| Chief Coordinator | Dr. K Suvarchala, Associate Professor | | | | | | |
| Course Faculty | Dr. J Si Mrs. B | Dr. K Suvarchala, Associate Professor Dr. J Sirisha Devi, Associate Professor Mrs. B Padmaja, Associate Professor Mrs. G Geetha Reddy, Assistant Professor | | | | | |

I. COURSE OVERVIEW:

The course covers some of the general-purpose data structures and algorithms, and software development. Topics covered include managing complexity, analysis, static data structures, dynamic data structures and hashing mechanisms. The main objective of the course is to teach the students how to select and design data structures and algorithms that are appropriate for problems that they might encounter in real life. This course reaches to student by power point presentations, lecture notes, and lab which involve the problem solving in mathematical and engineering areas.

II. COURSE PRE-REQUISITES:

| Level | Course Code | Semester | Prerequisites | Credits |
|-------|----------------|----------|---------------------------------|---------|
| UG | ACSB01 | II | Programming for Problem Solving | 3 |

III. MARKS DISTRIBUTION:

| Subject | SEE Examination | CIA Examination | Total Marks |
|-----------------|-----------------|-----------------|-------------|
| Data Structures | 70 Marks | 30 Marks | 100 |

IV. DELIVERY / INSTRUCTIONAL METHODOLOGIES:

| ~ | Chalk & Talk | ~ | Quiz | ~ | Assignments | × | MOOCs |
|---|------------------------|---|----------|---|--------------|---|--------|
| ~ | LCD / PPT | ~ | Seminars | > | Mini Project | > | Videos |
| ~ | Open Ended Experiments | | | | | | |

V. EVALUATION METHODOLOGY:

The course will be evaluated for a total of 100 marks, with 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). Out of 30 marks allotted for CIA during the semester, marks are awarded by taking average of two CIA examinations or the marks scored in the make-up examination.

Semester End Examination (SEE): The SEE is conducted for 70 marks of 3 hours duration. The syllabus for the theory courses is divided into FIVE units and each unit carries equal weightage in terms of marks distribution. The question paper pattern is as follows. Two full questions with "either" or "choice" will be drawn from each unit. Each question carries 14 marks. There could be a maximum of two sub divisions in a question.

The emphasis on the questions is broadly based on the following criteria:

| 50 % | To test the objectiveness of the concept. |
|------|--|
| 50 % | To test the analytical skill of the concept OR to test the application skill of the concept. |

Continuous Internal Assessment (CIA):

CIA is conducted for a total of 30 marks (Table 1), with 20 marks for Continuous Internal Examination (CIE), 05 marks for Quiz and 05 marks for Alternative Assessment Tool (AAT).

| Component | | Total Marks | | |
|-----------------------|----------|-------------|-----|----|
| Type of Assessment | CIE Exam | Quiz | AAT | |
| CIA Marks | 20 | 05 | 05 | 30 |

Table 1: Assessment pattern for CIA

Continuous Internal Examination (CIE):

Two CIE exams shall be conducted at the end of the 8th and 16th week of the semester respectively. The CIE exam is conducted for 20 marks of 2 hours duration consisting of five descriptive type questions out of which four questions have to be answered where, each question carries 5 marks. Marks are awarded by taking average of marks scored in two CIE exams.

Quiz – Online Examination:

Two Quiz exams shall be online examination consisting of 25 multiple choice questions and are to be answered by choosing the correct answer from a given set of choices (commonly four). Such a question paper shall be useful in testing of knowledge, skills, application, analysis, evaluation and understanding of the students. Marks shall be awarded considering the average of two quiz examinations for every course.

Alternative Assessment Tool (AAT)

AAT enables faculty to design own assessment patterns during the CIA. The AAT converts the classroom into an effective learning centre. The AAT may include tutorial hours/classes, seminars, assignments, term paper, open ended experiments, METE (Modeling and Experimental Tools in Engineering), five minutes video, MOOCs etc.

