INSTITUTE OF AERONAUTICAL ENGINEERING
(Autonomous)
Dundigal, Hyderabad - 500 043
COURSE DESCRIPTION

Branch	**ELECTRONICS AND COMMUNICATION ENGINEERING**				
Course Title	**EMBEDDED SYSTEM DESIGN AND ARCHITECTURE**				
Course Code	BESC01				
Program	M.Tech(EMBEDDED SYSTEMS)				
Semester	I				
Course Type	Professional Core				
Regulation	PG-21				
Course Structure	Theory			Practical	
	Lecture	Tutorials	Credits	Laboratory	Credits
	3	-	3	-	-
Course Coordinator	Dr. S China Venkateswarlu, Associate Professor, ECE				

I COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
M.Tech	-	-	Embedded System Design

II COURSE OVERVIEW:

This course is allows the students to learn the fundamentals of embedded system hardware and firmware design. It focuses on basics of embedded systems, embedded firmware design approaches, development languages and system design. The knowledge acquired from this course will enable the students to implement embedded hardware projects and models for engineering and scientific applications.

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Embedded System Architecture	70 Marks	30 Marks	100

IV DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	PPT	x	Chalk & Talk	✓	Assignments	x	MOOC
✓	Seminars	✓	Others				

V EVALUATION METHODOLOGY:

Each theory course will be evaluated for a total of 100 marks, out of which 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). **Semester End Examination (SEE):** The SEE is conducted for 70 marks of 3 hours duration. The syllabus for the theory courses is divided into FIVE modules and each module carries equal weightage in terms of marks distribution. The question paper pattern is as follows. Two full questions with "either" or "choice" will be drawn from each module. Each question carries 14 marks. There could be a maximum of three sub divisions in a question.

The emphasis on the questions is broadly based on the following criteria:

50 %	To test the objectiveness of the concept
30 %	To test the analytical skill of the concept
20 %	To test the application skill of the concept

Continuous Internal Assessment (CIA):
For each theory course the CIA shall be conducted by the faculty / teacher handling the course. CIA is conducted for a total of 30 marks, with 20 marks for Continuous Internal Examination (CIE), 05 marks for Assignment and 05 marks for Alternative Assessment Tool (AAT). Two CIE Tests are Compulsory and sum of the two tests, along with the scores obtained in the assignment / AAT shall be considered for computing the final CIA of a student in a given course.

The CIE Tests/Assignment /AAT shall be conducted by the course faculty with due approval from the HOD. Advance notification for the conduction of Assignment/AAT is mandatory and the responsibility lies with the concerned course faculty. CIA is conducted for a total of 30 marks (Table 1), with 25 marks for Continuous Internal Examination (CIE), 05 marks for Quiz/ Alternative Assessment Tool (AAT).

Component	Theory			Total Marks
Type of Assessment	CIE Exam	Assignment	AAT	
CIA Marks	20	05	05	30

Continuous Internal Examination (CIE):
Two CIE exams shall be conducted at the end of the 8th and 16th week of the semester respectively. The CIE exam is conducted for 25 marks of 2 hours duration consisting of five descriptive type questions out of which four questions have to be answered where, each question carries 5 marks. Marks are awarded by taking average of marks scored in two CIE exams.

Assignment:
To improve the writing skills in the course an assignment will be evaluated for 05 marks. One assignment has to submit at the end of the CIE2 for the questions provided by the each course coordinator in that semester. Assignments to be handed in as loose paper collection stapled together at the top left corner. The assignment should be presented as a professional report.It must consist of a cover sheet,content page, and should have an introduction, a body, a conclusion or recommendation, and a reference page.

Quiz/Alternative Assessment Tool (AAT):
Two Quiz exams shall be online examination consisting of 25 multiple choice questions and are be answered by choosing the correct answer from a given set of choices (commonly four). Marks shall be awarded considering the average of two quizzes for every course. The AAT may include seminars, assignments, term paper, open ended experiments, five minutes video and MOOCs.

VI COURSE OBJECTIVES:

The students will try to learn:

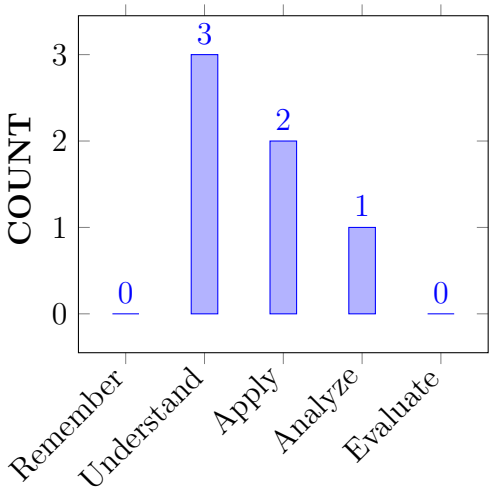
I	Understanding of fundamental embedded systems design paradigms, architectures.
II	Interpret possibilities and challenges, both with respect to software and hardware.
III	Analyze a system both as whole and in the included parts, to understand how these parts interact in the functionality and properties of the system.

