: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
BCCB08	Elective	L	T	P	C	CIA	SEE	Total
		3	-	-	3	30	70	100
<b>Contact Classes: 45</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>		<b>Total Classes: 45</b>		
<b>OBJECTIVES:</b>								
<p><b>The course should enable the students to</b></p> <p>I. Applying of measurement and scaling technique for prototype manufacturing.</p> <p>II. Organize the data collection.</p> <p>III. Identify the application for rapid prototyping.</p> <p>IV. Application for powder based rapid prototyping systems.</p>								
<b>UNIT-I</b>	<b>INTRODUCTION TO RAPID PROTOTYPING</b>						<b>Classes : 09</b>	
<p>Introduction: Prototyping fundamentals, Historical development, Fundamentals of Rapid Prototyping, Advantages and Limitations of Rapid Prototyping, Commonly used Terms, Classification of RP process, Rapid Prototyping Process Chain: Fundamental Automated Processes, Process Chain.</p>								
<b>UNIT-II</b>	<b>TYPES OF PROTOTYPING SYSTEMS</b>						<b>Classes : 09</b>	
<p>Liquid-based Rapid Prototyping Systems: Stereo lithography Apparatus (SLA): Models and specifications, process, working principle, photopolymers, photo polymerization, layering technology, laser and laser scanning, applications, advantages and disadvantages, case studies. solid ground curing (SGC): models and specifications, process, working principle, applications, advantages and disadvantages, case studies; solid-based Rapid Prototyping Systems: Laminated Object Manufacturing (LOM): Models and specifications, Process, working principle, Applications, Advantages and disadvantages, Case studies. Fused Deposition Modeling (FDM): Models and specifications, Process, working principle, Applications, Advantages and Disadvantages, Case studies.</p>								
<b>UNIT-III</b>	<b>POWDER BASED RAPID PROTOTYPING SYSTEMS AND TOOLING</b>						<b>Classes: 09</b>	
<p>Powder Based Rapid Prototyping Systems: Selective laser sintering (SLS): Models and specifications, Process, working principle, Applications, Advantages and Disadvantages, Case studies. Three dimensional Printing (3DP): Models and specifications, Process, working principle, Applications, Advantages and Disadvantages, Case studies.</p> <p>Rapid Tooling: Introduction to Rapid Tooling (RT), Conventional Tooling Vs. RT, Need for RT. Rapid Tooling Classification: Indirect Rapid Tooling Methods: Spray Metal Deposition, RTV Epoxy Tools, Ceramic tools, Investment Casting, Spin Casting, Die casting, Sand Casting, 3D Keltool process. Direct Rapid Tooling: Direct AIM, LOM Tools, DTM Rapid Tool Process, EOS Direct Tool Process and Direct Metal Tooling using 3DP.</p>								
<b>UNIT-IV</b>	<b>RAPID PROTOTYPING DATA FORMAT</b>						<b>Classes: 09</b>	
<p>Rapid Prototyping Data Formats: STL Format, STL File Problems, Consequence of Building Valid and Invalid Tessellated Models, STL file Repairs: Generic Solution, Other Translators, Newly Proposed Formats. Rapid Prototyping Software's: Features of various RP software's like Magic's, Mimics, Solid View, View Expert, 3 D View, Velocity 2, Rhino, STL View 3 Data Expert and 3 D doctor.</p>								

<b>UNIT-V</b>	<b>RAPID PROTOTYPING APPLICATIONS</b>	<b>Classes : 09</b>
<p>RP Applications: Application, Material Relationship, Application in Design, Application in Engineering, Analysis and Planning, Aerospace Industry, Automotive Industry, Jewellery Industry, Coin Industry, GIS application, Arts and Architecture. RP Medical and Bioengineering Applications: Planning and simulation of complex surgery, Customized Implants &amp; Prosthesis, Design and Production of Medical Devices, Forensic Science and Anthropology, Visualization of Biomolecules.</p>

## COMPUTER AIDED DESIGN LABORATORY

<b>I Semester: CAD / CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
BCCB09	Core	L	T	P	C	CIA	SEE	Total
		0	0	4	2	30	70	100
<b>Contact Classes: Nil</b>	<b>Tutorial Classes: Nil</b>	<b>Practical Classes: 36</b>			<b>Total Classes: 36</b>			
<b>OBJECTIVES:</b>								
<b>The course should enable the students to:</b>								
I. Basic understanding of modern trends in design and manufacturing using CAD/CAM.								
II. Advanced aspects of enabling computer aided technologies used in design.								
III. Application of thermal analysis software.								
<b>Week-1</b>	<b>INTRODCUTION TO CAD AND TOOLS :Part -1</b>							
Creation of working drawing, creating geometry, constraining the profile, extracting a part using tools, creating pattern of hole.								
<b>Week-2</b>	<b>INTRODUCTION TO CAD AND TOOLS: Part-2</b>							
Translating Rotating, Mirroring, Managing The Specification Tree. Creating Sheets And Views, Creating Text And Dimensions.								
<b>Week-3</b>	<b>ASSEMBLY OF PART DRAWING :Part -1</b>							
Creating an assembly, moving components, assembling existing components, creating bill of materials								
<b>Week-4</b>	<b>ASSEMBLY OF PART DRAWING :Part -2</b>							
Creating wire frame and surface geometry using generative shape design and sweep tools.								
<b>Week-5</b>	<b>GENERATION OF SURFACES :Part -1</b>							
Generation of Ferguson's cubic surface patches, Bezier surface patches								
<b>Week-6</b>	<b>GENERATION OF SURFACES :Part-2</b>							
Generation of Coon's patch, import and export of drawing from other software.								
<b>Week-7</b>	<b>ANALYSIS OF MODEL :Part -1</b>							
Linear static analysis :Automatic calculation of rigid body modes using specified Eigen value shift, lumped and consistent mass matrices								
<b>Week-8</b>	<b>ANALYSIS OF MODEL:Part-2</b>							
Buckling Analysis: Jacobi inverse iteration techniques, steady state harmonic response, and mode superposition method, overall structural and damping. Linear dynamic analysis: Non linear static analysis, Non-linear dynamic analysis. Steady state heat transfer analysis problems.								
<b>Week-9</b>	<b>THERMAL ANALYSIS :Part -1</b>							
Transient Heat Transfer Analysis: Familiarity with element library, Defining Boundary conditions, multipoint constraint familiarity with different types of loads.								

<b>Week-10</b>	<b>THERMAL ANALYSIS:Part-2</b>
Solution techniques, direct and iterative solver. Results and analysis. Design optimization.	
<b>Text Books:</b>

Seames, "Computer Numerical Control Concepts and Programming", Delmar Cengage Learning, 4<sup>th</sup> Edition, 2013.</li> </ol>	
<b>E-Text Book:</b>	
<ol style="list-style-type: none"> <li>1. <a href="http://sbmpme.blogspot.in/2011/01/cad-cam-cim-p-radhakrishnan.html">http://sbmpme.blogspot.in/2011/01/cad-cam-cim-p-radhakrishnan.html</a></li> <li>2. <a href="https://www.scribd.com/doc/228624725/cad-cam-text-book-by-P-N-RAO">https://www.scribd.com/doc/228624725/cad-cam-text-book-by-P-N-RAO</a></li> </ol>	
<b>SOFTWARE AND HARDWARE REQUIRED FOR A BATCH OF 18 STUDENTS</b>	
<b>SOFTWARE:</b> AutoCAD 2016, CATIA R2016, ANSYS.	
<b>HARDWARE:</b> 500 GB HDD, 4GB RAM.	

## COMPUTATIONAL TECHNIQUES LABORATORY

<b>I Semester: CAD / CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
<b>BCCB25</b>	<b>Core</b>	L	T	P	C	CIA	SEE	Total
		0	0	4	2	30	70	100
<b>Contact Classes: Nil</b>	<b>Tutorial Classes: Nil</b>	<b>Practical Classes: 36</b>			<b>Total Classes: 36</b>			
<b>OBJECTIVES:</b>								
<p><b>The course should enable the students to:</b></p> <p>I. Develop MAT LAB programs for simple and complex engineering problems.</p> <p>II. Interpret the output graphical plots for the given governing equation.</p> <p>III. Apply the MATLAB programming to real time applications.</p>								
<b>Week-1</b>	<b>INTRODUCTION TO MATLAB PROGRAM</b>							
Applications to MATLAB in Mechanical Engineering.								
<b>Week-2</b>	<b>MATLAB PROGRAM TO PLOT THE INTERNAL FORCES, AND BENDING MOMENT.</b>							
<p>The radius of the semicircular member is 25 mm and supported with roller and hinged supports.</p> <p>The load 300N acting vertically downward at the center and 200 N acting horizontally at the roller support toward left direction.</p> <p>Write a MATLAB program to plot the internal forces, namely, the axial forces, shearing force and bending moment as functions of <math>\alpha</math> for <math>0 &lt; \alpha &lt; 90^\circ</math>.</p>								
<b>Week-3</b>	<b>THERMAL STRESS ANALYSIS OF PISTON USING MATLAB PROGRAM</b>							
Temperature distribution around the given piston dimensions.								
<b>Week-4</b>	<b>FORMULATION OF IDEAL AND REAL GAS EQUATIONS</b>							
<p>Gas phase thermodynamic equations of state relate the three state variables of temperature, pressure, and volume for a gas. One of the three state variables can be calculated through the equation of state if values for the other two variables are known. For example, the ideal gas law states <math>PV = RT</math> ~ where P : pressure, Pa: V : specific or molar gas volume, <math>m^3 \text{ mol}^{-1}</math> R : ideal gas constant, (<math>= 8.314 \text{ J}/(\text{mol K})</math>) T : absolute temperature, K.</p>								
<b>Week-5</b>	<b>USING MATLAB PROGRAM PLOT THE FUNCTION OF ONE VARIABLE AND TWO VARIABLE</b>							
Graphing-functions of one variable and two variables								
<b>Week-6</b>	<b>MULTI BODY DYNAMIC ANALYSIS THROUGH MATLAB PROGRAM</b>							
Use of MATLAB to solve simple problems in vibration, Mechanism Simulation using multi body dynamic software								
<b>Week-7</b>	<b>MATLAB PROGRAM FOR EULERS EQUATION OF MOTION</b>							
Solution of Difference Equations using Euler Method.								
<b>Week-8</b>	<b>MATLAB PROGRAM FOR CURVE FITTING.</b>							
Determination of polynomial using method of Least Square Curve Fitting.								

<b>Week-9</b>	<b>DYNAMIC ANALYSIS USING MATLAB PROGRAM</b>
Dynamics and vibration analysis	
<b>Week-10</b>	<b>MATLAB PROGRAM TO PLOT THE RESULTANT ACCELERATION AND THE VARIATION OF ACCELERATION</b>
A jet plane is going in a parabolic path described by $y=0.05x^2$ . At a point in the path, it has a velocity of 200 m/s, which is increasing at the rate of 0.8 m/s <sup>2</sup> . Find the resultant acceleration and plot the variation of acceleration as a function of its horizontal position $x$ .

