CIVIL ENGINEERING

ATTAINMENT OF COURSE OUTCOME – ACTION TAKEN REPORT

Name of the faculty:	Mr. M. Madhu Sudhan Reddy	Department:	CE
Regulation:	IARE - R16	Batch:	2016 - 2020
Course Name:	Geotechnical Engineering Laboratory	Course Code:	ACE105
Semester:	IV	Target Value:	60% (1.8)

Attainment of COs:

Course Outcome		Overall attainment	Observation
CO1	Understand the behaviour of soil with respect to water content (moisture content) for characterizing the permeability, compressibility and shear strength of soil.	3.00	Attainment target reached
CO2	Classify the soils according to their grain size for determining the coefficient of uniformity and coefficient curvature upon to classify the soil according to IS code.	3.00	Attainment target reached
CO3	Select the appropriate method to estimate the permeability of the layered soil for assessing drainage characteristics of soil, rate of consolidation and to predict rate of settlement of soil bed.	3.00	Attainment target reached
CO4	Establish the maximum dry density through compaction and consolidation, to increase the bearing capacity and stiffness of in-situ soil medium.	3.00	Attainment target reached
CO5	Recall the importance of compressibility of the soil medium for taking necessary action to prevent the settlement of soil and foundation failures.	3.00	Attainment target reached
CO6	Evaluate the strength of soil sub-grades and base course materials and enable appropriate selection of suitable pavement thickness for the anticipated traffic density.	3.00	Attainment target reached