VII COURSE OUTCOMES:

After successful completion of the course, students should be able to:

CO 1	**Classify** the major application areas of embedded systems and its basic concepts using their architectures.	Understand
CO 2	**Identify** suitable memory technology for different applications to meet the ever growing needs of the embedded applications.	Apply
CO 3	**Categorize** various Instruction Set Architecture (ISA) models can be used for programming embedded devices.	Analyze
CO 4	**Illustrate** an appropriate middleware software used to interface between the hardware and the software.	Understand
CO 5	**Summarize** the fundamental components that make up an embedded board to implement an Instruction Set Architecture's features in a processor.	Understand
CO 6	**Make use of** the memory hierarchy to minimize the access time in embedded architecture design.	Apply

COURSE KNOWLEDGE COMPETENCY LEVEL



BLOOMS TAXONOMY

VIII PROGRAM OUTCOMES:

Program Outcomes	
PO 1	Independently carry out research / investigation and development work to solve practical problems.
PO 2	Write and present a substantial technical report / document.
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program.
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skillful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team.
PO 6	Recognize the need to engage in life long learning through continuing education and research.

IX HOW PROGRAM OUTCOMES ARE ASSESSED:

PROGRAM OUTCOMES		Strength	Proficiency Assessed by
PO 1	Independently carry out research / investigation and development work to solve practical problems.	1	SEE/CIE/AAT
PO 3	Demonstrate the importance of embedded technologies and design innovative products for solving society relevant problems.	3	SEE/CIE/AAT
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skillful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.	2	SEE/CIE/AAT
PO 6	Recognize the need to engage in life long learning through continuing education and research.	1	SEE/CIE/AAT

3 = High; 2 = Medium; 1 = Low

X MAPPING OF EACH CO WITH PO(s):

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6

XI JUSTIFICATIONS FOR CO – PO/ PSO MAPPING -DIRECT:

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
CO1	PO 3	Demonstrate the importance of embedded technologies and design new innovative products for solving society relevant problems for applying **knowledge, understanding and demonstrations of embedded applications in real time scenario** and **use creativity to establish innovative solutions** to get the **solution development** and **communicate effectively in writing / orally societal problems**.	4
	PO 4	Apply the concepts (knowledge) of embedded systems using their architectures by using **Scientific principles and methodology** and **problem formulation and abstraction** for **understand the need of users with the importance of considerations such as IoT and Robotics** and **use creativity to establish the solutions** and make the **experimental design**.	5

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
CO2	PO 3	Demonstrate the importance of embedded technologies and design new innovative products for solving society relevant problems for applying **knowledge, understanding and demonstrations of embedded applications in real time scenario** and **use creativity to establish innovative solutions** and make the **experimental design** with **manage the design process and evaluate outcomes using modern tools** to get **the solution development** and **communicate effectively in writing / orally societal problems**.	6
	PO 4	Apply the concepts (knowledge) of embedded systems using their architectures by using **Scientific principles and methodology** and **problem formulation and abstraction** for **understand the need of users with the importance of considerations such as IoT and Robotics** and **use creativity to establish the solutions** and make the **experimental design**.	5
CO3	PO 3	Demonstrate the importance of embedded technologies and design new innovative products for solving society relevant problems for applying **knowledge, understanding and demonstrations of embedded applications in real time scenario** and **use creativity to establish innovative solutions** and **manage the design process and evaluate outcomes using modern tools** to get **the solution development** and **communicate effectively in writing / orally societal problems**. **science** and **engineering fundamentals**.	5
	PO 4	Apply the concepts (knowledge) of embedded systems using their architectures by using **Scientific principles and methodology** and **problem formulation and abstraction** for **understand the need of users with the importance of considerations such as IoT and Robotics** and **use creativity to establish the solutions** and make the **experimental design**.	5
CO4	PO 1	Independently carry out research / investigation and development work to solve practical problems.**strengthen in embedded and advanced engineering areas**.	1

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
	PO 3	Demonstrate the importance of embedded technologies and design new innovative products for solving society relevant problems for applying **knowledge, understanding and demonstrations of embedded applications in real time scenario** and **use creativity to establish innovative solutions** and **manage the design process and evaluate outcomes using modern tools** to get **the solution development** and **communicate effectively in writing / orally societal problems**. **science** and **engineering fundamentals**.	5
	PO 4	Apply the concepts (knowledge) of embedded systems using their architectures by using **Scientific principles and methodology** and **problem formulation and abstraction** for **understand the need of users with the importance of considerations such as IoT and Robotics** and **use creativity to establish the solutions** and make the **experimental design**.	5
	PO 6	Recognize the need to engage in lifelong learning through continuing education and research for **strengthen in embedded and advanced engineering areas**.	1
CO5	PO 1	Independently carry out research / investigation and development work to solve practical problems.**strengthen in embedded and advanced engineering areas**.	1
	PO 3	Demonstrate the importance of embedded technologies and design new innovative products for solving society relevant problems for applying **knowledge, understanding and demonstrations of embedded applications in real time scenario** and **use creativity to establish innovative solutions** and make the **experimental design** with **manage the design process and evaluate outcomes using modern tools** to get **the solution development** and **communicate effectively in writing / orally societal problems**.	6

