

## OBJECT ORIENTED PROGRAMMINGS THROUGH PYTHON

<b>III Semester: CSE / IT</b>								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
AITB01	Core	L	T	P	C	CIA	SEE	Total
		3	0	0	3	30	70	100
<b>Contact Classes: 45</b>		<b>Tutorial Classes: Nil</b>		<b>Practical Classes: Nil</b>			<b>Total Classes: 60</b>	
<p><b>OBJECTIVES:</b>  <b>The students will try to learn:</b></p> <ol style="list-style-type: none"> <li>1. The Fundamental concepts of Object-oriented approach for solving real-time problems.</li> <li>2. The basic and advanced constructs of Python programming for developing object oriented concepts.</li> <li>3. The design concepts for developing user interface of real time applications.</li> </ol> <p><b>COURSE OUTCOMES:</b>  <b>After successful completion of the course, students will be able to:</b></p> <ol style="list-style-type: none"> <li>1. Recall the basic programming constructs in implementing in Python.(Remember)</li> <li>2. Identify classes, objects, members of a class and relationship among them for real world entities.(Apply)</li> <li>3. Summarize the object-oriented concepts such as Abstraction, Encapsulation, Inheritance and Polymorphism in real time context.(Understand)</li> <li>4. Demonstrate abstraction feature with the help of python class properties.(Understand)</li> <li>5. Make use of polymorphism and inheritance concepts for achieving code reusability.(Apply)</li> <li>6. Apply inbuilt strings for creating, performing basic operations and testing on text data.(Apply)</li> <li>7. Develop user-defined functions for better modularity and a high degree of code reusability.(Apply)</li> <li>8. Explain parameter-passing techniques while invoking recursive and non-recursive functions for solving problems.(Understand)</li> <li>9. Make use of Python exception mechanisms for handling errors and abnormal termination of program.(Analyze)</li> <li>10. Develop user-defined exceptions for handling un-interrupted execution of specific programs.(Apply)</li> <li>11. Demonstrate Python GUI tool kit for designing static user interfaces.(Understand)</li> <li>12. Make use of widgets, containers and frames for creating user interface of web application.(Apply)</li> </ol>								
<b>MODULE-I</b>		<b>INTRODUCTION TO PYTHON AND OBJECT ORIENTED CONCEPTS</b>						
Introduction to Python: Features of Python, Data types, Operators, Input and output, Control Statements.								
Introduction to Object Oriented Concepts: Features of Object oriented programming system (OOPS) – Classes and Objects, Encapsulation, Abstraction, Inheritance, Polymorphism.								
<b>MODULE-II</b>		<b>PYTHON CLASSES AND OBJECTS</b>						
Classes and Objects: Creating a class, The Self variable, Constructor, Types of Variable, Namespaces, Types of Methods, Inheritance and Polymorphism – Constructors in inheritance, the super() method, types of inheritance, polymorphism, abstract classes and interfaces.								

<b>MODULE-III</b>	<b>STRINGS AND FUNCTIONS</b>
<p>Strings: Creating strings and basic operations on strings, string testing methods.</p> <p>Functions: Defining a function, Calling a function, returning multiple values from a function, functions are first class objects, formal and actual arguments, positional arguments, recursive functions.</p>	
<b>MODULE-IV</b>	<b>EXCEPTION HANDLING</b>
<p>Exception: Errors in a Python program, exceptions, exception handling, types of exceptions, the except block, the assert statement, user-defined exceptions.</p>	
<b>MODULE-V</b>	<b>GRAPHICAL USER INTERFACE</b>
<p>GUI in Python: The root window, fonts and colors, working with containers, Canvas, Frames, Widgets – Button widget, Label widget, message widget, text widget, radio button widget, entry widget.</p>	
<b>Text Books:</b>	
<ol style="list-style-type: none"> <li>1. R Nageswara Rao, “Core Python Programming”, Dreamtech press, 2017 Edition.</li> <li>2. Dusty Philips, “Python 3 Object Oriented Programming”, PACKT Publishing, 2<sup>nd</sup> Edition, 2015.</li> </ol>	
<b>Reference Books:</b>	
<ol style="list-style-type: none"> <li>1. Michael H.Goldwasser, David Letscher, “Object Oriented Programming in Python”, Prentice Hall, 1<sup>st</sup> Edition, 2007.</li> </ol>
