## ELECTRONICS AND COMMUNICATION ENGINEERING

### COURSE DESCRIPTION FORM

|                            |   |           |             |         |
|----------------------------|---|-----------|-------------|---------|
| <b>Course Title</b>        | <b>COMPUTER ORGANIZATION AND OPERATING SYSTEMS</b>                  |           |             |         |
| Course Code                | A50516  |           |             |         |
| <b>Regulation</b>          | <b>R13- JNTUH</b>   |           |             |         |
| <b>Course Structure</b>    | Lectures  | Tutorials | Practical's | Credits |
|                            | 4   | 1         | -           | 4       |
| <b>Course Coordinator</b>  | Ms. A Swapna , Assistant Professor                                  |           |             |         |
| <b>Team of Instructors</b> | Ms. A Lakshmi, Mr.Ch.Srikanth, Mr.P.Sunil Kumar Assistant Professor |           |             |         |

#### I. COURSE OVERVIEW:

Computer Organization course introduces the principles of computer organization and the basic architecture concepts. The aim of the course is to provide a thorough discussion of the fundamentals of computer organization and architecture and to relate these to contemporary design issues. The course emphasizes performance and cost analysis, instruction set design, pipe lining, memory hierarchy, virtual memory management, and I/O systems.. Operating System course presents fundamental concepts related to the design and implementation of operating systems. Topics includes basic operating system structure, process scheduling, process and thread synchronization and concurrency, memory management, file systems and storage servers.

#### II. PREREQUISITES:

| Level | Credits | Periods/Weeks | Prerequisites                           |
|-------|---------|---------------|---|
| UG    | 4       | 4             | Basic Mathematics, Digital logic design |

#### III. Course Assessment Methods

##### a) Marks Distribution

| Session Marks(25M)  | University End Exam Marks | Total Marks |
|---|---------------------------|-------------|
| <p>There shall be 2 midterm examinations. Each midterm examination consists of subjective type and objective type tests.</p> <p>The subjective test is for 10 marks, with duration of 1 hour.</p> <p>Subjective test of each semester shall contain 4 questions; the student has to answer 2 questions, each carrying 5 marks.</p> <p>The objective type test is for 10 marks with duration of 20 minutes. It consists of</p> |                           |             |

|  |           |            |
|--|-----------|------------|
| 10 multiple choice and 10 objective type questions, the student has to answer all the questions and each carries half mark.<br>First midterm examination shall be conducted for the first two and half units of syllabus and second midterm examination shall be conducted for the remaining portion. Five marks are earmarked for assignments. There shall be two assignments in every theory course. Marks shall be awarded considering the average of two assignments in each course. | <b>75</b> | <b>100</b> |
|--|-----------|------------|

IV. **Evaluation Scheme**

| S. No | Component            | Duration   | Marks |
|-------|----------------------|------------|-------|
| 1     | I Mid Examination    | 90 minutes | 20    |
| 2     | I Assignment         | -          | 05    |
| 3     | II Mid Examination   | 90 minutes | 20    |
| 4     | II Assignment        | -          | 05    |
| 5     | External Examination | 3 hours    | 75    |

V. **Course Objectives:**

- i. To have a thorough understanding of the basic structure and operation of a digital computer.
- ii. To discuss in detail the operation of the arithmetic unit including the algorithms and implementation of fixed-point and floating-point addition, subtraction, multiplication and division.
- iii. To study the different ways of communicating with I/O devices and standard I/O interfaces.
- iv. To Study the Hierarchical memory system including cache memories and virtual memory.
- v. To Demonstrate the Knowledge of functions of operating system memory management scheduling, file system and interface, distributed systems, security and deadlocks.
- vi. To implement a significant portion of an Operating System.