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
	PO 4	Apply the concepts (knowledge) of embedded systems using their architectures by using **Scientific principles and methodology** and **problem formulation and abstraction** for **understand the need of users with the importance of considerations such as IoT and Robotics** and **use creativity to establish the solutions** and make the **experimental design**.	5
	PO 6	Recognize the need to engage in lifelong learning through continuing education and research for **strengthen in embedded and advanced engineering areas**.	1
CO6	PO 1	Independently carry out research / investigation and development work to solve practical problems.**strengthen in embedded and advanced engineering areas**.	1
	PO 3	Demonstrate the importance of embedded technologies and design new innovative products for solving society relevant problems for applying **knowledge, understanding and demonstrations of embedded applications in real time scenario** and **use creativity to establish innovative solutions** and make the **experimental design** with **manage the design process and evaluate outcomes using modern tools** to get **the solution development** and **communicate effectively in writing / orally societal problems**.	6
	PO 4	Apply the concepts (knowledge) of embedded systems using their architectures by using **Scientific principles and methodology** and **problem formulation and abstraction** for **understand the need of users with the importance of considerations such as IoT and Robotics** and **use creativity to establish the solutions** and make the **experimental design**.	5
	PO 6	Recognize the need to engage in lifelong learning through continuing education and research for **strengthen in embedded and advanced engineering areas**.	1

XII TOTAL COUNT OF KEY COMPETENCIES FOR CO – PO/ PSO MAPPING:

CO'S and PO'S and CO'S and PSO'S on the scale of 0 to 3, 0 being no correlation, 1 being the low correlation, 2 being medium correlation and 3 being high correlation.

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
	6	6	9	10	7	8
CO 1	-	-	4	5	-	-

Laboratory Practices	-	Student Viva	-	Mini Project	-

XVI ASSESSMENT METHODOLOGY INDIRECT:

✓	**End Semester OBE Feed Back**

XVII SYLLABUS:

MODULE I	**INTRODUCTION TO EMBEDDED SYSTEMS**
	Definition of Embedded System, Embedded Systems Vs General Computing Systems, History of Embedded Systems, Classification, Major Application Areas, Purpose of Embedded Systems, Characteristics and Quality Attributes of Embedded Systems. Core of the Embedded System: ASICs, PLDs, Commercial Off-The-Shelf Components (COTS).
MODULE II	**EMBEDDED FIRMWARE**
	Reset Circuit, Brown-out Protection Circuit, Oscillator Unit. Memory: ROM, RAM, Memory according to the type of Interface, Memory Shadowing, Sensors and Actuators, Communication Interface. Embedded Firmware Design Approaches and Development Languages. Introduction, object oriented programming with C, the project header (main.h), the port header (port.h).
MODULE III	**PROCESSOR HARDWARE**
	Embedded system model, Embedded board using Von Neuman model; EMBEDDED processors: ISA architecture models-application specific ISA models and general purpose ISA models. Internal processor design: ALU, registers, control unit, clock, on chip memory, processor i/o, interrupts, processor buses, processor performance.
MODULE IV	**SOFTWARE**
	Board memory: ROM, RAM, cache, auxiliary memory, memory management, memory performance. Middleware and applications: PPP, IP middleware UDP, Java. Application layer: FTP client, SMTP, HTTP server and client.

MODULE V	SYSTEM DESIGN
	Design and development: architectural patterns and reference models: Creating the architectural structures-documenting the architecture-analyzing and evaluating the architecture-debugging testing, and maintaining

ANNEXURE - I

KEY ATTRIBUTES FOR ASSESSING PROGRAM OUTCOMES

PO Number	NBA Statement / Key Competencies Features (KCF)	No. of KCF's
PO 1	Independently carry out research / investigation and development work to solve practical problems. 1. Independence 2. Self driven 3. Quality of work 4. Problem identification and implementation 5. Demonstrate the solutions 6. Budget	6
PO 2	Write and present a substantial technical report / document. 1. Demonstrate and communicate effectively in writing report and document/ present orally. 2. Clarity (writing/ presentation) 3. Grammar/ punctuation (writing) 4. References 5. Speaking/ Presenting 6. Subject knowledge while preparing report	6
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program. 1. Knowledge, understanding and demonstrations of embedded applications in real time scenario. 2. Ability to demonstrate and communicate effectively in writing / orally societal problems. 3. Analyze and design innovative products 4. Problem formulation and abstraction 5. Use creativity to establish innovative solutions 6. Experimental design 7. Manage the design process and evaluate outcomes using modern tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation	9

PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications. 1. Understand the need of users with the importance of considerations such as IoT and Robotics 2. Scientific principles and methodology 3. Problem formulation and abstraction 4. Use creativity to establish innovative solutions 5. Experimental design 6. Manage the design process and evaluate outcomes 7. Computer software / simulation packages / diagnostic equipment / technical library resources / literature search tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation 10. Under take research and development projects in the field of Embedded Systems	10
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team. 1. Maturity – requiring only the achievement of goals to drive their performance 2. Self-direction (take a vaguely defined problem and systematically work to resolution) 3. Individual performance is used during the classroom periods, in the hands-on labs, and in the design projects. 4. Knowledge of management techniques which may be used achieve engineering objectives 5. Meeting deadlines and producing solutions 6. Work with all level of people in the team. 7. Demonstrate ability to work well with a team	7
PO 6	Recognize the need to engage in lifelong learning through continuing education and research. 1. Project management and research orientation/ Ph.D 2. Strengthen in embedded and advanced engineering areas 3. Continuing education efforts through literature and courses 4. Personal development 5. Plan tasks and resources, manage risk and produce deliverables 6. Meeting deadlines and producing solutions 7. Work with all levels of people in team 8. Demonstrated ability to work well with a team	8

INSTITUTE OF AERONAUTICAL ENGINEERING
(Autonomous)
Dundigal, Hyderabad - 500 043

COURSE DESCRIPTION

Department	**Electronics and Communication Engineering**				
Course Title	**Microcontrollers and Programmable Digital Signal Processing**				
Course Code	BESC02				
Program	M.Tech				
Semester	I				
Course Type	Core				
Regulation	PG21				
Course Structure	Theory			Practical	
	Lecture	Tutorials	Credits	Laboratory	Credits
	3	-	3	-	-
Course Coordinator	Dr. G Mary Swarna Latha, Assistant Professor				

I COURSE OVERVIEW:

This course is intended to provide fundamentals of ARM Cortex-M3 Processor and LPC 17XX Microcontroller architectures and their features. It includes the architectures of the Cortex-M3, instruction set summary, Programmable DSP processor. It is used in the applications of microcontrollers programming models and programmable digital signal processors.

II COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
B.Tech	-	-	Digital Signal Processing
B.Tech	-	-	Microprocessors and Microcontrollers

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Microcontrollers and Programmable Digital Signal Processing	70 Marks	30 Marks	100

IV DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Power Point Presentations	✓	Chalk & Talk	✓	Assignments	x	MOOC
x	Open Ended Experiments	✓	Seminars	x	Mini Project	x	Videos
x	Others						

V EVALUATION METHODOLOGY:

The course will be evaluated for a total of 100 marks, with 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). Out of 30 marks allotted for CIA during the semester, marks are awarded by taking average of two CIA examinations or the marks scored in the make-up examination.

Semester End Examination (SEE): The SEE shall be conducted for 70 marks of 3 hours duration. The syllabus for the theory courses shall be divided into FIVE units and each unit carries equal weightage in terms of marks distribution. The question paper pattern shall be as defined below. Two full questions with 'either' 'or' choice will be drawn from each unit. Each question carries 14 marks. There could be a maximum of three sub divisions in a question.
The emphasis on the questions is broadly based on the following criteria:

50%	To test the objectiveness of the concept
30%	To test the analytical skill of the concept
20%	To test the application skill of the concept

Continuous Internal Assessment (CIA):
For each theory course the CIA shall be conducted by the faculty / teacher handling the course. CIA is conducted for a total of 30 marks, with 20 marks for Continuous Internal Examination (CIE), 05 marks for Assignment and 05 marks for Alternative Assessment Tool (AAT). **Two CIE Tests are Compulsory** and sum of the two tests, along with the scores obtained in the assignment / AAT shall be considered for computing the final CIA of a student in a given course.

Component	**Theory**			**Total Marks**
Type of Assessment	**CIE Exam**	**Assignment**	**AAT**	
CIA Marks	20	05	05	30

Continuous Internal Examination (CIE):
Two CIE exams shall be conducted at the end of the 9^{th} and 17^{th} th week of the semester respectively for 10 marks each of 2 hours duration consisting of five descriptive type questions out of which four questions have to be answered. The valuation and verification of answer scripts of CIE exams shall be completed within a week after the conduct of the Examination.

Assignment:
To improve the writing skills in the course an assignment will be evaluated for 05 marks. One assignment has to submit at the end of the CIE2 for the questions provided by the each course coordinator in that semester. Assignments to be handed in as loose paper collection stapled together at the top left corner. The assignment should be presented as a professional report. It must consist of a cover sheet, content page, and should have an introduction, a body, a conclusion or recommendation, and a reference page.