VI. HOW PROGRAM OUTCOMES ARE ASSESSED:

| | Program Outcomes (POs) | Strength | Proficiency assessed by |
|------|---|----------|--|
| PO 1 | Engineering knowledge : Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems. | | Assignments/ Laboratory Practices/Quiz |
| PO 2 | Problem analysis : Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences | | Seminar |
| PO 3 | Design/development of solutions : Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations. | | Seminar |
| PO 5 | Modern tool usage : Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations. | | Seminar/ Laboratory Practices |
| PO12 | Life-long learning : Recognize the need for, and have the preparation and ability to engage independent and life-long learning in the broadest context of technological change. | | Seminar/Guest Lecture |

VII. HOW PROGRAM SPECIFIC OUTCOMES ARE ASSESSED:

| | Program Specific Outcomes (PSOs) | Strength | Proficiency assessed by |
|-------|--|----------|---|
| PSO 1 | Professional Skills: The ability to research, understand and implement computer programs in the areas related to algorithms, system software, multimedia, web design, big data analytics, and networking for efficient analysis and design of Computer-based systems of varying complexity. | 3 | Assignments |
| PSO 2 | Problem-Solving Skills: The ability to apply standard practices and strategies in software project development using open-ended programming environments to deliver a quality product for business success. | 3 | Assignments/ Laboratory Practices |
| PSO 3 | Successful Career and Entrepreneurship: The ability to employ modern computer languages, environments, and platforms in creating innovative career paths, to be an entrepreneur, and a zest for higher studies. | 1 | Guest Lecture |

3 = High; **2** = Medium; **1** = Low

VIII. COURSE OBJECTIVES :

| The course | The course should enable the students to: | | | | | |
|------------|---|--|--|--|--|--|
| Ι | Learn the basic techniques of algorithm analysis. | | | | | |
| II | Demonstrate searching and sorting algorithms and analyze their time complexities. | | | | | |
| III | Implement linear data structures viz. stack, queue and linked list. | | | | | |
| IV | Demonstrate non-linear data structures viz. tree and graph traversal algorithms. | | | | | |
| V | Study and choose appropriate data structure to solve problems in real world. | | | | | |

IX. COURSE OUTCOMES (COs):

| Cos | Course Outcome | CLOs | Course Learning Outcome |
|------|--|-------|--|
| CO 1 | Understand the concept of data structures and | CLO 1 | Understand algorithms and data structures in terms of time and space complexity of basic operations. |
| | apply algorithm for solving problems like | CLO 2 | Choose a suitable algorithm to organize the data in ascending or descending order. |
| | sorting, searching, insertion and deletion of | CLO 3 | Explore an algorithm to find the location of an element in a given list. |
| | data. | CLO 4 | Compare the time complexities of various searching and sorting algorithms. |
| CO 2 | Understand linear data structures for processing | CLO 5 | Implementation of stack and queues using an underlying array. |
| | of ordered or unordered data. | CLO 6 | Understand application of stacks in arithmetic expression conversion and evaluation. |
| | | CLO 7 | Understand working of circular queues and double ended queue. |
| CO 3 | Explore various | CLO 8 | Understand dynamic data structures and their real |
| | operations on dynamic | | time applications. |
| | data structures like single linked list, circular | CLO 9 | Understand the basic insertion and deletion operations associated with linked list. |

| Cos | Course Outcome | CLOs | Course Learning Outcome |
|------|---|--------|---|
| | linked list and doubly linked list. | CLO 10 | Organize the data in various linked representation format. |
| CO 4 | Explore the concept of non linear data structures | CLO 11 | Understand the concept of non-linear data structures viz. trees and graphs. |
| | such as trees and graphs. | CLO 12 | Application of trees, graphs and graph traversal techniques. |
| CO 5 | Understand the binary search trees, hash | CLO 13 | Compare and Contrast the operations of binary search trees and AVL trees. |
| | function, and concepts of collision and its | CLO 14 | Understand the concept of M-way search trees, operations and applications. |
| | resolution methods. | CLO 15 | Understand the implementation of hashing using hash table and hash function. |
| | | CLO 16 | Describe the concept of collision and its resolving methods in applications. |
| | | CLO 17 | Strengthen the knowledge of data structures and algorithms for employability. |