## ADVANCED FINITE ELEMENT METHOD

<b>II SEMSTER: CAD/CAM</b>								
Course Code		Hours / Week			Credits	Maximum Marks		
BCCB11	Core	L	T	P	C	CIA	SEE	Total
		3	-	-	3	30	70	100
<b>Contact Classes: 45</b>	<b>Tutorials Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 45</b>			
<b>OBJECTIVES:</b>								
<p><b>The courses should enable the students to:</b></p> <ol style="list-style-type: none"> <li>I. Learn advanced topics in Finite Element methods so that this tool can be used for analysis, design, and optimization of engineering systems.</li> <li>II. Use the commercial finite element package ANSYS to build finite element models and solve a selected range of engineering problems.</li> <li>III. Communicate effectively in writing to report (both textually and graphically) the method used, the implementation and the numerical results obtained.</li> </ol>								
<b>UNIT-I</b>	<b>FINITE ELEMENT METHODS-A REVIEW</b>						<b>Classes: 09</b>	
Governing differential equations of one- and two dimensional problems, Library of one dimensional and two dimensional elements; Gauss Quadrature and isoparametric elements-Stress Calculation and Gauss points-Convergence requirements and Patch test								
<b>UNIT-II</b>	<b>BENDING OF PLATES AND SHELLS</b>						<b>Classes: 09</b>	
Bending of Plates and Shells – Finite Element Formulation of Plate and Shell Elements – Thin and Thick Plates-Confirming and non-Confirming Elements – C0 and C1 Continuity Elements –Shell elements as degenerate 3D stress elements-Applications.								
<b>UNIT-III</b>	<b>THREE DIMENSIONAL SOLIDS</b>						<b>Classes: 09</b>	
Introduction - Tetrahedra element - Hexahedron element.								
Linear and higher order elements -Elements with curved surfaces								
<b>UNIT-IV</b>	<b>SPECIAL PURPOSE ELEMENTS</b>						<b>Classes: 09</b>	
Crack tip elements – Transition elements - Finite strip elements-Strip element methods- Method of infinite domain – nodeless elements								
<b>UNIT-V</b>	<b>NONLINEAR ANALYSIS</b>						<b>Classes: 09</b>	
Introduction to nonlinear analysis- Material Nonlinearity-Plasticity-Creep-Visoplasticity-Nonlinear constitutive problem in solid mechanics- Various yield considerations-solution procedures direct iteration method, Newton Raphson method and Modified newton raphson method-Application in Any One manufacturing process								
<b>Text Books:</b>

## COMPUTER INTEGRATED MANUFACTURING

<b>II SEMSTER: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
BCCB12	Core	L	T	P	C	CIA	SEE	Total
		3	-	-	3	30	70	100
<b>Contact Classes: 45</b>	<b>Tutorials Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 45</b>			
<b>OBJECTIVES:</b>								
<p><b>The courses should enable the students to:</b></p> <p>I. The basic components of CIM and its hardware and software</p> <p>II. CAD/CAM and its integration with CIM</p> <p>III. FMS and its applications</p> <p>IV. Principles of computer aided process planning, JIT and GT</p>								
<b>UNIT-I</b>	<b>INTRODUCTION TO CIM</b>						<b>Classes: 09</b>	
<p>Manufacturing - Types, Manufacturing Systems, CIM Definition, CIM wheel, CIM components, Evolution of CIM, needs of CIM, Benefits of CIM, basic components of NC system, NC motion control system, applications of NC, advantages and disadvantages of NC, computer Numerical control, advantages of CNC, functions of CNC, Direct Numerical Control, components of a DNC system, functions of DNC, advantages of DNC.</p>								
<b>UNIT-II</b>	<b>CAD</b>						<b>Classes: 09</b>	
<p>Development of computers, CIM Hardware &amp; Software, Data-Manufacturing data, types, sources, Structure of data models, Data base and DBMS requirement, RDBMS, SQL, Computer Aided Design - benefits, Graphic Standards, Interfaces, CAD software, Integration of CAD/CAM/CIM.</p>								
<b>UNIT-III</b>	<b>FLEXIBLE MANUFACTURING SYSTEMS</b>						<b>Classes: 09</b>	
<p>FMS concept, Components of FMS, FMS Layouts, FMS planning and implementation, Tool Management systems-Tool monitoring,</p> <p>Work holding devices- Modular fixturing, flexible fixturing, flexibility, quantitative analysis of flexibility, application and benefits of FMS, automated material handling system –AGVs, Guidance methods, AS/RS.</p>								
<b>UNIT-IV</b>	<b>AUTOMATED PROCESS PLANNING</b>						<b>Classes: 09</b>	
<p>Group Technology, Part families, Part classification and coding, Production flow analysis, Machine cell design, Applications and Benefits of Group Technology, Structure of a Process Planning, Process Planning function, CAPP - Methods of CAPP, CAD based Process Planning, Inventory management - Materials requirements planning - basics of JIT</p>								
<b>UNIT-V</b>	<b>MONITORING AND QUALITY CONTROL</b>						<b>Classes: 09</b>	
<p>Types of production monitoring system, process control &amp; strategies, direct digital control - Supervisory computer control - computer aided quality control - objectives of CAQC, QC and CIM, contact, non-contact inspection methods, CMM and Flexible Inspection systems. Integration of CAQC with CIM.</p>								
<b>Text Books:</b>

## EXPERIMENTAL STRESS ANALYSIS

<b>II SEMSTER: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		CIA	SEE	Total
BCCB13	Elective	3	-	-	3	30	70	100
<b>Contact Classes: 45</b>	<b>Tutorials Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 45</b>			
<b>OBJECTIVES:</b>								
<p><b>The courses should enable the students to:</b></p> <p>I. Study the Various Experimental Techniques Involved for Measuring Displacements, Stresses, Strains in Structural Components.</p> <p>II. Understand the shear force and bending moment diagrams of symmetrical beams.</p> <p>III. Distinguish bending and shear stresses developed in beams of various sections.</p>								
<b>UNIT-I</b>	<b>EXTENSOMETERS AND DISPLACEMENT SENSORS</b>						<b>Classes: 09</b>	
Principles of Measurements, Accuracy, Sensitivity and Range of Measurements, Mechanical, Optical, Acoustical and Electrical Extensometers and Their Uses, Advantages and Disadvantages, Capacitance Gauges, Laser Displacement Sensors.								
<b>UNIT-II</b>	<b>ELECTRICAL RESISTANCE STRAIN GAUGES</b>						<b>Classes: 09</b>	
Principle Of Operation And Requirements, Types And Their Uses, Materials For Strain Gauges, Calibration And Temperature Compensation, Cross Sensitivity, Wheatstone Bridge And Potentiometer Circuits For Static And Dynamic Strain Measurements, Strain Indicators, Rosette Analysis, Stress Gauges, Load Cells, Data Acquisition, Six Component Balance.								
<b>UNIT-III</b>	<b>PHOTOELASTICITY</b>						<b>Classes: 09</b>	
Two Dimensional Photo Elasticity, Photo Elastic Materials, Concept Of Light – Photoelastic Effects, Stress Optic Law, Transmission Photoelasticity, Jones Calculus, Plane And Circular Polariscopes.								
Interpretation Of Fringe Pattern, Calibration Of Photoelastic Materials, Compensation And Separation Techniques, Introduction To Three Dimensional Photo Elasticity.								
<b>UNIT-IV</b>	<b>BRITTLE COATING AND MOIRE TECHNIQUES</b>						<b>Classes: 09</b>	
Relation Between Stresses In Coating And Specimen, Use of Failure Theories In Brittle Coating, Moire Method Of Strain Analysis								
<b>UNIT-V</b>	<b>NON – DESTRUCTIVE TESTING</b>						<b>Classes: 09</b>	
Fundamentals Of NDT, Acoustic Emission Technique, Radiography, Thermography, Ultrasonics, Eddy Current Testing, Fluorescent Penetrant Testing,								
<b>Text Books:</b>

## INTELLEAGENT MANUFACTURING SYSTEMS

<b>II SEMSTER: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
BCCB14	Elective	3	-	-	3	30	70	100
<b>Contact Classes: 45</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>		<b>Total Classes: 45</b>		
<b>OBJECTIVES:</b>								
<b>The course should enable the student to:</b>								
I. Understanding of basic computer integrated manufacturing.								
II. Applying the knowledge based system in manufacturing.								
III. Applying of machine learning and group technology in manufacturing system.								
<b>UNIT-I</b>	<b>INTRODUCTION TO COMPUTER INTEGRATED MANUFACTURING</b>						<b>Classes: 09</b>	
Computer integrated manufacturing systems structure and functional areas of CIM system, CAD, CAPP, CAM, CAQC, ASRS. Advantages of computer aided manufacturing, manufacturing communication systems, MAP/TOP, OSI model, data redundancy, top-down and bottom-up approach, volume of information, intelligent manufacturing system components, system architecture and data flow, system operation.								
<b>UNIT-II</b>	<b>KNOWLEDGE BASED SYSTEM</b>						<b>Classes: 09</b>	
Components of knowledge based systems, basic components of knowledge based systems, knowledge representation, comparison of knowledge representation schemes, interference engine, knowledge acquisition.								
<b>UNIT-III</b>	<b>MACHINE LEARNING</b>						<b>Classes: 09</b>	
Machine learning, concept of artificial intelligence, conceptual learning. Artificial neural networks, biological neuron, artificial neuron, types of Neural Networks, applications in manufacturing.								
<b>UNIT-IV</b>	<b>AUTOMATED PROCESS PLANNING AND KNOWLEDGE BASED SYSTEM</b>						<b>Classes: 09</b>	
Automated process planning: Variant approach, generative approach, expert systems for process planning, feature recognition, phases of process planning. Knowledge based system for equipment selection, manufacturing system design. equipment selection Problem, modeling the manufacturing equipment selection problem, problem solving approach in KBSES, structure of the KRSES.								
<b>UNIT-V</b>	<b>GROUP TECHNOLOGY</b>						<b>Classes: 09</b>	
Group technology: Models and algorithms visual method, coding Method, cluster analysis method, matrix formation, similarity coefficient method, sorting based algorithms, bond energy algorithm, cost based method, cluster identification method, extended CI Method; Knowledge based group technology, group technology in automated manufacturing system, structure of knowledge based system for group technology (KBSCIT), data Base, knowledge base, clustering algorithm.								
<b>Text Books:</b>

## TRIBOLOGY

<b>II SEMETER: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
BCCB15	Elective	L	T	P	C	CIA	SEE	Total
		3	-	-	3	30	70	100
<b>Contact Classes: 45</b>		<b>Tutorial Classes: Nil</b>			<b>Practical Classes: Nil</b>		<b>Total Classes: 45</b>	
<b>OBJECTIVES:</b>								
<b>The course should enable the students to:</b>								
I. Basic knowledge about different methods of surface modification and surface treatment								
II. In-depth understanding of how different material structures affects the surface properties								
III. Knowledge of different physical laws and chemical reactions which affects the physical and mechanical properties of material surfaces								
IV. In-depth understanding of tribological processes and knowledge of other aspects of the surface performance								
V. Basic knowledge of different analytical techniques for surface analysis and characterization of their performance.								
<b>UNIT-I</b>	<b>SURFACE INTERACTION AND FRICTION</b>						<b>Classes : 09</b>	
Topography of Surfaces, Surface features, properties and measurement, surface interaction, adhesive theory of sliding friction, rolling friction, friction properties of metallic and non-metallic materials, friction in extreme conditions, thermal considerations in sliding contact.								
<b>UNIT-II</b>	<b>WEAR AND SURFACE TREATMENT</b>						<b>Classes : 09</b>	
Process of wear, mechanism of various types of wear, laws of wear, theoretical wear models, wear of metals and non metals, surface treatments, surface modifications, surface coatings methods, surface topography measurements, laser methods, instrumentation, international standards in friction and wear measurements.								
<b>UNIT-III</b>	<b>LUBRICANTS AND LUBRICATION REGIMES</b>						<b>Classes: 09</b>	
Lubricants and their physical properties, viscosity and other properties of oils, additives and selection of lubricants, lubricants standards ISO, SAE, AGMA, BIS standards.								
Lubrication regimes, solid lubrication, dry and marginally lubricated contacts, boundary lubrication hydrodynamic lubrication, elasto and plasto hydrodynamic, magneto hydrodynamic lubrication, hydro static lubrication, gas lubrication.								
<b>UNIT-IV</b>	<b>CORROSION</b>						<b>Classes: 09</b>	
Introduction, principle of corrosion , classification of corrosion, types of corrosion, factors influencing corrosion, testing of corrosion, in-service monitoring, simulated service, laboratory testing, evaluation of corrosion, prevention of corrosion, material selection, alteration of environment, design, cathodic and anodic protection, corrosion inhibitors.								
<b>UNIT-V</b>	<b>ENGINEERING MATERIALS</b>						<b>Classes : 09</b>	
Introduction, advanced alloys, super alloys, titanium alloys, magnesium alloys, aluminium alloys, and nickel based alloys, ceramics, polymers, biomaterials, applications, bio-tribology and nano-tribology.								
<b>Text Books:</b>								
1. G.W.Stachowiak, A.W.Batchelor, “Engineering Tribology”, Butterworth-Heinemann, UK, 2 <sup>nd</sup> Edition, 2005.								
2. Rabinowicz.E, “Friction and Wear of materials”, John Willey & Sons, UK, 2013.								