Alternative Assessment Tool (AAT):
In order to encourage innovative methods while delivering a course, the faculty members are encouraged to use the Alternative Assessment Tool (AAT). This AAT enables faculty to design own assessment patterns during the CIA. The AAT enhances the autonomy (freedom and flexibility) of individual faculty and enables them to create innovative pedagogical practices. If properly applied, the AAT converts the classroom into an effective learning center.**The AAT may includes, concept videos, course related term paper, technical seminar, term**

paper, paper presentations conducted by reputed organizations relevant to the course etc.

VI COURSE OBJECTIVES:

The students will try to learn:

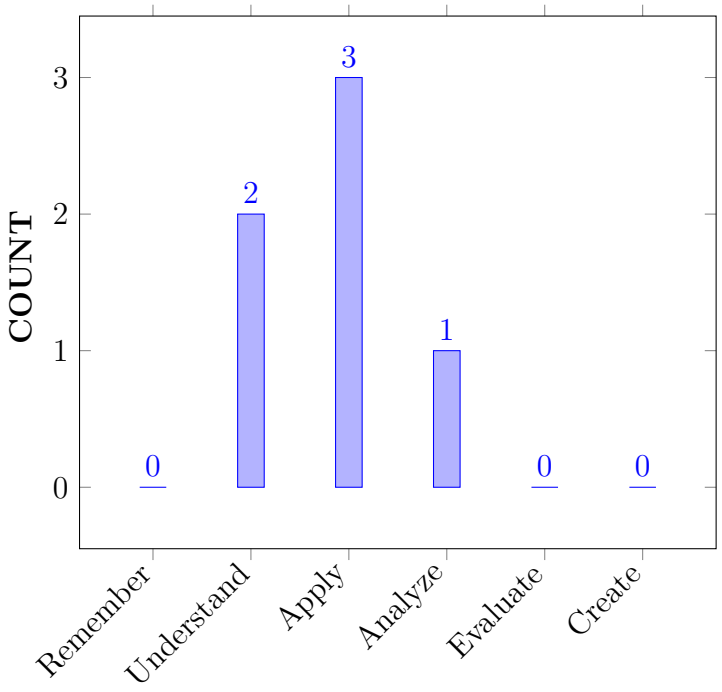
I	The programming models of ARM processors core-based System on Chip with several features / peripherals based on requirements of embedded applications.
II	The architectural view of various Programmable DSP Processors..
III	The design and development of embedded applications by utilizing the ARM processor core and DSP processor-based platform.

VII COURSE OUTCOMES:

After successful completion of the course, students should be able to:

CO 1	**Illustrate** the Internal architecture and memory operations of ARM Cortex M3 processor for interfacing microprocessor applications	Understand
CO 2	**Analyze** Exceptions handler mechanism to minimize interrupt latency using Nested Vectored Interrupt Controller	Analyze
CO 3	**Construct** the high level of integration in embedded applications using LPC 17XX Microcontroller	Apply
CO 4	**Demonstrate** various computational building blocks of programmable DSP architectures using interfacing of memory and I/O peripherals	Understand
CO 5	**Identify** the CPU architecture, peripherals, and development tools for the TMS320C6000 digital signal processors	Apply
CO 6	**Develop** the application for digital signal processing using code composer studio tool	Apply

COURSE KNOWLEDGE COMPETENCY LEVEL



BLOOMS TAXONOMY

VIII PROGRAM OUTCOMES:

Program Outcomes	
PO 1	Independently carry out research / investigation and development work to solve practical problems.
PO 2	Write and present a substantial technical report / document
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team.
PO 6	Recognize the need to engage in lifelong learning through continuing education and research.

IX HOW PROGRAM OUTCOMES ARE ASSESSED:

PROGRAM OUTCOMES		Strength	Proficiency Assessed by

XVII SYLLABUS:

MODULE I	**ARM CORTEX-M3 PROCESSOR**
	ARM Cortex-M3 processor: Applications, Programming model – Registers, Operation modes, Exceptions and Interrupts, Reset Sequence Instruction Set, Unified Assembler Language, Memory Maps, Memory AccessAttributes,Permissions,Bit-Band Operations, Unaligned and ExclusiveTransfers, Pipeline, Bus Interfaces
MODULE II	**EXCEPTIONS AND INTERRUPT**
	Exceptions, Types, Priority, Vector Tables, Interrupt Inputs and Pending behavior, Fault Exceptions, Supervisor and Pendable Service Call, Nested Vectored Interrupt Controller, Basic Configuration, SYSTICK Timer, Interrupt Sequences, Exits, Tail Chaining, Interrupt Latency
MODULE III	**LPC 17XX MICROCONTROLLER**
	LPC 17xx microcontroller- Internal memory, GPIOs, Timers, ADC. UART and other serial interfaces, PWM, RTC, WDT.
MODULE IV	**PROGRAMMABLE DSP (P-DSP) PROCESSORS**