VI. **Course Outcome:**

1. **Describe** organization of digital computers and explain the basic principles and operations of different components.
2. **Identify** the operation of the arithmetic unit including the algorithms and implementation of fixed-point and floating-point addition, subtraction, multiplication and division.
3. **Compare** various data representations and understand how arithmetic and logical operations are performed by computers.
4. **Differentiate** Instruction formats classification based on number of operands, size of instruction, and way of accessing the data.
5. **Understand** the design of the Control unit.
6. **Illustrate** the hierarchical memory system including cache memories and virtual memory.
7. **Demonstrate** Different ways of Communicating with I/O Devices and standard I/O interfaces.
8. **Identify** different I/O data transfer techniques with performance comparison.
9. **Understand** the objective and functions of modern operating systems.
10. **Demonstrate** how computing resources are used by application software and managed by system software.
11. **Contrast** kernel and user mode in an operating system.
12. **Understand** process management concepts including scheduling, synchronization, and deadlocks.
13. **Understand** concepts of memory management including virtual memory.
14. **Analyze** issues related to file system interface and implementation, disk management.

**VII. How program outcomes are assessed:**

| Program Outcomes |  | Level | Proficiency assessed by              |
|------------------|--|-------|--------------------------------------|
| PO1              | An ability to apply knowledge of basic sciences, mathematical skills, engineering and technology to solve complex electronics and communication engineering problems ( <b>Fundamental Engineering Analysis Skills</b> ). | H     | Lectures and problem solving         |
| PO2              | An ability to identify, formulate and analyze engineering problems using knowledge of Basic Mathematics and Engineering Sciences ( <b>Engineering Problem Solving Skills</b> ).  | H     | Design Exercises and assignments     |
| PO3              | An ability to provide solution and to design Electronics and Communication Systems as per social needs ( <b>Social Awareness</b> ).  | H     | Lectures, Assignments, Exams         |
| PO4              | An ability to investigate the problems in Electronics and Communication field and develop suitable solutions ( <b>Creative Skills</b> ).   | H     | Lectures, Tutorials, Problem solving |
| PO5              | An ability to use latest hardware and software tools to solve complex engineering problems ( <b>Software and Hardware Interface</b> ).   | S     | Lectures                             |
| PO6              | An ability to apply knowledge of contemporary issues like health, Safety and legal which influences engineering design ( <b>Social Awareness</b> ).  | N     | ----                                 |
| PO7              | An ability to have awareness on society and environment for sustainable solutions to Electronics and Communication Engineering problems ( <b>Social Awareness</b> ).   | N     | —                                    |
| PO8              | An ability to demonstrate understanding of professional and ethical responsibilities ( <b>Professional Integrity</b> ).  | S     | Lectures, Motivation                 |
| PO9              | An ability to work efficiently as an individual and in multidisciplinary teams (Team work).  | S     | Assignments, Tutorials, Exams        |
| PO10             | An ability to communicate effectively and efficiently both in verbal and written form ( <b>Communication Skills</b> ).   | N     | —                                    |
| PO11             | An ability to develop confidence to pursue higher education and for life-long learning ( <b>Continuing Education Awareness</b> ).  | S     | Discussions, Exams                   |
| PO12             | An ability to design, implement and manage the electronic projects for real world applications with optimum financial resources ( <b>Practical Engineering Analysis Skills</b> ).  | S     | Lectures                             |

**VIII. HOW PROGRAM SPECIFIC OUTCOMES ARE ASSESSED:**

| Program Specific Outcomes |  | Level | Proficiency assessed by |
|---------------------------|--|-------|-------------------------|
| PSO1                      | <b>Professional Skills:</b> The ability to research, understand and implement computer programs in the areas related to algorithms, system software, multimedia, web design, big data analytics, and networking for efficient analysis and design of computer-based systems of varying complexity. | H     | Lectures, Assignments   |
| PSO2                      | <b>Problem-solving Skills:</b> The ability to apply standard practices and strategies in software project development using open-ended programming environments to deliver a quality product for business success.   | H     | Projects                |

|      |  |   |                |
|------|--|---|----------------|
| PSO3 | <b>Successful Career and Entrepreneurship:</b> The ability to employ modern computer languages, environments, and platforms in creating innovative career paths, to be an entrepreneur, and a zest for higher studies. | S | Guest Lectures |
|------|--|---|----------------|

## VIII. Syllabus

### UNIT-I

**Basic Structure of Computers:** Computer Types, Functional Unit, Basic OPERATIONAL Concepts , Bus Structures , Software, Performance, Multiprocessors and Multi Computers, Data Representation, Fixed Point Representation, Floating- point Representation.