**Reference Books:**

## INDUSTRIAL ROBOTICS

<b>II SEMESTER: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
BCCB16	Elective	L	T	P	C	CIA	SEE	Total
		3	-	-	3	30	70	100
<b>Contact Classes: 45</b>		<b>Tutorial Classes: Nil</b>			<b>Practical Classes: Nil</b>		<b>Total Classes: 45</b>	
<b>OBJECTIVES:</b>								
<b>The course should enable the students to:</b>								
I. Understand principles of automation and robotics.								
II. Comprehend motion analysis kinematics.								
III. Apply robotics for different industrial applications.								
<b>UNIT-I</b>	<b>INTRODUCTION TO AUTOMATION AND ROBOTICS</b>						<b>Classes : 09</b>	
An over view of robotics, classification by coordinate system and control systems, components of the industrial robotics: Degrees of freedom, end effectors: mechanical gripper, magnetic vacuum cup and other types of grippers , general consideration on gripper selection and design, robot actuator and sensors.								
<b>UNIT-II</b>	<b>MOTION ANALYSIS</b>						<b>Classes : 09</b>	
Basic rotation matrices, composite rotation matrices, equivalent angle and axis homogeneous transformation, problems; Manipulator kinematics: D-H notations, joint coordinates and world coordinates, forward and inverse kinematics, problems.								
<b>UNIT-III</b>	<b>DIFFERENTIAL KINEMATICS</b>						<b>Classes: 09</b>	
Differential kinematics: Differential Kinematics of planar and spherical manipulators, jacobians, problems; differential kinematics: Differential Kinematics of planar and spherical manipulators, jacobians, problems.								
Robot dynamics: Lagrange, euler formulations, newton-euler formulations, problems on planar two link manipulators.								
<b>UNIT-IV</b>	<b>TRAJECTORY PLANNING</b>						<b>Classes: 09</b>	
Joint space scheme, cubic polynomial fit, avoidance of obstacles , types of motion: Slew motion, joint interpolated motion, straight line motion, problems, robot actuators and feed back components: actuators: Pneumatic.								
<b>UNIT-V</b>	<b>ROBOT APPLICATIONS</b>						<b>Classes : 09</b>	
Robot Application in Manufacturing: Material handling, assembly and inspection, work cell design.								
<b>Text Books:</b>								
1. M. P.Groover, "Industrial Robotics", Pearson, 2 <sup>nd</sup> Edition, 2012.								
2. J.J Criag, "Introduction to Robotic Mechanics and Control", Pearson, 3 <sup>rd</sup> Edition, 2013.								
<b>Reference Books:</b>								
1. K.S Fu, "Robotics", McGraw Hill, 1 <sup>st</sup> Edition, 2013.								
2. Richard, D.Klafter, Thomas A Chmielewski, MiachaelNeigen, "Robotic Engineering An Integrated Approach", Prentice Hall, 1 <sup>st</sup> Edition, 2013.								
3. Asada, Slotine, "Robot Analysis and Intelligence", Wiley, 1 <sup>st</sup> Edition, 2013.								
4. Mark W. Spong, M. Vidyasagar, I.John, "Robot Dynamics & Control", John Wiley & Sons, 1 <sup>st</sup> Edition, 2013.								
5. R. K. Mittal, I.J. Nagrath, "Robotics and Control", Tata McGraw hill, 1 <sup>st</sup> Edition, 2011.

## SPECIAL MANUFACTURING PROCESSES

<b>II SEMSTER: CAD/CAM</b>									
Course Code	Category	Hours / Week			Credits	Maximum Marks			
		L	T	P		C	CIA	SEE	Total
BCCB17	Elective	3	-	-	3	30	70	100	
		<b>Contact Classes: 45</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>		<b>Total Classes: 45</b>	
<b>OBJECTIVES:</b>									
<b>The course should enable the students to:</b>									
I. Understanding the basic surface treatment coating in manufacturing.									
II. Applying the advanced aspects in processing of ceramics.									
III. Understanding of modern trends in manufacturing fields.									
<b>UNIT-I</b>	<b>SURFACE TREATMENT</b>							<b>Classes: 09</b>	
Surface treatment: Scope, cleaners, methods of cleaning, surface coating types, and ceramic and organic methods of coating, economics of coating, electro forming, chemical vapor deposition, thermal spraying, ion implantation, diffusion coating, diamond coating and cladding.									
<b>UNIT-II</b>	<b>PROCESSING OF CERAMICS</b>							<b>Classes: 09</b>	
Processing of ceramics: Applications, characteristics, classification, processing of particulate ceramics, powder preparations, consolidation, drying, sintering, hot compaction, area of application, finishing of ceramics; Processing of composites: Composite layers, particulate and fiber reinforced composites, elastomers, reinforced plastics, metal matrix composites, ceramic matrix composites, polymer matrix composites.									
<b>UNIT-III</b>	<b>FABRICATION OF MICROELECTRONIC DEVICES</b>							<b>Classes: 09</b>	
Fabrication of microelectronic devices: Crystal growth and wafer preparation, film deposition oxidation, lithography, bonding and packaging, reliability and yield.									
Printed Circuit boards, computer aided design in micro electronics, surface mount technology, integrated circuit economics.									
<b>UNIT-IV</b>	<b>E-MANUFACTURING</b>							<b>Classes: 09</b>	
E-manufacturing: Nano manufacturing techniques and micromachining, high Speed machining and hot machining.									
<b>UNIT-V</b>	<b>RAPID PROTOTYPING</b>							<b>Classes: 09</b>	
Rapid prototyping: Working principles, methods, stereo lithography, laser Sintering, fused deposition method, applications and limitations, rapid tooling, techniques of rapid manufacturing									
<b>Text Books:</b>									
1.I Kalpakijian, "Manufacturing Engineering and Technology", Adisson Wesley, 7 <sup>th</sup> Edition, 1995.									
2.R. A. Lindburg, "Process and Materials of Manufacturing", PHI, 1 <sup>st</sup> Edition, 1990.									
3.Rao. R. Thummala, Eugene, J. Rymaszewski, Van Nostrand Renihold, "Microelectronic Packaging Handbook", 1 <sup>st</sup> Edition, 2013.									
4.Tai-Run Hsu, "MEMS & Micro Systems Design and manufacture", Tata McGraw Hill, 1 <sup>st</sup> Edition, 2002.									
<b>Reference Books:</b>

## OPTIMIZATION TECHNIQUES

<b>II Semester: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
BCCB18	Elective	3	-	-	3	30	70	100
		<b>Contact Classes: 45</b>			<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>	
<b>OBJECTIVES:</b>								
<p><b>The course should enable the students to:</b></p> <p>I. Learn various optimization techniques.</p> <p>II. Develop a optimization model for a given problem.</p> <p>III. Solve the model using suitable optimization technique.</p> <p>IV. Analyze the sensitivity of a solution to different variables.</p> <p>V. Use and develop optimization simulation software for variety of industrial problems</p>								
<b>UNIT-I</b>	<b>SINGLE VARIABLE NON-LINEAR UNCONSTRAINED OPTIMIZATION</b>						<b>Classes: 09</b>	
Single Variable Non-Linear Unconstrained Optimization: Elimination methods: Uni-Model function-its importance, Fibonacci method, Golden section method. Interpolation methods: Quadratic & Cubic interpolation methods involutes.								
<b>UNIT-II</b>	<b>MULTI VARIABLE NON-LINEAR UNCONSTRAINED OPTIMIZATION</b>						<b>Classes: 09</b>	
Multi variable non-linear unconstrained optimization: Direct search methods – Uni variant method, Pattern search methods – Powell’s, Hook -Jeeves, Rosenbrock search methods. Gradient methods: Gradient of function & its importance, Steepest descent method, Conjugate direction methods: Fletcher-Reeves method & variable metric method.								
<b>UNIT-III</b>	<b>LINEAR PROGRAMMING AND SIMULATION</b>						<b>Classes: 09</b>	
Linear Programming – Formulation, Simplex method & Artificial variable optimization techniques: Big M & Two-phase methods. Sensitivity analysis: Changes in the objective coefficients, constants coefficients of the constraints. Addition and deletion of variables, constraints.								
Simulation – Introduction – Types- steps – applications: inventory & queuing – Advantages and disadvantages								
<b>UNIT-IV</b>	<b>INTEGER PROGRAMMING AND STOCHASTIC PROGRAMMING</b>						<b>Classes: 09</b>	
Integer Programming- Introduction – formulation – Gomory cutting plane algorithm – Zero one algorithm, branch and bound method; Stochastic Programming: Basic concepts of probability theory, random variables distributions- mean, variance, correlation, co variance, joint probability distribution. Stochastic linear programming: Chance constrained algorithm.								
<b>UNIT-V</b>	<b>GEOMETRIC PROGRAMMING</b>						<b>Classes: 09</b>	
Geometric Programming: Posynomials – Arithmetic - Geometric inequality – unconstrained G.P- constrained G.P( $\leq$ type only) Non Traditional Optimization Algorithms: Genetics Algorithm-Working Principles, Similarities and Differences between Genetic Algorithm & Traditional Methods. Simulated Annealing- Working Principle-Simple Problems. Introduction to Particle Swarm Optimization(PSO) (very brief)

## COMPUTER AIDED MACHINING AND ROBOTICS LABORATORY

<b>II Semester: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
<b>BCCB19</b>	<b>Core</b>	L	T	P	C	CIA	SEE	Total
		0	0	4	2	30	70	100
<b>Contact Classes: Nil</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: 36</b>			<b>Total Classes: 36</b>	
<b>OBJECTIVES:</b>								
<p><b>The course should enable the students to:</b></p> <ul style="list-style-type: none"> <li>I. Create the part model using CAM software.</li> <li>II. Generate computer numerically part program for computer numerically control turning and</li> <li>III. Milling operation.</li> <li>IV. Demonstrate the tool path for turning operation using CAM software.</li> </ul>								
<b>Week-1</b>	<b>INTRODUCTION TO COMPUTER AIDED MACHINING</b>							
Planning and selection of sequences of operation, tool setting on machine-practice.								
<b>Week-2</b>	<b>PART PROGRAM-1</b>							
Practice in part programming and operation of CNC turning machines, sub routines and use of cycles.								
<b>Week-3</b>	<b>PART PROGRAM-2</b>							
Practice in part program and operation of a machine center, joining and selection of sequence of operation, tool setting on machine								
<b>Week-4</b>	<b>NUMERICAL CONTROL PROGRAMMING-1</b>							
Generate APT based NC programming and tool simulation for drilling operation.								
<b>Week-5</b>	<b>NUMERICAL CONTROL PROGRAMMING-2</b>							
Practice in APT based NC programming and tool simulation for facing operation.								
<b>Week-6</b>	<b>NUMERICAL CONTROL PROGRAMMING-3</b>							
Generate of NC code for profile milling operation using CAM software.								
<b>Week-7</b>	<b>NUMERICAL CONTROL PROGRAMMING-4</b>							
Tool path simulation for profile milling operation using CAM software.								
<b>Week-8</b>	<b>NUMERICAL CONTROL PROGRAMMING-5</b>							
Develop NC code and tool path simulation for thread operation using CAM software								
<b>Week-9</b>	<b>ROBOTICS SIMULATION-1</b>							
Practice of robotic languages								