	Programmable DSP (P-DSP) Processors: Harvard architecture, Multiport memory, architectural structure of PDSP- MAC unit, Barrel shifters, Introduction to TI DSP processor family.
MODULE V	**VLIW ARCHITECTURE**
	VLIW architecture and TMS320C6000 series, architecture study, data paths, cross paths, Introduction to Instruction level architecture of C6000 family, Assembly Instructions memory addressing, for arithmetic, logical operations code composer Studio for application development for digital signal processing, on chip peripherals, processor benchmarking.

1	Course Description on Outcome Based Education (OBE): Course Objectives, Course Outcomes (CO), Program Outcomes (PO) and CO - PO Mapping	-	https://lms.iare.ac.in/index?route=course/details&course_id=354
CONTENT DELIVERY (THEORY)			
2	Understanding the ARM Cortex-M3 processor: Applications, Programming model.	CO 1	T1: 1.1-1.5
3	Registers Operation modes	CO 1	T1: 3.2-3.5
4	Exceptions and Interrupt, Reset Sequence	CO 1	T1: 3.5-3.7
5	Study the Instruction Set	CO 1	T1: 4.1-4.2

6	Unified Assembler Language	CO 1	T1: 4.2-4.3
7	Memory Maps	CO 1	T1: 4.3-4.4
8	Memory Access Attributes	CO 1	T1:5.1-5.2
9	Permissions, Bit-Band Operations	CO 1	T1:5.2,5.5
10	Discuss the unaligned and exclusive transfers.	CO 1	T1: 6.1-6.2
11	Pipeline, Bus Interfaces.	CO 1	T1: 6.1-6.2
12	Examine the various Exceptions, Types	CO 2	T1: 7.1-7.2
13	Priority, Vector Tables	CO 2	T1: 7.1-7.2
14	Interrupt Inputs and Pending behavior,	CO 2	T1: 7.4-7.5
15	Fault Exceptions	CO 2	T1: 7.4-7.5
16	Discuss the Supervisor and Pendable Service Call,	CO 2	T2: 7.6-8.1
17	Nested Vectored Interrupt Controller.	CO 2	T2: 7.6-8.1
18	Understand the Basic Configuration, SYSTICK Timer	CO 2	T1: 8.2-8.5
19	Interrupt Sequences, Exits	CO 2	T1:9.1-9.2
20	Tail Chaining, Interrupt Latency.	CO 2	T1: 9.1-9.2
21	Describe the LPC 17xx microcontroller- Internal memory,	CO 3	R2:8.4,8.10
22	General purpose input and output(GPIOs)	CO 3	R2:8.4- 10
23	Working of Timers	CO 3	R2:8.4
24	Study the features of ADC,	CO 3	R2: 8.14-8.16
25	Universal asynchronous receiving and transmission(UART)	CO 3	R2: 8.14-8.16
26	Other serial interfaces	CO 3	R2: 8.16,8.17
27	Understand the concepts of PWM,	CO 3	R2:8.22
28	Real time clock	CO 3	R2:8. 27
29	Watch dog timers	CO 3	R2:8. 28
30	Describe the Programmable DSP (P-DSP) Processors	CO 4	T2: 2.1-2.2
31	Harvard architecture model	CO 4	T2:2.2-2.4
32	Multi port memory organization	CO 4	T2: 2.1-2.4
33	Study the features of architectural structure of P-DSP- MAC unit	CO 4	T2:3.1-2.1
34	Barrel shifters with examples	CO 4	T2: 2.5
35	Understand the Introduction to TI DSP processor family.	CO 4	T2: 2.5
36	Study the VLIW architecture	CO 4	T2: 2.5,13.4
37	TMS320C6000 series architecture study,	CO 4	T2: 2.5,13.4
38	TMS320C6000 family architecture study,	CO 5	T2: 2.5-2.6
39	Understand data paths	CO 5	T2: 13.3
40	Crosses paths interfacing	CO 5	T2:13.6-13.5

