POWER QUALITY								
II Semester: EPS								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
BPSD20	Elective	L	Т	Р	С	CIA	SEE	Total
		3	0	0	3	40	60	100
Contact Classes:48	Tutorial Classes: Nil	Practical Classes: Nil				Total Classes: 48		
Prerequisite: Electrical Distribution system								

I. COURSE OVERVIEW:

This course deals with the basic concepts power quality problems, mitigation techniques used to improve power quality in distribution system. This course is designed to construct study of characterization of voltage sag magnitude and three phase unbalanced voltage sag. This course also concludes with the behavior of power electronics loads, induction motors and synchronous motors.

I. COURSES OBJECTIVES:

The students will try to learn:

- I. Power quality issues in distribution and transmission system.
- II. The characterization of voltage unbalance in three phase system.
- III. The power quality improvement in different load conditions.

II. COURSE OUTCOMES:

After successful completion of the course students should be able to:

- CO1 Identify the Power Quality problem by applying the techniques to mitigate them.
- CO2 Analyze the methodology to improve the power quality for sensitive loads by various custom power devices.
- CO3 Analyze the difference between failure, outage and Interruptions for reliability evaluation to power quality
- CO4 Analyze the voltage sag and swell based power quality problem in Single phase and three phase system for reenergization of large load.
- CO5 Identify the Power Quality problems in Industry power systems for harmonic distortions in the nonlinear loads.
- CO6 Evaluate power quality monitoring and classification mitigating techniques for the quality of voltage and current produced by a power plant.

IV. COURSE CONTENT:

MODULE - I: INTRODUCTION (10)

Introduction of the power quality (PQ): Problem, terms used in PQ voltage, sag, swell, surges, harmonics, over voltages, spikes, voltage fluctuations, transients, interruption, overview of power quality phenomenon, remedies to improve power quality, power quality monitoring.

MODULE-II: LONG AND SHORT INTERRUPTIONS (10)

Interruptions: Definition, difference between failures, outage, interruptions, causes of long interruptions, origin of interruptions, limits for the interruption frequency, limits for the interruption duration, costs of interruption, overview of reliability evaluation to power quality, comparison of observations and reliability evaluation; Short Interruptions: Definition, origin of short interruptions, basic principle, fuse saving, voltage magnitude events due to re-closing, voltage during the interruption, monitoring of short interruptions, difference between medium and low voltage systems, multiple events, single phase tripping, voltage and current during fault period, voltage and current at post fault period, stochastic prediction of short interruptions.

MODULE -III: SINGLE AND THREE-PHASE VOLTAGE SAG CHARACTERIZATION (10)

Voltage sag: Definition, causes of voltage sag, voltage sag magnitude, and monitoring, theoretical calculation of voltage sag magnitude, voltage sag calculation in non-radial systems, meshed systems, and voltage sag duration.

Three phase faults: Phase angle jumps, magnitude and phase angle jumps for three phase unbalanced sags, load influence on voltage sags.

MODULE -- IV: POWER QUALITY CONSIDERATIONS IN INDUSTRIAL POWER (08)

Voltage sag; Equipment behavior of power electronic loads, induction motors, synchronous motors, computers, consumer electronics, adjustable speed AC drives and its operation, mitigation of ac drives, adjustable speed dc drives and its operation, mitigation methods of dc drives.

MODULE -V: MITIGATION OF INTERRUPTIONS AND VOLTAGE SAG (10)

Overview of mitigation methods: From fault to trip, reducing the number of faults, reducing the fault clearing time changing the power system, installing mitigation equipment, improving equipment immunity, different events and mitigation methods; System equipment interface: Voltage source converter, series voltage controller, shunt controller, combined shunt and series controller.

V. TEXTBOOKS:

- 1. Math H J Bollen, "Understanding Power Quality Problems", IEEE Press, 1st edition, 2007.
- 2. Sastry Vedam Mulukutla Sarma "Power Quality VAR Compensation in Power Systems", R,CRC Press, 1st edition, 2004.

VI. REFERENCE BOOKS:

- 1. G T Heydt, "Electric Power Quality", (West Lafayette, IN, Stars in a circle Publications,1st edition, 1994.
- 2. R Sastry Vedam Mulukutla S Sarma, "Power Quality VAR Compensation in Power Systems", CRC Press,1st edition, 2000.
- 3. A Ghosh, G Ledwich, "Power Quality Enhancement Using Custom Power Devices", Kluwer Academic,1st edition, 2002.

VII. ELECTRONICS RESOURCES:

- 1. https://www.researchgate.net
- 2. https://www.aar.faculty.asu.edu/classes
- 3. https://www.facstaff.bucknell.edu/
- 4. https://www.electrical4u.com

VIII. MATERIALS ONLINE

- 1. Course template
- 2. Tutorial question bank
- 3. Definition and terminology
- 4. Assignments

- Model question paper-I
 Model question paper-II
 Lecture notes
 Early learning readiness videos (ELRV)
 Power point presentations