<b>Week-10</b>	<b>ROBOTICS SIMULATION-2</b>
3-D Robot Simulation for operation of pick-place robot.	
<b>Text Books:</b>	
<ol style="list-style-type: none"> <li>1. Farid Amirouche, “Principles of Computer-Aided Design and Manufacturing, Pearson, 2<sup>nd</sup> Edition, 2004.</li> <li>2. P. Radha Krishnan, “CAD/ CAM/ CIM”, New Age International, 4<sup>th</sup> Edition, 2016.</li> <li>3. Warren. S. Seames, “Computer Numerical Control Concepts and Programming”, Delmar Cengage Learning, 4<sup>th</sup> Edition, 2013.</li> </ol>

## SIMULATION AND ANALYSIS LABORATORY

<b>II Semester: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
BCCB20	Core	0	0	4	2	30	70	100
<b>Contact Classes: Nil</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: 36</b>		<b>Total Classes: 36</b>		
<b>OBJECTIVES:</b>								
The course should enable the students to:								
I. Give exposure to software tools needed to analyse engineering problems								
II. Expose the students to different applications of simulation and analysis tools								
<b>Week-1</b>	<b>MATLAB BASICS :Part -1</b>							
MAT LAB basics, dealing with matrices, Graphing-functions of one variable and two variables								
<b>Week-2</b>	<b>MATLAB BASICS :Part -2</b>							
Use of MATLAB to solve simple problems in vibration Mechanism Simulation using multi body dynamic software.								
<b>Week-3</b>	<b>ANSYS BASICS :Part -1</b>							
Introduction to Ansys Basics and usage of basic operation.								
<b>Week-4</b>	<b>ANSYS BASICS :Part -2</b>							
Generation Stress analysis of a plate with a circular hole.								
<b>Week-5</b>	<b>STRESS ANALYSIS :Part -1</b>							
Stress analysis of rectangular L bracket								
<b>Week-6</b>	<b>STRESS ANALYSIS :Part -2</b>							
Stress analysis of beams (Cantilever, Simply supported & Fixed ends)								
<b>Week-7</b>	<b>AXI- SYMMETRIC STRESS ANALYSIS :Part -1</b>							
Stress analysis of an Axi-symmetric component								
<b>Week-8</b>	<b>THERMAL ANALYSIS</b>							
Thermal stress analysis of a 2D component								
<b>Week-9</b>	<b>HEAT TRANFER ANALYSIS :Part -1</b>							
Conductive heat transfer analysis of a 2D component.								
<b>Week-10</b>	<b>HEAT TRANFER ANALYSIS :Part -2</b>							
Convective heat transfer analysis of a 2D component								

**Text Books:**

## MINI PROJECT WITH SEMINAR

<b>II Semester: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
BCCB21	Core	L	T	P	C	CIA	SEE	Total
		-	-	4	2	30	70	100
<b>Contact Classes: Nil</b>	<b>Tutorial Classes: Nil</b>	<b>Practical Classes: 36</b>			<b>Total Classes:36</b>			
<b>OBJECTIVES:</b>								
<p><b>The course should enable the students to:</b></p> <ol style="list-style-type: none"> <li>I. Identify structural engineering problems reviewing available literature.</li> <li>II. Study different techniques used to analyze complex structural systems.</li> <li>III. Work on the solutions given and present solution by using his/her technique applying engineering principles.</li> </ol>								
<b>Guidelines to be followed</b>								
<p>Mini Project will have mid semester presentation and end semester presentation. Mid semester presentation will include identification of the problem based on the literature review on the topic referring to latest literature available.’</p> <p>End semester presentation should be done along with the report on identification of topic for the work and the methodology adopted involving scientific research, collection and analysis of data, determining solutions highlighting individuals’ contribution.</p> <p>Continuous assessment of Mini Project at Mid Sem and End Sem will be monitored by the departmental committee.</p>								

## RESEARCH METHODOLOGY AND IPR

<b>III Semester: CSE, ES, CAD/CAM, AE, ST, PEED</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
BCSB31	Core	2	-	-	2	30	70	100
<b>Contact Classes: 30</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>		<b>Total Classes: 30</b>		
<b>OBJECTIVES:</b>								
<p><b>The course should enable the students to:</b></p> <p>I. Understand research problem formulation.</p> <p>II. Analyze research related information</p> <p>III. Follow research ethics</p> <p>IV. Understand that today's world is controlled by Computer, Information Technology; but tomorrow world will be ruled by ideas, concept, and creativity.</p>								
<b>UNIT-I</b>	<b>INTRODUCTION</b>						<b>Classes: 07</b>	
<p>Meaning of research problem, Sources of research problem, Criteria Characteristics of a good research problem, Errors in selecting a research problem, Scope and objectives of research problem.</p> <p>Approaches of investigation of solutions for research problem, data collection, analysis, interpretation, Necessary instrumentations</p>								
<b>UNIT-II</b>	<b>RESEARCH ETHICS</b>						<b>Classes: 05</b>	
<p>Effective literature studies approaches, analysis Plagiarism, Research ethics.</p>								
<b>UNIT-III</b>	<b>RESEARCH PROPOSAL</b>						<b>Classes: 06</b>	
<p>Effective technical writing, how to write report, Paper Developing a Research Proposal.</p> <p>Format of research proposal, a presentation and assessment by a review committee</p>								
<b>UNIT-IV</b>	<b>PATENTING</b>						<b>Classes: 06</b>	
<p>Nature of Intellectual Property: Patents, Designs, Trade and Copyright. Process of Patenting and Development: technological research, innovation, patenting, development. International Scenario: International cooperation on Intellectual Property. Procedure for grants of patents, Patenting under PCT.</p>								
<b>UNIT-V</b>	<b>PATENT RIGHTS</b>						<b>Classes: 06</b>	
<p>Patent Rights: Scope of Patent Rights. Licensing and transfer of technology. Patent information and databases. Geographical Indications.</p> <p>New Developments in IPR: Administration of Patent System. New developments in IPR; IPR of Biological Systems, Computer Software etc. Traditional knowledge Case Studies, IPR and IITs.</p>

## AUTOMATION IN MANUFACTURING

<b>III SEMESTER: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
<b>BCCB22</b>	<b>Elective</b>	3	-	-	3	30	70	100
<b>Contact Classes: 45</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>		<b>Total Classes: 45</b>		
<b>OBJECTIVES:</b>								
<b>The course should enable the students to:</b>								
I. Understand of modern trends in automation and manufacturing								
II. Application of material handling systems and storage systems.								
III. Design of automated assembly lines with quality control.								
<b>UNIT-I</b>	<b>OVER VIEW OF MANUFACTURING AND AUTOMATION</b>						<b>Classes: 09</b>	
Over view of manufacturing and automation: production systems, automation in production systems, automation principles and strategies, manufacturing operations, production facilities, basic elements of an automated system, levels of automation; hardware components for automation and process control, programmable logic controllers and personal computers.								
<b>UNIT-II</b>	<b>MATERIAL HANDLING AND IDENTIFICATION TECHNOLOGIES</b>						<b>Classes: 09</b>	
Material handling and identification technologies: Material handling, equipment, analysis storage systems, performance and location strategies, automated storage systems, AS/RS, types, automatic identification methods, barcode technology, RFID.								
<b>UNIT-III</b>	<b>MANUFACTURING SYSTEMS AND AUTOMATED PRODUCTION LINES</b>						<b>Classes: 09</b>	
Manufacturing systems and automated production lines: Manufacturing systems: components of a manufacturing system, Single station manufacturing cells.								
Manual Assembly lines, line balancing Algorithms, mixed model assembly lines, alternative assembly systems. Automated production lines, Applications, Analysis of transfer lines.								
<b>UNIT-IV</b>	<b>AUTOMATED ASSEMBLY SYSTEMS</b>						<b>Classes: 09</b>	
Automated assembly systems: Fundamentals, Analysis of Assembly systems. Cellular manufacturing, part families, cooling, production flow analysis. Group Technology and flexible Manufacturing systems, Quantitative Analysis.								
<b>UNIT-V</b>	<b>QUALITY CONTROL AND SUPPORT SYSTEMS</b>						<b>Classes: 09</b>	
Quality control and support systems: Quality in Design and manufacturing, inspection principles and strategies, Automated inspection, contact Vs non contact, CMM. Manufacturing support systems. Quality function deployment, computer aided process planning, concurrent engineering, shop floor control, just in time and lean production.								
<b>Text Books:</b>								
1. Mikell. P Groover, "Automation, Production system and computer integrated manufacturing", PHI, 3 <sup>rd</sup> Edition, 2012.								
2. MikeJ P. Groover, "Automation, Production Systems and CIM", PHI, 1 <sup>st</sup> Edition, 2001.

## FLEXIBLE MANUFACTURING SYSTEMS

III Semester: CAD/CAM								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
BCCB23	Elective	L	T	P	C	CIA	SEE	Total
		3	-	-	3	30	70	100
<b>Contact Classes: 45</b>	<b>Tutorials Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 45</b>			
<b>OBJECTIVES:</b>								
The course should enable the students to:								
I. Understanding of modern trends in design and manufacturing using CAD/CAM.								
II. Apply performance analysis techniques.								
III. Understand preventive maintenance procedures in manufacturing.								
<b>UNIT-I</b>	<b>FLEXIBLE MANUFACTURING SYSTEMS:</b>						<b>Classes: 09</b>	
Introduction: Definitions of manufacturing with input-output model, definition of system, basic problems concerning systems and system design procedure, modes of manufacturing – job/batch/flow and multi-product, small batch manufacturing								
<b>UNIT-II</b>	<b>SYSTEM MODELING ISSUES</b>						<b>Classes: 09</b>	
System modeling issues: Centralized versus distributed control; Real-time vs discrete event control; Forward vs. backward scheduling approaches with finite/infinite capacity loading; Modeling of absorbing states and deadlocks; Conflicts; Concurrency, and synchronization.								
<b>UNIT-III</b>	<b>SYSTEM MODELING TOOLS AND TECHNIQUES</b>						<b>Classes: 09</b>	
System Modeling Tools and Techniques: Introduction to mathematical modeling, optimization, and simulation; issues related with deterministic and stochastic models.								
Continuous and discrete mathematical modeling methods -discrete event, monte carlo method; Basic concepts of Markov chains and processes; The M/M/1 and M/M/m queue; Models of manufacturing systems including transfer lines and flexible manufacturing systems, introduction to Petri nets.								
<b>UNIT-IV</b>	<b>PERFORMANCE ANALYSIS</b>						<b>Classes: 09</b>	
Performance Analysis: Transient analysis of manufacturing systems, analysis.								
<b>UNIT-V</b>	<b>PREVENTIVE MAINTAINANCE</b>						<b>Classes: 09</b>	
Preventive maintenance, Karban system, implementation issues.								
<b>Text Books:</b>								
1. N. K. Jha, “Hand Book of Flexible Manufacturing Systems”, Academic Press, 1 <sup>st</sup> Edition, 2013.								
2. Talichi Ohno, “Production System beyond Large Scale Production”, Toyota Productivity Press India Pvt.Ltd, 1 <sup>st</sup> Edition, 2010.								
3. H K Shivanand, “Flexible Manufacturing Systems”, New Age International, 1 <sup>st</sup> Edition, 2006.								
<b>Reference Books:</b>								
1. Farid Amirouche, “Principles of Computer-Aided Design and Manufacturing, 2 <sup>nd</sup> Edition, 2004.