**Register Transfer Language and Micro Operations:** Register Transfer Language, Register transfer Bus and Memory Transfers, Arithmetic Micro Operations, Logic Micro Operations, Shift Micro Operations, Arithmetic Logic Shift Unit, Instruction codes, Computer registers Computer Instructions-Instruction Cycle.

Memory- reference Instructions, Input-Output and Interrupt, Stack Organization , Instruction Formats, Addressing Modes, DATA transfers and Manipulation , Program control , Reduced Instruction Set Computer

### UNIT-II

**Micro Programmed Control:** Control Memory, Address Sequencing , Micro Program Examples, Design of Control Unit, Hard wired Control , Micro Programmed Control

**The Memory System:** Basic Concepts of Semiconductor RAM Memories, Read-Only Memories, Cache memories Performance Considerations, Virtual memories Secondary Storage, Introduction to RAID

### UNIT-III

**Input-Output organization:** Peripheral Devices, Input-Output Interface, Asynchronous Data Transfer Modes, Priority interrupt, Direct Memory Access, Input-Output Processor(IOP),Serial Communication; Introduction to Peripheral Components , Interconnect ( PCI ) Bus, Introduction to Standard Serial Communication Protocols like RS232, USB , IEEE 1394

### UNIT-IV

**Operating Systems Overview:** Overview of Computer Operating Systems Functions, Protection and Security, Distributed Systems, Special Purpose Systems, Operating Systems Structures-Operating System Services and Systems Calls, System Programs, Operating Systems Generation

#### Memory Management:

Swapping, Contiguous Memory Allocation ,Paging, Structure of the Page table, Segmentation, virtual Memory, Demand Paging, Page-Replacement Algorithms, Allocation and Avoidance ,Recovery From Deadlock.

#### Principles of Deadlock:

System model, deadlock characterization, Deadlock prevention, Detection and avoidance, Recovery from deadlock.

### UNIT-V

**File System Interface:** The Concept of a File, Access Methods, Directory Structure, File System Mounting, File Sharing, Protection,

**File System Implementation:** File System Structure, File System Implementation , Directory Implementation, Allocation Methods, Free Space Management

### TEXT BOOKS:

1. Computer Organization - Carl Hamacher , Zvonksvransesic , SafeaZaky, 5th Edition, McGraw Hill.
2. Computer system architecture: Morris Mano .
3. Operating System Concepts- Abraham Silberchatz, Peter B.Galvin Greg Gagne, 8th Edition, John Wiley.

## REFERENCES

1. Computer organization and architecture –c 6th Edition, Pearson/PHI.
2. Structured Computer Organization –Andrew S.Tanenbaum, 4th Edition PHI/Pearson.
3. Fundamentals or Computer Organization and Design, - SivaraamaDandamudi Springer Int.Edition.
4. Operating Systems - Internals and design Principles , Stallings, 6th Edition-2009,Pearson Education.

## IX. Course Plan

At the end of the course, the students are able to achieve the following Course Learning Outcomes.