X. COURSE LEARNING OUTCOMES (CLOs):

| CLO Code | CLO's | At the end of the course, the student will have the ability to: | PO's Mapped | Strength of Mapping |
|-------------|--------|--|---------------------|------------------------|
| ACSB03.01 | CLO 1 | Understand algorithms and data structures in terms of time and space complexity of basic operations. | PO 1 | 3 |
| ACSB03.02 | CLO 2 | Choose a suitable algorithm to organize the data in ascending or descending order. | PO 3,PO4 | 2 |
| ACSB03.03 | CLO 3 | Explore an algorithm to find the location of an element in a given list. | PO 2,PO5 | 2 |
| ACSB03.04 | CLO 4 | Compare the time complexities of various searching and sorting algorithms. | PO 1 | 3 |
| ACSB03.05 | CLO 5 | Implementation of stack and queues using an underlying array. | PO 2, PO 3, PO 5 | 3 |
| ACSB03.06 | CLO 6 | Understand application of stacks in arithmetic expression conversion and evaluation. | PO 1,PO2 | 3 |
| ACSB03.07 | CLO 7 | Understand working of circular queues and double ended queue. | PO 1,PO5 | 2 |
| ACSB03.08 | CLO 8 | Understand dynamic data structures and their real time applications. | PO1,PO 2, PO 5 | 3 |
| ACSB03.09 | CLO 9 | Understand the basic insertion and deletion operations associated with linked list. | PO 1,PO 2, PO 5 | 3 |
| ACSB03.10 | CLO 10 | Organize the data in various linked representation format. | PO 1,PO 2 | 3 |
| ACSB03.11 | CLO 11 | Understand the concept of non-linear data structures viz. trees and graphs. | PO 1,PO 2 | 2 |
| ACSB03.12 | CLO 12 | Application of trees, graphs and graph traversal techniques. | PO 1 | 2 |
| ACSB03.13 | CLO 13 | Compare and Contrast the operations of binary search trees and AVL trees. | PO 1,PO 2, PO 5 | 3 |
| ACSB03.14 | CLO 14 | Understand the concept of M-way search trees, operations and applications. | PO 1,PO 2, PO5 | 2 |
| ACSB03.15 | CLO 15 | Understand the implementation of hashing using hash table and hash function. | PO 1,PO 2, PO5 | 3 |

| ACSB03.16 | CLO 16 | Describe the concept of collision and its resolving methods in applications. | PO 1,PO 2, PO5, PO 12 | 2 |
|-----------|--------|---|--------------------------|---|
| ACSB03.17 | CLO 17 | Strengthen the knowledge of data structures and algorithms for employability. | PO 1,PO 2, PO5, PO 12 | 2 |

XV. SYLLABUS

| MODULE-I INTRODUCTION TO DATA STRUCTURES, SEARCHING AND SORTING Basic concepts: Introduction to data structures, classification of data structures, operations on data structures, abstract dat type, algorithms, different approaches to design an algorithm, recursive algorithms; Searching techniques: Linear search, binary search and Fibonacci search; Sorting techniques: Bubble sort, selection sort, insertion sort, quick sort, merge sort, and comparison of sorting algorithms. MODULE-II LINEAR DATA STRUCTURES Stacks: Primitive operations, implementation of stacks using Arrays, applications of stacks arithmetic expression conversion and evaluation; Queues: Primitive operations; Implementation of queues using Arrays, applications of linear queue, circular queue and double ended queue (deque). MODULE-III LINKED LISTS Linked lists: Introduction, singly linked list, representation of a linked list in memory, operations on a single linked list; Applications of linked lists: Polynomial representation and sparse matrix manipulation. Types of linked lists: Circular linked lists, doubly linked list; Linked list representation and operations of Stack, linked list representation and operations of queue. MODULE-IV NON LINEAR DATA STRUCTURES Trees: Basic concept, binary tree, binary tree representation, array and linked representations, binary tree traversal, binary tree variants, application of trees; Graphs: Basic concept, graph terminology, graph implementation, graph traversals, Application of graphs, Priority Queue. MODULE-V BINARY TREES AND HASHING Binary search tr | | | | | | | | | | |