## DESIGN AND FABRICATION OF COMPOSITES

<b>III SEMSTER: CAD/CAM</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
BCCB24	Elective	L	T	P	C	CIA	SEE	Total
		3	0	0	3	30	70	100
<b>Contact Classes:45</b>		<b>Tutorial Classes: Nil</b>			<b>Practical Classes: Nil</b>		<b>Total Classes: 45</b>	
<b>OBJECTIVES:</b>								
<b>The course should enable the students to:</b>								
I. Understand the role of matrix, fiber and filler in the design of polymer/metal matrix composites.								
II. Elucidate linear elastic properties by rule of mixture, fabrication of composites, mechanical and tribological properties, and fracture behaviour of composite materials.								
III. Assortment of suitable Fabrication method for different Composite Materials								
IV. Categorize alternatives involved in the design of composites.								
<b>UNIT-I</b>	<b>INTRODUCTION TO COMPOSITE MATERIALS</b>						<b>Classes : 09</b>	
Introduction to composite materials: Definition, classification, types of matrices material and reinforcements, characteristics and selection, fiber composites, laminated composites, particulate composite, pre-pegs, and sandwich construction.								
<b>UNIT-II</b>	<b>MICRO MECHANICAL ANALYSIS OF LAMINA AND BIAXIAL STRENGTH THEORIES</b>						<b>Classes : 09</b>	
Micro mechanical analysis of a lamina: Introduction, Evaluation of the four elastic moduli, rule of mixture, numerical problems; Biaxial strength theories: Maximum stress theory, maximum strain theory, Tsa Hill theory, Tsai, Wutensor theory, numerical problems.								
<b>UNIT-III</b>	<b>MACRO MECHANICAL ANALYSIS OF LAMINA AND LAMINATE</b>						<b>Classes:09</b>	
Macro mechanics of a lamina: Hooke's law for different types of materials, Number of elastic constants, derivation of nine independent constants for orthotropic material, two dimensional relationships of compliance and stiffness matrix. Hooke's law for two-dimensional angle lamina, engineering constants, numerical problems, Invariant properties, stress strain relations for lamina of arbitrary orientation, numerical problems.								
Macro mechanical analysis of laminate: Introduction, code, Kirchoff hypothesis, CLT, A, B, and D matrices (Detailed derivation) engineering constants, special cases of laminates, numerical problems.								
<b>UNIT-IV</b>	<b>MANUFACTURING PROCESS OF COMPOSITES</b>						<b>Classes: 09</b>	
Manufacturing: Layup and curing open and closed mould processing, hand layup techniques, bag moulding and filament winding, putrusion, pulforming, thermoforming, Injection moulding, cutting, machining and joining, tooling, quality assurance, introduction, material qualification, types of defects, NDT methods.								
<b>UNIT-V</b>	<b>METAL MATRIX COMPOSITES AND ITS APPLICATION DEVELOPMENTS</b>						<b>Classes : 09</b>	
Metal Matrix Composites: Reinforcement materials, types, fabrication, characteristics and selection, base metals selection, applications; Application developments: aircrafts, missiles, space hardware, automobile, electrical and electronics, marine, recreational and sports equipment, future potential of composites.								
<b>Text Books:</b>								
1. Autar K. Kaw, "Mechanics of composite materials", CRC Press, 2 <sup>nd</sup> Edition, 2005.								
2. Mein Schwartz, "Composite Materials Handbook", McGraw-Hill, 2 <sup>nd</sup> Edition, 2013.								

## BUSINESS ANALYTICS

<b>Open Electives</b>									
Course Code	Category	Hours / Week			Credits	Maximum Marks			
		L	T	P		C	CIA	SEE	Total
BCSB25	Open Elective	3	-	-	3	30	70	100	
<b>Contact Classes: 45</b>	<b>Tutorial Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 45</b>				
<b>OBJECTIVES:</b>									
<b>The course should enable the students to:</b>									
I. Understand the role of business analytics within an organization.									
II. Analyze data using statistical and data mining techniques and understand relationships between the underlying business processes of an organization.									
III. To gain an understanding of how managers use business analytics to formulate and solve business problems and to support managerial decision making.									
IV. To become familiar with processes needed to develop, report, and analyze business data.									
V. Use decision-making tools/Operations research techniques.									
VI. Manage business process using analytical and management tools.									
VII. Analyze and solve problems from different industries such as manufacturing, service, retail, software, banking and finance, sports, pharmaceutical, aerospace etc.									
<b>UNIT-I</b>	<b>BUSINESS ANALYTICS</b>							<b>Classes: 09</b>	
Business analytics: Overview of Business analytics, Scope of Business analytics, Business Analytics Process, Relationship of Business Analytics Process and organization, competitive advantages of Business Analytics. Statistical Tools: Statistical Notation, Descriptive Statistical methods, Review of probability distribution and data modeling, sampling and estimation methods overview.									
<b>UNIT-II</b>	<b>REGRESSION ANALYSIS</b>							<b>Classes: 09</b>	
Trendiness and Regression Analysis: Modeling Relationships and Trends in Data, simple Linear Regression. Important Resources, Business Analytics Personnel, Data and models for Business analytics, problem solving, Visualizing and Exploring Data, Business Analytics Technology.									
<b>UNIT-III</b>	<b>ORGANIZATION STRUCTURES</b>							<b>Classes: 09</b>	
Organization Structures of Business analytics, Team management, Management Issues, Designing Information Policy, Outsourcing, Ensuring Data Quality, Measuring contribution of Business analytics, Managing Changes. Descriptive Analytics, predictive analytics, predicative Modeling, Predictive analytics analysis, Data Mining, Data Mining Methodologies, Prescriptive analytics and its step in the business analytics Process, Prescriptive Modeling, nonlinear Optimization.									
<b>UNIT-IV</b>	<b>FORECASTING TECHNIQUES</b>							<b>Classes: 09</b>	
Forecasting Techniques: Qualitative and Judgmental Forecasting, Statistical Forecasting Models, Forecasting Models for Stationary Time Series, Forecasting Models for Time Series with a Linear Trend, Forecasting Time Series with Seasonality, Regression Forecasting with Casual Variables, Selecting Appropriate Forecasting Models. Monte Carlo Simulation and Risk Analysis: Monte Carle Simulation Using Analytic Solver Platform, New-Product Development Model, Newsvendor Model, Overbooking Model, Cash Budget Model.									
<b>UNIT-V</b>	<b>DECISION ANALYSIS</b>							<b>Classes: 09</b>	
Decision Analysis: Formulating Decision Problems, Decision Strategies with the without Outcome Probabilities, Decision Trees, The Value of Information, Utility and Decision Making. Recent Trends in: Embedded and collaborative business intelligence, Visual data recovery, Data Storytelling and Data journalism.

## INDUSTRIAL SAFETY

Course Code	Category	Hours / Week			Credits	Maximum Marks			
		L	T	P		C	CIA	SEE	Total
BCSB26	Open Elective	3	-	-	3	30	70	100	
<b>Contact Classes: 45</b>	<b>Tutorial Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 45</b>				
<b>OBJECTIVES:</b>									
<b>The course should enable the students to:</b>									
I. Ensuring duty holders apply inherent safety principles in managing risks.									
II. Prioritizing interventions based on the inherent hazards of the site and/or pipeline, performance of duty holders in controlling risks and other defined operational intelligence.									
III. Identifying the underlying, as well as the immediate, causes of any deficiencies in duty holders arrangements for managing risks.									
IV. Taking action to ensure immediate and underlying causes of failures of risk management are addressed.									
<b>UNIT-I</b>	<b>INDUSTRIAL SAFETY</b>							<b>Classes: 09</b>	
Industrial safety: Accident, causes, types, results and control, mechanical and electrical hazards, types, causes and preventive steps/procedure, describe salient points of factories act 1948 for health and safety, wash rooms, drinking water layouts, light, cleanliness, fire, guarding, pressure vessels, etc, Safety color codes. Fire prevention and firefighting, equipment and methods.									
<b>UNIT-II</b>	<b>MAINTENANCE ENGINEERING</b>							<b>Classes: 09</b>	
Fundamentals of maintenance engineering: Definition and aim of maintenance engineering, Primary and secondary functions and responsibility of maintenance department, Types of maintenance, Types and applications of tools used for maintenance, Maintenance cost & its relation with replacement economy, Service life of equipment.									
<b>UNIT-III</b>	<b>CORROSION AND PREVENTION TECHNIQUES</b>							<b>Classes: 09</b>	
Wear and Corrosion and their prevention: Wear- types, causes, effects, wear reduction methods, lubricants- types and applications, Lubrication methods, general sketch, working and applications, i.e. Screw down grease cup, ii. Pressure grease gun, iii. Splash lubrication, iv. Gravity lubrication, v. Wick feed lubrication vi. Side feed lubrication, vii. Ring lubrication.									
Definition, principle and factors affecting the corrosion. Types of corrosion, corrosion prevention methods.									
<b>UNIT-IV</b>	<b>FAULT TRACING</b>							<b>Classes: 09</b>	
Fault tracing: Fault tracing-concept and importance, decision tree concept, need and applications, sequence of fault finding activities, show as decision tree, draw decision tree for problems in machine tools, hydraulic, pneumatic, automotive, thermal and electrical equipment's like, I. Any one machine tool, ii. Pump iii. Air compressor, iv. Internal combustion engine, v. Boiler, vi. Electrical motors, Types of faults in machine tools and their general causes.									
<b>UNIT-V</b>	<b>PERIODIC AND PREVENTIVE MAINTENANCE</b>							<b>Classes: 09</b>	
Periodic and preventive maintenance: Periodic inspection-concept and need, degreasing, cleaning and repairing schemes, overhauling of mechanical components, overhauling of electrical motor, common troubles and remedies of electric motor, repair complexities and its use, definition, need, steps and advantages of preventive maintenance. Steps/procedure for periodic and preventive maintenance of: I. Machine tools, ii. Pumps, iii. Air compressors, iv. Diesel generating (DG) sets, Program and schedule of preventive maintenance of mechanical and electrical equipment, advantages of preventive maintenance. Repair cycle concept and importance.									

**Text Books**

## OPERATIONS RESEARCH

Course Code	Category	Hours / Week			Credits	Maximum Marks			
		L	T	P		C	CIA	SEE	Total
BCSB27	Open Elective	3	-	-	3	30	70	100	
<b>Contact Classes: 45</b>	<b>Tutorial Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 45</b>				
<b>OBJECTIVES:</b>									
<b>The student should enable the students to:</b>									
I. Apply the dynamic programming to solve problems of discrete and continuous variables.									
II. Understand the concept of nonlinear programming.									
III. Describe the sensitivity analysis.									
<b>UNIT-I</b>	<b>INTRODUCTION</b>							<b>Classes: 09</b>	
Optimization Techniques, Model Formulation, models, General L.R Formulation, Simplex Techniques, Sensitivity Analysis, Inventory Control Models									
<b>UNIT-II</b>	<b>FORMULATION TECHNIQUES</b>							<b>Classes: 09</b>	
Formulation of a LPP - Graphical solution revised simplex method - duality theory - dual simplex method - sensitivity analysis - parametric programming.									
<b>UNIT-III</b>	<b>NON LINEAR METHODS</b>							<b>Classes: 09</b>	
Nonlinear programming problem - Kuhn-Tucker conditions min cost flow problem. max flow problem - CPM/PERT.									
<b>UNIT-IV</b>	<b>SCHEDULING MODELS</b>							<b>Classes: 09</b>	
Scheduling and sequencing - single server and multiple server models - deterministic inventory models - Probabilistic inventory control models - Geometric Programming.									
<b>UNIT-V</b>	<b>DYNAMIC PROGRAMMING AND GAME THEORY</b>							<b>Classes: 09</b>	
Competitive Models, Single and Multi-channel Problems, Sequencing Models, Dynamic Programming, Flow in Networks, Elementary Graph Theory, Game Theory Simulation									
<b>Text Books</b>									
1. H.A. Taha, "Operations Research - An Introduction", PHI, 9 <sup>th</sup> Edition, 2008.