| Lecture No. | Course Learning Outcomes  | Topics to be covered   | Reference                 |
|-------------|---|--|---------------------------|
| 1           | <b>Identify</b> the basic elements of hardware and explain their functions and how they fit together to form an architecture.                             | <b>Basic structure of computers:</b><br>Computer Types, Functional units, Basic Operational Concepts.              | T1:1.1                    |
| 2           | <b>Differentiate</b> the Bus structures and different processor register to evaluate the performance.   | Bus Structures, Software, Performance, Multiprocessors and Multi computers.  | T1:1.2,1.3-1.7            |
| 3-4         | <b>Learn</b> .how data is represented, manipulated and stored within a computer system.   | Data Representation, Fixed and Floating point.   | T2:3-1,3-3,3-4            |
| 5-6         | <b>Understand</b> different types of data transfer between bus and memory using several processor registers.  | <b>Register Transfer Language and Micro-operations:</b><br>Register Transfer Bus and Memory Transfer.              | T2:4-1,4-3                |
| 7           | <b>Describe</b> how arithmetic and logical operations are performed by computers.   | Arithmetic Micro-operations and Logic Micro-operations   | T2:4-4,4-5                |
| 8           | <b>Understand</b> the Design of Arithmetic Logic Shift Unit   | Shift Micro-operations and Arithmetic logic Shift Unit   | T2:4-6,4-7                |
| 9-11        | <b>Learn</b> the Structure of Instruction codes.<br><b>Explain</b> different types of instructions and different steps involved in instruction execution. | Instruction Codes ,Computer registers and Computer instructions ,Instruction Cycle ,Memory- Reference instructions | T2:5-1,5-2,5-3<br>5-5,5-6 |
| 12          | Describe the purpose, function and implementation of interrupts in a computer system.   | Input-Output and Interrupt   | T2:5-7                    |
| 13-14       | <b>Identify</b> different types of instructions and calculate their impact on performance of computer.  | STACK Organization , Instruction Formats   | T2:8-3,8-4                |
| 15          | <b>Understand</b> different types of addressing modes used in an instruction.   | Addressing Modes   | T2:8-5                    |
| 16-17       | <b>Ability to</b> understand data transfer and manipulation instructions.   | Data transfer and manipulation, program control.   | T2:8-6,8-7                |
| 18          | <b>Describe</b> the design of the instruction set of the processor  | Reduced Instruction Set Computer   | T2:8-8                    |
| 19-20       | <b>Understand</b> the Micro-code generation for the control memory  | Micro Programmed Control:<br>Control memory, Address sequencing<br>micro-program example                           | T2:7-1,7-2,7-3            |
| 21          | <b>Understand</b> the Micro program sequencer to design the control unit  | Design of control Unit, Hardwired Control, Micro programmed control.   | T2:7-4                    |
| 22-23       | <b>Understand</b> the memory hierarchy and the function of RAM and ROM chips  | <b>The Memory System:</b><br>Basic Concept, Semiconductor RAM  | T1:5.1,5.2-5.3            |