XVI. COURSE PLAN:

The course plan is meant as a guideline. Probably there may be changes.

| Lecture No | Topics to be covered | Course Learning Outcomes (CLOs) | Reference |
|---------------|--|--|----------------------|
| 1 - 2 | Basic concepts: Introduction to Data Structures. | CLO 1 | T1:1.1.3 |
| | | | R2:1.2 |
| 3-4 | Classification of data structures | CLO 2 | T1:1.1.3 R2 : 1.4 |
| 5-6 | Operations on data Structures | CLO 2 | T1:1.2 |
| 7 – 8 | Searching techniques: Linear search and binary search | CLO 4 | T1:5.1 |
| 9 - 10 | Sorting techniques: Bubble sort, selection sort | CLO 4 | R1:14.5 |
| 11 – 14 | Insertion sort and comparison of sorting algorithms. | CLO 7 | T1:5.2 R2 : 10.2 |
| 15 – 16 | Stacks: Primitive operations, implementation of stacks using Arrays. | CLO 9 | T1:7.1 |
| 17 – 20 | Applications of stacks arithmetic expression conversion and evaluation. | CLO 9 | T1:7.2 |
| 21 – 22 | Queues: Primitive operations; Implementation of queues using Array. | CLO 11 | T1:8.1 |
| 23 - 24 | Applications of linear queue, circular queue. | CLO 11 | T1:8.4 |
| 25 - 26 | Double ended queue (deque). | CLO 13 | R2 : 5.4 |
| 27 – 28 | Linked lists: Introduction, singly linked list, representation of a linked list in memory. | CLO 11 | T1:9.1 |
| 29-30 | Operations on a single linked list, Applications of linked lists: Polynomial representation, Circular linked lists, doubly linked lists; | CLO 9 | T1:9.2 |
| 31 - 32 | Sparse matrix manipulation. | CLO 14 | T2:9.2 |
| 33 - 35 | Linked list representation and operations of Stack, Linked list representation and operations of queue. | CLO 14 | T1:9 |
| 36 - 38 | Trees: Basic concept, binary tree, binary tree representation, array and linked representations | CLO 14 | T1:13.1-13.2 |
| 39 – 40 | Binary tree traversal, binary tree variants, application of trees. | CLO 14 | T1:13.2.3 |
| 41 - 43 | Graphs: Basic concept, graph terminology, graph implementation. | CLO 14 | R2 : 8.2 |
| 44 – 46 | Graph traversals, Application of graphs, | CLO 17 | T2:6.2 |
| 47 – 50 | Priority Queue. | CLO 17 | T1:6.1 T2:5.6 |
| 51 - 52 | Binary search trees, properties and operations. | CLO 16 | T1:14.1 |
| 53 - 55 | Balanced search trees: AVL trees, Introduction to M- Way search trees, B trees. | CLO 16 | T1:14.3 |
| 56 - 58 | Hashing and collision: Introduction, hash tables, hash functions, | CLO 15 | R2 : 6.4 |
| 59 - 60 | Collisions, applications of hashing. | CLO 15 | R2 : 6.4 |

XVII.GAPS IN THE SYLLABUS - TO MEET INDUSTRY / PROFESSION REQUIREMENTS:

| S No | Description | Proposed actions | Relevance with POs | Relevance with PSOs |
|------|---|---|-----------------------|------------------------|
| 1 | Familiarizing different Tree techniques viz, Threaded binary trees, B+ trees | Seminar/NPTEL | PO 3 | PSO 1 |
| 2 | Familiarizing the role of Python language in developing application level programs. | Industrial visits | PO 1,PO 2 | PSO 3 |
| 3 | Solving different problems and Practicing various debugging strategies to become a good programmer | Extra Lab Sessions, Participating in Coding contests. | PO 2 | PSO 3 |

Prepared by: Dr. K Suvarchala, Associate Professor

HOD, CSE