## COST MANAGEMENT OF ENGINEERING PROJECTS

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P	C	CIA	SEE	Total
<b>BCSB28</b>	<b>Open Elective</b>	3	-	-	3	30	70	100
<b>Contact Classes: 45</b>	<b>Tutorial Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 48</b>			
<b>OBJECTIVES:</b>								
<b>The course should enable the students to:</b>								
I. Establish systems to help streamline the transactions between corporate support departments and the operating units.								
II. Devise transfer pricing systems to coordinate the buyer-supplier interactions between decentralized organizational operating units								
III. Use pseudo profit centers to create profit maximizing behavior in what were formerly cost centers.								
<b>UNIT-I</b>	<b>INTRODUCTION</b>						<b>Classes: 09</b>	
Introduction and Overview of the Strategic Cost Management Process								
<b>UNIT-II</b>	<b>COST CONCEPTS</b>						<b>Classes: 09</b>	
Cost concepts in decision-making; Relevant cost, Differential cost, Incremental cost and Opportunity cost. Objectives of a Costing System; Inventory valuation; Creation of a Database for operational control; Provision of data for Decision- Making.								
<b>UNIT-III</b>	<b>PROJECT MANAGEMENT</b>						<b>Classes: 09</b>	
Project: meaning, Different types, why to manage, cost overruns centers, various stages of project execution: conception to commissioning. Project execution as conglomeration of technical and nontechnical activities. Detailed Engineering activities. Pre project execution main clearances and documents.								
Project team: Role of each member. Importance Project site: Data required with significance. Project contracts. Types and contents. Project execution Project cost control. Bar charts and Network diagram. Project commissioning: mechanical and process.								
<b>UNIT-IV</b>	<b>COST BEHAVIOR AND PROFIT PLANNING</b>						<b>Classes: 09</b>	
Cost Behavior and Profit Planning Marginal Costing; Distinction between Marginal Costing and Absorption Costing; Break-even Analysis, Cost-Volume-Profit Analysis. Various decision-making problems. Standard Costing and Variance Analysis. Pricing strategies: Pareto Analysis. Target costing, Life Cycle Costing. Costing of service sector. Just-in-time approach, Material Requirement, Planning, Enterprise Resource Planning, Total Quality Management and Theory of constraints. Activity-Based Cost Management, Bench Marking; Balanced Score Card and Value-Chain Analysis. Budgetary Control; Flexible Budgets; Performance budgets; Zero-based budgets. Measurement of Divisional profitability pricing decisions including transfer pricing.								
<b>UNIT-V</b>	<b>QUANTITATIVE TECHNIQUES</b>						<b>Classes: 09</b>	
Quantitative techniques for cost management, Linear Programming, PERT/CPM, Transportation Problems, Assignment problems, Simulation, Learning Curve Theory.								
<b>Text Books</b>								
1. Robert S Kaplan Anthony A. Alkinson, "Management & Cost Accounting" Prentice Hall of India, New Delhi.								
2. N.D. Vohra, Quantitative Techniques in Management, Tata McGraw Hill Book Co. Ltd.								
<b>Reference Books</b>

## COMPOSITE MATERIALS

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
BCSB29	Open Elective	3	-	-	3	30	70	100
<b>Contact Classes: 45</b>	<b>Tutorial Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 45</b>			
<b>OBJECTIVES:</b>								
<b>The course should enable the students to:</b>								
I. Understand the manufacturing processes of reinforcement fibers and matrices for composites.								
II. Understand the concept of tailored design philosophy.								
<b>UNIT-I</b>	<b>INTRODUCTION</b>							<b>Classes: 09</b>
Definition – Classification and characteristics of Composite materials. Advantages and application of composites. Functional requirements of reinforcement and matrix. Effect of reinforcement (size, shape, distribution, volume fraction) on overall composite performance.								
<b>UNIT-II</b>	<b>REINFORCEMENTS</b>							<b>Classes: 09</b>
Preparation-layup, curing, properties and applications of glass fibers, carbon fibers, Kevlar fibers and Boron fibers. Properties and applications of whiskers, particle reinforcements. Mechanical Behavior of composites: Rule of mixtures, Inverse rule of mixtures. Isostrain and Isostress conditions.								
<b>UNIT-III</b>	<b>MANUFACTURING OF METAL MATRIX COMPOSITES</b>							<b>Classes: 09</b>
Casting, Solid State diffusion technique, Cladding, Hot isostatic pressing. Properties and applications. Manufacturing of Ceramic Matrix Composites.								
Liquid Metal Infiltration, Liquid phase sintering. Manufacturing of Carbon, Carbon composites: Knitting, Braiding, Weaving. Properties and applications.								
<b>UNIT-IV</b>	<b>MANUFACTURING OF POLYMER MATRIX COMPOSITES</b>							<b>Classes: 09</b>
Preparation of Moulding compounds and prepregs, hand layup method, Autoclave method, Filament winding method, Compression moulding, Reaction injection moulding. Properties and applications.								
<b>UNIT-V</b>	<b>STRENGTH</b>							<b>Classes: 09</b>
Laminar Failure Criteria-strength ratio, maximum stress criteria, maximum strain criteria, interacting failure criteria, hygrothermal failure. Laminate first ply failure-insight strength; Laminate strength-ply discount truncated maximum strain criterion; strength design using caplet plots; stress concentrations.								
<b>Text Books:</b>

## WASTE TO ENERGY

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
BCSB30	Open Elective	3	-	-	3	30	70	100
<b>Contact Classes: 45</b>	<b>Tutorial Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 45</b>			
<b>OBJECTIVES:</b>								
<b>The course should enable the students to:</b>								
I. Understand the principles associated with effective energy management and to apply these principles in the day to day life.								
II. Develop insight into the collection, transfer and transport of municipal solid waste.								
III. Explain the design and operation of a municipal solid wasteland fill.								
IV. Device key processes involved in recovering energy from wastes, systematically evaluate the main operational challenges in operating thermal and biochemical energy from waste facilities.								
<b>UNIT-I</b>	<b>INTRODUCTION TO ENERGY FROM WASTE</b>						<b>Classes: 09</b>	
Introduction to Energy from Waste: Classification of waste as fuel, Agro based, Forest residue, Industrial waste. MSW, Conversion devices. Incinerators, gasifiers, digestors								
<b>UNIT-II</b>	<b>BIOMASS PYROLYSIS</b>						<b>Classes: 09</b>	
Biomass Pyrolysis: Pyrolysis, Types, slow fast , Manufacture of charcoal, Methods, Yields and application, Manufacture of pyrolytic oils and gases, yields and applications.								
<b>UNIT-III</b>	<b>BIOMASS GASIFICATION</b>						<b>Classes: 09</b>	
Gasifiers, Fixed bed system, Downdraft and updraft gasifiers, Fluidized bed gasifiers, Design, construction and operation. Gasifier burner arrangement for thermal heating. Gasifier engine arrangement and electrical power, Equilibrium and kinetic consideration in gasifier operation.								
<b>UNIT-IV</b>	<b>BIOMASS COMBUSTION</b>						<b>Classes: 09</b>	
Biomass stoves, Improved chullahs, types, some exotic designs, Fixed bed combustors, Types, inclined grate combustors, Fluidized bed combustors, Design, construction and operation - Operation of all the above biomass combustors.								
<b>UNIT-V</b>	<b>BIOGAS</b>						<b>Classes: 09</b>	
Properties of biogas (Calorific value and composition), Biogas plant technology and status, Bio energy system. Design and constructional features, Biomass resources and their classification, Biomass conversion processes, Thermo chemical conversion, Direct combustion, biomass gasification, pyrolysis and liquefaction, biochemical conversion, anaerobic digestion. Types of biogas Plants, Applications. Alcohol production from biomass, Bio diesel production. Urban waste to energy conversion, Biomass energy programme in India.

## ENGLISH FOR RESEARCH PAPER WRITING

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
BCSB32	Audit	2	-	-	0	30	70	100
<b>Contact Classes: 24</b>	<b>Tutorial Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 24</b>			
<b>OBJECTIVES:</b>								
<b>The course should enable the students to:</b>								
I. Understand that how to improve your writing skills and level of readability								
II. Learn about what to write in each section								
III. Understand the skills needed when writing a Title Ensure the good quality of paper at very first-time submission								
<b>UNIT-I</b>	<b>PLANNING AND PREPARATION</b>							<b>Classes: 04</b>
Planning and Preparation, Word Order, Breaking up long sentences, Structuring Paragraphs and Sentences, Being Concise and Removing Redundancy, Avoiding Ambiguity and Vagueness								
<b>UNIT-II</b>	<b>ABSTRACT</b>							<b>Classes: 05</b>
Clarifying Who Did What, Highlighting Your Findings, Hedging and Criticizing, Paraphrasing and Plagiarism, Sections of a Paper, Abstracts. Introduction								
<b>UNIT-III</b>	<b>DISCUSSION AND CONCLUSIONS</b>							<b>Classes: 05</b>
Review of the Literature, Methods, Results, Discussion, Conclusions, The Final Check. key skills are needed when writing a Title, key skills are needed when writing an Abstract, key skills are needed when writing an Introduction, skills needed when writing a Review of the Literature.								
<b>UNIT-IV</b>	<b>WRITING SKILLS</b>							<b>Classes: 05</b>
Skills are needed when writing the Methods, skills needed when writing the Results, skills are needed when writing the Discussion, skills are needed when writing the Conclusions								
<b>UNIT-V</b>	<b>QUALITY AND TIME MAINTENANCE</b>							<b>Classes: 05</b>
Useful phrases, how to ensure paper is as good as it could possibly be the first- time submission								
<b>Text Books:</b>								
1. Goldbort R, "Writing for Science", Yale University Press. 2011.								
2. Adrian Wallwork, "English for Writing Research Papers", Springer New York Dordrecht Heidelberg London, 2011.

## DISASTER MANAGEMENT

Course Code	Category	Hours / Week			Credits	Maximum Marks			
		L	T	P		C	CIA	SEE	Total
BCSB33	Audit	2	-	-	0	30	70	100	
		<b>Contact Classes: 24</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>		<b>Total Classes: 24</b>	
<b>OBJECTIVES:</b>									
<b>The course should enable the students to:</b>									
I. Learn to demonstrate a critical understanding of key concepts in disaster risk reduction and humanitarian response.									
II. Critically evaluate disaster risk reduction and humanitarian response policy and practice from multiple perspectives.									
III. Develop an understanding of standards of humanitarian response and practical relevance in specific types of disasters and conflict situations.									
IV. Critically understand the strengths and weaknesses of disaster management approaches, planning and programming in different countries, particularly their home country or the countries they work in									
<b>UNIT-I</b>	<b>INTRODUCTION</b>							<b>Classes: 04</b>	
Disaster: Definition, Factors And Significance; Difference Between Hazard And Disaster; Natural And Manmade Disasters: Difference, Nature, Types And Magnitude.									
<b>UNIT-II</b>	<b>REPERCUSSIONS OF DISASTERS AND HAZARDS</b>							<b>Classes: 05</b>	
Economic Damage, Loss Of Human And Animal Life, Destruction Of Ecosystem. Natural Disasters: Earthquakes, Volcanisms, Cyclones, Tsunamis, Floods, Droughts And Famines, Landslides And Avalanches, Man-made disaster: Nuclear Reactor Meltdown, Industrial Accidents, Oil Slicks And Spills, Outbreaks Of Disease And Epidemics, War And Conflicts.									
<b>UNIT-III</b>	<b>DISASTER PRONE AREAS IN INDIA</b>							<b>Classes: 05</b>	
Study Of Seismic Zones; Areas Prone To Floods And Droughts, Landslides And Avalanches; Areas Prone To Cyclonic And Coastal Hazards With Special Reference To Tsunami; Post-Disaster Diseases And Epidemics									
<b>UNIT-IV</b>	<b>DISASTER PREPAREDNESS AND MANAGEMENT</b>							<b>Classes: 05</b>	
Preparedness: Monitoring of Phenomena Triggering A Disaster Or Hazard; Evaluation Of Risk: Application Of Remote Sensing, Data From Meteorological And Other Agencies, Media Reports: Governmental And Community Preparedness.									
<b>UNIT-V</b>	<b>RISK ASSESSMENT &amp; DISASTER MITIGATION</b>							<b>Classes: 05</b>	
Disaster Risk: Concept And Elements, Disaster Risk Reduction, Global And National Disaster Risk Situation. Techniques Of Risk Assessment, Global Co-Operation In Risk Assessment And Warning, People's Participation In Risk Assessment. Strategies for Survival. Disaster Mitigation: Meaning, Concept And Strategies Of Disaster Mitigation, Emerging Trends In Mitigation. Structural Mitigation And Non-Structural Mitigation, Programs Of Disaster Mitigation In India.