41	Introduction to Instruction level architecture of C6000 family.	CO 5	T2: 13.3-13.4
42	Assembly Instructions memory addressing	CO 6	T2: 13.5
43	Arithmetic, logical operations.	CO 6	T2:13.6
44	Code Composer Studio for application development for DSP	CO 6	T2:13.11-12
45	Understand on chip peripherals.	CO 6	T2:13.11-12
46	Processor benchmarking	CO 6	T2:13.12-14
PROBLEM SOLVING/ CASE STUDIES			
47	Problems on registers, operation modes	CO 1	T1: 1.1-1.5
48	Problems on memory maps, memory access attributes	CO 1	T1: 3.2-3.5
49	Problems on priority, vector tables	CO 2	T1: 7.1-7.2
50	Problems on interrupt sequences, interrupt latency.	CO 2	T1: 7.1-7.2
51	Problems on LPC 17xx microcontroller- internal memory	CO 3	R2:8.4,8.10
52	Problems on , PWM, RTC	CO 3	R2:8.4 - 10
53	Problems on barrel shifters	CO 4	T2: 2.1-2.4
54	Problems on data paths, cross paths	CO 5	T2: 2.5-2.6
55	Problems on arithmetic, logical operations	CO 6	T2:13.11-12
DISCUSSION ON DEFINITION AND TERMINOLOGY			
56	Systems ARM cortex-m3 processor	CO 1	T1: 1.1-1.5
57	Exceptions and interrupts	CO 2	T1: 7.1-7.2
58	LPC 17xx microcontroller	CO 3	R2:8.4-10
59	Programmable DSP processors	CO 4	T2: 2.1-2.4
60	VLIW architecture	CO 5	T2: 2.5-2.6
DISCUSSION ON QUESTION BANK			
61	Systems ARM cortex-m3 processor	CO 1	T1: 1.1-1.5
62	Exceptions and interrupts	CO 2	T1: 7.1-7.2
63	LPC 17xx microcontroller	CO 3	R2:8.4-10

ELECTRONICS AND COMMUNICATIONENGINEERING
COURSE DESCRIPTION

Course Title	**WIRELESS LANS AND PANS**				
Course Code	BESC06				
Program	M.Tech				
Semester	I	ES			
Course Type	CORE				
Regulation	PG-21				
Course Structure	Theory			Practical	
	Lecture	Tutorials	Credits	Laboratory	Credits
	3	-	3	-	-
Course Coordinator	Dr. V Padmanabha Reddy, Professor				

I COURSE OVERVIEW:

This course intended to provide wireless network communication over short distances using radio or infrared signals instead of traditional network cabling. The basic knowledge of the wireless system, IEEE standards, network architecture, and its protocols. It focuses on data transmission among devices such as computers, smartphones, tablets, and personal digital assistants.

II COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
B.Tech	-	-	Analog Communications
B.Tech	-	-	Digital Communications

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Wireless Lans and pans	70 Marks	30 Marks	100

IV DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Power Point Presentations	✓	Chalk & Talk	✓	Assignments	x	MOOC
x	Open Ended Experiments	✓	Seminars	x	Mini Project	x	Videos
x	Others						

V EVALUATION METHODOLOGY:

The course will be evaluated for a total of 100 marks, with 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). Out of 30 marks allotted for CIA during the semester, marks are awarded by taking average of two CIA examinations or the marks scored in the make-up examination.

Semester End Examination (SEE): The SEE shall be conducted for 70 marks of 3 hours duration. The syllabus for the theory courses shall be divided into FIVE units and each unit carries equal weightage in terms of marks distribution. The question paper pattern shall be as defined below. Two full questions with 'either' 'or' choice will be drawn from each unit. Each question carries 14 marks. There could be a maximum of three sub divisions in a question.

The emphasis on the questions is broadly based on the following criteria:

50%	To test the objectiveness of the concept
30%	To test the analytical skill of the concept
20%	To test the application skill of the concept

Continuous Internal Assessment (CIA):

For each theory course the CIA shall be conducted by the faculty / teacher handling the course. CIA is conducted for a total of 30 marks, with 20 marks for Continuous Internal Examination (CIE), 05 marks for Assignment and 05 marks for Alternative Assessment Tool (AAT). **Two CIE Tests are Compulsory** and sum of the two tests, along with the scores obtained in the assignment / AAT shall be considered for computing the final CIA of a student in a given course.

Component	**Theory**			**Total Marks**
Type of Assessment	**CIE Exam**	**Assignment**	**AAT**	
CIA Marks	20	05	05	30

Continuous Internal Examination (CIE):

Two CIE exams shall be conducted at the end of the 9^{th} and 17^{th} th week of the semester respectively for 10 marks each of 2 hours duration consisting of five descriptive type questions out of which four questions have to be answered. The valuation and verification of answer scripts of CIE exams shall be completed within a week after the conduct of the Examination.

Assignment:

To improve the writing skills in the course an assignment will be evaluated for 05 marks. One assignment has to submit at the end of the CIE2 for the questions provided by the each course coordinator in that semester. Assignments to be handed in as loose paper collection stapled together at the top left corner. The assignment should be presented as a professional report. It must consist of a cover sheet, content page, and should have an introduction, a body, a conclusion or recommendation, and a reference page.