|       |  |   |                         |
|-------|--|---|-------------------------|
|       | along with Connection between CPU and Memory   | memories, Read only Memories  |                         |
| 24-25 | <b>Describe</b> Cache memory and identify methods for specifying where memory blocks are placed in cache.                            | Cache memories Performance Considerations   | T1:5.5-5.6              |
| 26-27 | <b>Analyze</b> the concept of virtual memory that involves defining address space and memory space                                   | Virtual memories  | T1:5.7                  |
| 28    | <b>Learn</b> the concept of Secondary Storage.   | Secondary storage   | T1:5.9                  |
| 29    | <b>Knowledge</b> of RAID Architecture  | Introduction to RAID  | R1:6.2                  |
| 30    | <b>Identify</b> different ways of communicating with I/O devices and compare standard input-output interfaces                        | <b>Input-Output Organization:</b> Peripheral Devices, Input-Output Interface                                  | T2:11-1,11-2            |
| 31-32 | <b>Understand</b> the concept of Asynchronous Transfers and modes of transfer.<br>Knowledge of Interrupt Signals                     | Asynchronous Data Transfer Modes<br>Priority Interrupt  | T2:11-3,11-4<br>T2:11-5 |
| 33    | <b>Describe</b> Speed of transfer using Direct Memory Access technique.  | DMA   | T2:11-6                 |
| 34-35 | <b>Identify</b> Processor with Direct memory access capability and define Communication between CPU and IOP                          | Input-Output Processor(IOP)   | T2:11-7                 |
| 36-38 | <b>Illustrate</b> different Serial Communication Protocols   | Serial Communication, PCI, RS232,USB,IEEE1394   | T2:11-8                 |
| 39    | <b>Understand</b> the purpose of the operating system. Explain the objectives and functions of modern operating systems              | <b>Operating Systems Overview:</b> overview ,Functions  | T3:1.1-1.5              |
| 40    | <b>Describe</b> how operating systems have evolved over time from primitive batch systems to sophisticated multiuser systems.        | Protection and Security, Distributed Systems. Special purpose systems.  | T3:1.9-1.10<br>1.0-1.11 |
| 41    | <b>Describe</b> the functions of a contemporary operating system with respect to convenience, efficiency, and the ability to evolve. | <b>Operating systems structures:</b> Operating system services and Systems calls                              | T3:2.1-2.4              |
| 42    | <b>Understand</b> the concept of a logical layer, benefits of building abstract layers in hierarchical fashion.                      | System programs, Operating system structure, Operating systems generations                                    | T3:2.52.9               |
| 43-44 | <b>Describe</b> different Memory allocation techniques.  | <b>Memory Management:</b> Swapping, contiguous memory allocation.   | T3:8.1-8.3              |
| 45-48 | <b>Summarize</b> the principles of virtual memory as applied to caching and paging.  | Paging, structure of the page table, segmentation .virtual memory, demand paging, page-replacement algorithms | T3:8.4-8.6<br>9.1-9.4   |
| 49    | <b>Evaluate</b> the trade-offs in terms of memory size (main memory, cache memory, auxiliary memory) and processor speed.            | Allocation of frames, Thrashing, case study- UNIX.  | T3:9.5-9.6              |
| 50    | <b>Analyze</b> conditions that lead to deadlock.   | <b>Principles of Deadlock:</b> System model, deadlock characterization  | T3:7.1-7.2              |

|       |  |   |                              |
|-------|--|---|------------------------------|
|       | <b>Differentiate</b> between deadlock, starvation, and race conditions.  |   |                              |
| 51-54 | <b>Understand</b> the difference between preventing and avoiding deadlocks.  | Deadlock prevention , Detection and avoidance, Recovery from deadlock                   | T3:7.4-7.7                   |
| 55-56 | <b>Compare</b> and contrast different approaches to file organization, recognizing the strengths and weaknesses of each. | <b>File System Interface:</b><br>Concept of a file, Access Methods, Directory structure | T3:10.1-10.2                 |
| 57    | <b>Describe</b> different file Sharing methods   | File system mounting, File sharing , protection.  | T3:10.4-10.6                 |
| 58-59 | <b>Understand</b> different structures for File System.  | <b>File System implementation:</b> File system structure, file system implementation.   | T3:11.1-11.2                 |
| 60-62 | <b>Analyze</b> different Directory implementation techniques.  | directory implementation, allocation methods ,Free-space management                     | T3:11.3-11.4<br>T3:11.5-11.6 |

**X. Mapping course objectives leading to the achievement of the program outcomes:**

| Course Objectives | Program Outcomes |     |     |     |     |     |     |     |     |      |      |      |      |      |      |
|-------------------|------------------|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|------|
|                   | PO1              | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 | PSO3 |
| I                 | S                | S   | H   |     | S   |     |     |     |     |      |      |      | H    | S    |      |
| II                | S                | H   | S   | S   |     |     |     |     |     |      |      |      | H    | S    |      |
| III               |                  | H   | S   |     |     |     |     |     |     |      |      |      | S    | H    |      |
| IV                | S                | S   | S   | S   |     |     |     |     |     |      |      | S    | H    | S    |      |
| V                 | S                | S   |     | S   | S   |     |     |     |     |      |      |      | H    |      | S    |
| VI                | S                |     | S   |     |     |     |     |     |     |      |      |      | H    | S    | S    |

S= Supportive

H = Highly Related

**XI. Mapping course outcomes leading to the achievement of the program outcomes:**

| Course Outcomes | Program Outcomes |     |     |     |     |     |     |     |     |      |      |      |      |      |      |
|-----------------|------------------|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|------|