## SANSKRIT FOR TECHNICAL KNOWLEDGE

Course Code	Category	Hours / Week			Credits	Maximum Marks			
		L	T	P		C	CIA	SEE	Total
BCSB34	Audit	2	-	-	0	30	70	100	
		<b>Contact Classes: 24</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>		<b>Total Classes: 24</b>	
<b>OBJECTIVES:</b>									
<b>The course should enable the students to:</b>									
I. Get a working knowledge in illustrious Sanskrit, the scientific language in the world									
II. Learning of Sanskrit to improve brain functioning									
III. Learning of Sanskrit to develop the logic in mathematics, science & other subjects enhancing the memory power									
IV. The engineering scholars equipped with Sanskrit will be able to explore the huge knowledge from ancient literature									
<b>UNIT-I</b>	<b>INTRODUCTION</b>							<b>Classes: 04</b>	
Alphabets in Sanskrit, Past/Present/Future Tense									
<b>UNIT-II</b>	<b>SENTENCES</b>							<b>Classes: 04</b>	
Simple Sentences									
<b>UNIT-III</b>	<b>ROOTS</b>							<b>Classes: 04</b>	
Order, Introduction of roots									
<b>UNIT-IV</b>	<b>SANSKRIT LITERATURE</b>							<b>Classes: 04</b>	
Technical information about Sanskrit Literature									
<b>UNIT-V</b>	<b>TECHNICAL CONCEPTS</b>							<b>Classes: 08</b>	
Technical concepts of Engineering-Electrical, Mechanical, Architecture, Mathematics									
<b>Text Books:</b>									
1. Suresh Soni, "India's Glorious Scientific Tradition", Ocean books (P) Ltd., New Delhi.

## VALUE EDUCATION

Course Code	Category	Hours / Week			Credits	Maximum Marks			
		L	T	P		C	CIA	SEE	Total
BCSB35	Audit	2	-	-	0	30	70	100	
<b>Contact Classes: 24</b>	<b>Tutorial Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 24</b>				
<b>OBJECTIVES:</b>									
<b>The course should enable the students to:</b>									
I. Understand value of education and self- development									
II. Imbibe good values in students									
III. Let the should know about the importance of character									
<b>UNIT-I</b>	<b>VALUES AND SELF-DEVELOPMENT</b>							<b>Classes: 04</b>	
Values and self-development. Social values and individual attitudes. Work ethics, Indian vision of humanism. Moral and non- moral valuation. Standards and principles. Value judgments.									
<b>UNIT-II</b>	<b>CULTIVATION OF VALUES</b>							<b>Classes: 06</b>	
Importance of cultivation of values. Sense of duty. Devotion, Self-reliance. Confidence, Concentration. Truthfulness, Cleanliness. Honesty, Humanity. Power of faith, National Unity. Patriotism. Love for nature, Discipline.									
<b>UNIT-III</b>	<b>PERSONALITY AND BEHAVIOR DEVELOPMENT</b>							<b>Classes: 06</b>	
Personality and Behavior Development - Soul and Scientific attitude. Positive Thinking. Integrity and discipline. Punctuality, Love and Kindness. Avoid fault Thinking. Free from anger, Dignity of labor. Universal brotherhood and religious tolerance. True friendship. Happiness Vs suffering, love for truth. Aware of self-destructive habits. Association and Cooperation. Doing best for saving nature.									
<b>UNIT-IV</b>	<b>CHARACTER AND COMPETENCE</b>							<b>Classes: 03</b>	
Character and Competence –Holy books vs Blind faith. Self-management and Good health. Science of reincarnation. Equality, Nonviolence, Humility, Role of Women.									
<b>UNIT-V</b>	<b>SELF CONTROL</b>							<b>Classes: 03</b>	
All religions and same message. Mind your Mind, Self-control. Honesty, Studying effectively.

## CONSTITUTION OF INDIA

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P	C	CIA	SEE	Total
BCSB36	Audit	2	-	-	0	30	70	100
		<b>Contact Classes: 24</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>		<b>Total Classes: 24</b>
<b>OBJECTIVES:</b>								
<b>The course should enable the students to:</b>								
I. Understand the premises informing the twin themes of liberty and freedom from a civil right perspective.								
II. Address the growth of Indian opinion regarding modern Indian intellectuals' constitutional role and entitlement to civil and economic rights as well as the emergence of nationhood in the early years of Indian nationalism.								
III. Address the role of socialism in India after the commencement of the Bolshevik Revolution in 1917 and its impact on the initial drafting of the Indian Constitution.								
<b>UNIT-I</b>	<b>HISTORY OF MAKING OF THE INDIAN CONSTITUTION &amp; PHILOSOPHY OF THE INDIAN CONSTITUTION</b>						<b>Classes: 08</b>	
History of Making of the Indian Constitution: History, Drafting Committee, ( Composition & Working) Philosophy of the Indian Constitution: Preamble, Salient Features								
<b>UNIT-II</b>	<b>CONTOURS OF CONSTITUTIONAL RIGHTS &amp; DUTIES</b>						<b>Classes: 04</b>	
Fundamental Rights, Right to Equality, Right to Freedom, Right against Exploitation, Right to Freedom of Religion, Cultural and Educational Rights, Right to Constitutional Remedies, Directive Principles of State Policy, Fundamental Duties.								
<b>UNIT-III</b>	<b>ORGANS OF GOVERNANCE</b>						<b>Classes: 04</b>	
Parliament, Composition, Qualifications and Disqualifications, Powers and Functions, Executive President, Governor, Council of Minister. Judiciary, Appointment and Transfer of Judges, Qualifications, Powers and Functions								
<b>UNIT-IV</b>	<b>LOCAL ADMINISTRATION</b>						<b>Classes: 04</b>	
District's Administration head: Role and Importance, Municipalities: Introduction, Mayor and role of Elected Representative, CEO of Municipal Corporation. Pachayati raj: Introduction, PRI: Zila Pachayat. Elected officials and their roles, CEO Zila Pachayat: Position and role. Block level: Organizational Hierarchy (Different departments), Village level: Role of Elected and Appointed officials, Importance of grass root democracy								
<b>UNIT-V</b>	<b>ELECTION COMMISSION</b>						<b>Classes: 04</b>	
Election Commission: Role and Functioning. Chief Election Commissioner and Election Commissioners. State Election Commission: Role and Functioning. Institute and Bodies for the welfare of SC/ST/OBC and women.								
<b>Text Books:</b>

## PEDAGOGY STUDIES

Course Code	Category	Hours / Week			Credits	Maximum Marks		
		L	T	P		C	CIA	SEE
BCSB37	Audit	2	-	-	0	30	70	100
<b>Contact Classes: 24</b>	<b>Tutorial Classes: Nil</b>	<b>Practical Classes: Nil</b>			<b>Total Classes: 24</b>			
<b>OBJECTIVES:</b>								
<b>The course should enable the students to:</b>								
I. Review existing evidence on the review topic to inform programme design and policy making undertaken by the DFID, other agencies and researchers.								
II. Identify critical evidence gaps to guide the development.								
<b>UNIT-I</b>	<b>INTRODUCTION</b>							<b>Classes: 04</b>
Introduction And Methodology: Aims and rationale, Policy background, Conceptual framework and terminology. Theories of learning, Curriculum, Teacher education. Conceptual framework, Research questions. Overview of methodology and Searching.								
<b>UNIT-II</b>	<b>THEMATIC OVERVIEW</b>							<b>Classes: 02</b>
Thematic overview: Pedagogical practices are being used by teachers in formal and informal classrooms in developing countries. Curriculum, Teacher education.								
<b>UNIT-III</b>	<b>PEDAGOGICAL PRACTICES</b>							<b>Classes: 04</b>
Evidence on the effectiveness of pedagogical practices. Methodology for the in depth stage: quality assessment of included studies. How can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy? Theory of change.								
Strength and nature of the body of evidence for effective pedagogical practices. Pedagogic theory and pedagogical approaches. Teachers' attitudes and beliefs and Pedagogic strategies.								
<b>UNIT-IV</b>	<b>PROFESSIONAL DEVELOPMENT</b>							<b>Classes: 04</b>
Professional Development: alignment with classroom practices and follows up Support. Peer support. Support from the head teacher and the community. Curriculum and assessment Barriers to learning: limited resources and large class sizes.								
<b>UNIT-V</b>	<b>RESEARCH GAPS</b>							<b>Classes: 02</b>
Research gaps and future directions, Research design, Contexts, Pedagogy. Teacher education. Curriculum and assessment. Dissemination and research impact.								
<b>Text Books:</b>								
1. Ackers J, Hardman F, "Classroom interaction in Kenyan primary schools", Compare, 31 (2), 245-261. 2. Agrawal M, "Curricular reform in schools: The importance of evaluation", Journal of Curriculum Studies, 36 (3): 361-379.

## **VISION AND MISSION OF THE INSTITUTE**

### **VISION**

To bring forth professionally competent and socially sensitive engineers, capable of working across cultures meeting the global standards ethically.

### **MISSION**

To provide students with an extensive and exceptional education that prepares them to excel in their profession, guided by dynamic intellectual community and be able to face the technically complex world with creative leadership qualities.

Further, be instrumental in emanating new knowledge through innovative research that emboldens entrepreneurship and economic development for the benefit of wide spread community.

### **M.TECH - PROGRAM OUTCOMES (POS)**

- PO-1:** Apply advanced level knowledge, techniques, skills and modern tools in the field of computer aided engineering to critically assess the emerging technological issues.
- PO-2:** Have abilities and capabilities in developing and applying computer software and hardware to mechanical design and manufacturing fields.
- PO-3:** Conduct experimental and/or analytical study and analyzing results with modern mathematical / scientific methods and use of software tools.
- PO-4:** Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team.
- PO-5:** Write and present a substantial technical report / document.
- PO-6:** Independently carry out research / investigation and development work to solve practical problems
- PO-7:** Design and validate technological solutions to defined problems and recognize the need to engage in lifelong learning through continuing education.

## **OBJECTIVES OF THE DEPARTMENT**

### **DEPARTMENT OF MECHANICAL ENGINEERING**

#### **PROGRAMME EDUCATIONAL OBJECTIVES (PEO'S)**

A graduate of Institute of Aeronautical Engineering, Mechanical Engineering should enjoy a successful career in Mechanical Engineering or a related field after graduation. The program aims to:

- PEO-I:** Impart essential knowledge in the latest technological topics on computer aided engineering and to prepare them for taking up further research in the areas.
- PEO-II:** Create congenial environment that promotes learning, growth and imparts ability to work with inter-disciplinary groups.
- PEO – III:** Broaden and deepen their capabilities in analytical and experimental methods, analysis of data, and draw relevant conclusions for scholarly writing and presentation.

## **FREQUENTLY ASKED QUESTIONS AND ANSWERS ABOUT AUTONOMY**

### **1. Who grants Autonomy? UGC, Govt., AICTE or University**

In case of Colleges affiliated to a university and where statutes for grant of autonomy are ready, it is the respective University that finally grants autonomy but only after concurrence from the respective state Government as well as UGC. The State Government has its own powers to grant autonomy directly to Govt. and Govt. aided Colleges.

### **2. Shall IARE award its own Degrees?**

No. Degree will be awarded by Jawaharlal Nehru Technological University, Hyderabad with a mention of the name IARE on the Degree Certificate.

### **3. What is the difference between a Deemed University and anAutonomy College?**

A Deemed University is fully autonomous to the extent of awarding its own Degree. A Deemed University is usually a Non-Affiliating version of a University and has similar responsibilities like any University. An Autonomous College enjoys Academic Autonomy alone. The University to which an autonomous college is affiliated will have checks on the performance of the autonomous college.

### **4. How will the Foreign Universities or other stake – holders know that we are an Autonomous College?**

Autonomous status, once declared, shall be accepted by all the stake holders. The Govt. of Telangana mentions autonomous status during the First Year admission procedure. Foreign Universities and Indian Industries will know our status through our website.

### **5. What is the change of Status for Students and Teachers if we become Autonomous?**

An autonomous college carries a prestigious image. Autonomy is actually earned out of our continued past efforts on academic performances, our capability of self- governance and the kind of quality education we offer.

### **6. Who will check whether the academic standard is maintained / improved after Autonomy? How will it be checked?**

There is a built in mechanism in the autonomous working for this purpose. An Internal Committee called Academic Programme Evaluation Committee, which will keep a watch on the academics and keep its reports and recommendations every year. In addition the highest academic council also supervises the academic matters. The standards of our question papers, the regularity of academic calendar, attendance of students, speed and transparency of result declaration and such other parameters are involved in this process.

### **7. Will the students of IARE as an Autonomous College qualify for University Medals and Prizes for academic excellence?**

No. IARE has instituted its own awards, medals, etc. for the academic performance of the students. However for all other events like sports, cultural on co-curricular organized by the University the students shall qualify.

### **8. Can IARE have its own Convocation?**

No. Since the University awards the Degree the Convocation will be that of the University, but there will be Graduation Day at IARE.

### **9. Can IARE give a provisional degree certificate?**

Since the examinations are conducted by IARE and the results are also declared by IARE, the college sends a list of successful candidates with their final Grades and Grade Point Averages including CGPA to the University. Therefore with the prior permission of the University the college will be entitled to give the provisional certificate.

**10. Will Academic Autonomy make a positive impact on the Placements or Employability?**

Certainly. The number of students qualifying for placement interviews is expected to improve, due to rigorous and repetitive classroom teaching and continuous assessment. Also the autonomous status is more responsive to the needs of the industry. As a result therefore, there will be a lot of scope for industry oriented skill development built-in into the system. The graduates from an autonomous college will therefore represent better employability.

**11. What is the proportion of Internal and External Assessment as an Autonomous College?**

Presently, it is 70 % external and 30% internal. As the autonomy matures the internal assessment component shall be increased at the cost of external assessment.

**12. Is it possible to have complete Internal Assessment for Theory or Practicals?**

Yes indeed. We define our own system. We have the freedom to keep the proportion of external and internal assessment component to choose.

**13. Why Credit based Grade System?**

The credit based grade system is an accepted standard of academic performance the world over in all Universities. The acceptability of our graduates in the world market shall improve.

**14. What exactly is a Credit based Grade System?**

The credit based grade system defines a much better statistical way of judging the academic performance. One Lecture Hour per week of Teaching Learning process is assigned One Credit. One hour of laboratory work is assigned half credit. Letter Grades like A, B,C,D, etc. are assigned for a Range of Marks. (e.g. 91% and above is A+, 80 to 90 % could be A etc.) in Absolute Grading System while grades are awarded by statistical analysis in relative grading system. We thus dispense with sharp numerical boundaries. Secondly, the grades are associated with defined Grade Points in the scale of 1 to 10. Weighted Average of Grade Points is also defined Grade Points are weighted by Credits and averaged over total credits in a Semester. This process is repeated for all Semesters and a CGPA defines the Final Academic Performance

**15. What are the norms for the number of Credits per Semester and total number of Credits for UG/PG programme?**

These norms are usually defined by UGC or AICTE. Usually around 25 Credits per semester is the accepted norm.

**16. What is a Semester Grade Point Average (SGPA)?**

The performance of a student in a semester is indicated by a number called SGPA. The SGPA is the weighted average of the grade points obtained in all the courses registered by the student during the semester.

$$SGPA = \frac{\sum_{i=1}^n (C_i G_i)}{\sum_{i=1}^n C_i}$$

Where,  $C_i$  is the number of credits of the  $i^{th}$  course and  $G_i$  is the grade point scored by the student in the  $i^{th}$  course and  $i$  represent the number of courses in which a student registered in the concerned semester. SGPA is rounded to two decimal places.

**17. What is a Cumulative Grade Point Average (CGPA)?**

An up-to-date assessment of overall performance of a student from the time of his first registration is obtained by calculating a number called CGPA, which is weighted average of the grade points obtained in all the courses registered by the students since he entered the Institute.

$$CGPA = \frac{\sum_{j=1}^n (C_j S_j)}{\sum_{j=1}^n C_j}$$

Where,  $S_i$  is the SGPA of the  $i^{th}$  semester and  $C_i$  is the total number of credits in that semester and  $j$  represent the number of courses in which a student's is registered upto the semester. CGPA is rounded to two decimal places.

**18. Is there any Software available for calculating Grade point averages and converting the same into Grades?**

Yes, The institute has its own MIS software for calculation of SGPA, CGPA, etc.

**19. Will the teacher be required to do the job of calculating SGPAs etc. and convert the same into Grades?**

No. The teacher has to give marks obtained out of whatever maximum marks as it is. Rest is all done by the computer.

**20. Will there be any Revaluation or Re-Examination System?**

No. There will be double valuation of answer scripts. There will be a make up Examination after a reasonable preparation time after the End Semester Examination for specific cases mentioned in the Rules and Regulations. In addition to this, there shall be a 'summer term' (compressed term) followed by the End Semester Exam, to save the precious time of students.

**21. How fast Syllabi can be and should be changed?**

Autonomy allows us the freedom to change the syllabi as often as we need.

**22. Will the Degree be awarded on the basis of only final year performance?**

No. The CGPA will reflect the average performance of all the semester taken together.

**23. What are Statutory Academic Bodies?**

Governing Body, Academic Council, Examination Committee and Board of Studies are the different statutory bodies. The participation of external members in everybody is compulsory. The institute has nominated professors from IIT, NIT, University (the officers of the rank of Pro-vice Chancellor, Deans and Controller of Examinations) and also the reputed industrialist and industry experts on these bodies.

**24. Who takes Decisions on Academic matters?**

The Governing Body of institute is the top academic body and is responsible for all the academic decisions. Many decisions are also taken at the lower level like Boards of Studies. Decisions taken at the Board of Studies level are to be ratified at the Academic Council and Governing Body.

**25. What is the role of Examination committee?**

The Examinations Committee is responsible for the smooth conduct of internal, End Semester and make up Examinations. All matters involving the conduct of examinations, spot valuations, tabulations and preparation of Grade Cards etc fall within the duties of the Examination Committee.

**26. Is there any mechanism for Grievance Redressal?**

The institute has grievance redressal committee, headed by Dean - Student affairs and Dean - IQAC.

**27. How many attempts are permitted for obtaining a Degree?**

All such matters are defined in Rules & Regulation

**28. Who declares the result?**

The result declaration process is also defined. After tabulation work wherein the SGPA, CGPA and final Grades are ready, the entire result is reviewed by the Moderation Committee. Any unusual

deviations or gross level discrepancies are deliberated and removed. The entire result is discussed in the Examinations and Result Committee for its approval. The result is then declared on the institute notice boards as well put on the web site and Students Corner. It is eventually sent to the University.

**29. Who will keep the Student Academic Records, University or IARE?**

It is the responsibility of the Dean, Academics of the Autonomous College to keep and preserve all the records.

**30. What is our relationship with the JNT University?**

We remain an affiliated college of the JNT University. The University has the right to nominate its members on the academic bodies of the college.

**31. Shall we require University approval if we want to start any New Courses?**

Yes, It is expected that approvals or such other matters from an autonomous college will receive priority.

**32. Shall we get autonomy for PG and Doctoral Programmes also?**

Yes, presently our PG programs also enjoying autonomous status.

# INSTITUTE OF AERONAUTICAL ENGINEERING

(Autonomous)

Dundigal, Hyderabad - 500 043

## UNDERTAKING BY STUDENT / PARENT

“To make the students attend the classes regularly from the first day of starting of classes and be aware of the College regulations, the following Undertaking Form is introduced which should be signed by both student and parent. The same should be submitted to the Dean, Academic”.

I, Mr./Ms ----- joining I Semester for the academic year 2019-2020 in Institute of Aeronautical Engineering, Hyderabad, do hereby undertake and abide by the following terms, and I will bring the ACKNOWLEDGEMENT duly signed by me and my parent and submit it to the Dean, Academic.

1. I will attend all the classes as per the timetable from the starting day of the semester specified in the institute Academic Calendar. In case, I do not turn up even after two weeks of starting of classes, I shall be ineligible to continue for the current academic year.
2. I will be regular and punctual to all the classes (theory/practical/drawing) and secure attendance of not less than 80% in every course as stipulated by Institute. I am fully aware that an attendance of less than 70% in more than three courses will make me lose one year.
3. I will compulsorily follow the dress code prescribed by the college.
4. I will conduct myself in a highly disciplined and decent manner both inside the classroom and on campus, failing which suitable action may be taken against me as per the rules and regulations of the institute.
5. I will concentrate on my studies without wasting time in the Campus/Hostel/Residence and attend all the tests to secure more than the minimum prescribed Class/Sessional Marks in each course. I will submit the assignments given in time to improve my performance.
6. I will not use Mobile Phone in the institute premises and also, I will not involve in any form of ragging inside or outside the campus. I am fully aware that using mobile phone to the institute premises is not permissible and involving in Ragging is an offence and punishable as per JNTUH/UGC rules and the law.
7. I declare that I shall not indulge in ragging, eve-teasing, smoking, consuming alcohol drug abuse or any other anti-social activity in the college premises, hostel, on educational tours, industrial visits or elsewhere.
8. I will pay tuition fees, examination fees and any other dues within the stipulated time as required by the Institution / authorities, failing which I will not be permitted to attend the classes.
9. I will not cause or involve in any sort of violence or disturbance both within and outside the college campus.
10. If I absent myself continuously for 3 days, my parents will have to meet the HOD concerned/ Principal.
11. I hereby acknowledge that I have received a copy of IARE - R18 Academic Rules and Regulations, Syllabus copy and hence, I shall abide by all the rules specified in it.

### ACKNOWLEDGEMENT

I have carefully gone through the terms of the undertaking mentioned above and I understand that following these are for my/his/her own benefit and improvement. I also understand that if I/he/she fail to comply with these terms, shall be liable for suitable action as per Institute/JNTUH/AICTE/UGC rules and the law. I undertake that I/he/she will strictly follow the above terms.