Alternative Assessment Tool (AAT):

In order to encourage innovative methods while delivering a course, the faculty members are encouraged to use the Alternative Assessment Tool (AAT). This AAT enables faculty to design own assessment patterns during the CIA. The AAT enhances the autonomy (freedom and flexibility) of individual faculty and enables them to create innovative pedagogical practices. If properly applied, the AAT converts the classroom into an effective learning

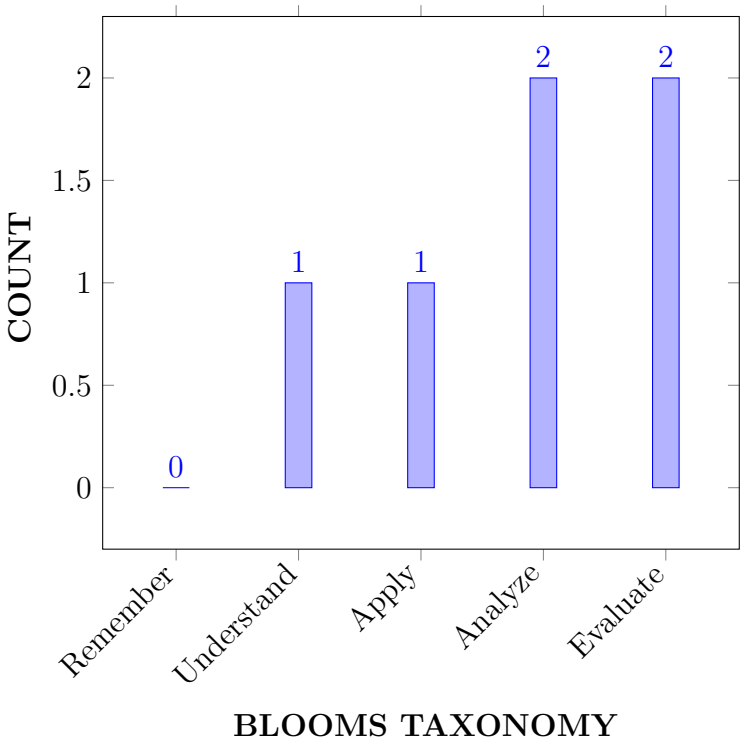
center.**The AAT may includes, concept videos, course related term paper, technical seminar, term paper, paper presentations conducted by reputed organizations relevant to the course etc.**

VI COURSE OUTCOMES:

After successful completion of the course, students should be able to:

CO 1	**Recall** the generations of cellular systems for understanding the connectivity of wireless communication networks.	Understand
CO 2	**Organize** the random-access protocols to decrease collision and avoid crosstalk.	Apply
CO 3	**Justify** the importance of wireless LANs for connecting different devices through wireless communication to form an area network.	Evaluate
CO 4	**Estimate** the wireless PANs for interconnecting electronic devices within an individual person's workspace.	Evaluate
CO 5	**Analyze** the traffic engineering used to carry traffic flows that vary from those chosen automatically by the routing protocol.	Analyze
CO 6	**Interpret** the wireless networking standards and protocols for wireless transmission approved by IEEE.	Analyze

COURSE KNOWLEDGE COMPETENCY LEVEL



VII HOW PROGRAM OUTCOMES ARE ASSESSED:

Program		Strength	Proficiency Assessed by
PO 1	Independently carry out research / investigation and development work to solve practical problems.	3	CIE/Quiz/AAT
PO 2	Write and present a substantial technical report / document.	2	CIE/Quiz/AAT
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program	2	CIE/Quiz/AAT
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.	2	CIE/Quiz/AAT
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team.	2	CIE/Quiz/AAT
PO 6	Recognize the need to engage in lifelong learning through continuing education and research.	2	CIE/Quiz/AAT

3 = High; 2 = Medium; 1 = Low

XV SYLLABUS:

MODULE I	**WIRELES SYSTEM and RANDOM-ACCESS PROTOCOLS**
	Introduction, frequency reuse, channel assignment strategies, handoff strategies; Prioritizing handoffs, practical handoff considerations, interference and system capacity; Co-channel interference and system capacity, channel planning for wireless systems, adjacent channel interference, power control for reducing interference, trunking and grade of service, improving coverage and capacity in cellular systems; Cellsplitting, sectoring.
MODULE II	**WIRELESS LANS**
	Introduction, importance of Wireless LANs, WLAN Topologies, Transmission Techniques: Wired Networks, Wireless Networks, comparison of wired and Wireless LANs; WLAN Technologies: Infrared technology, UHF narrowband technology, Spread Spectrum technology. .
MODULE III	**THE IEEE802.11 STANDARD FOR WIRELESS LANS**

	Network Architecture, Physical layer, The Medium Access Control Layer; MAC Layer issues: Hidden Terminal Problem, Reliability, Collision avoidance, Congestion avoidance, Congestion control, Security, The IEEE802.11eMACprotocol.
MODULE IV	**WIRELESS PANS**
	Introduction, importance of Wireless PANs, The Bluetooth technology: history and applications, technical overview, the Bluetooth specifications, piconet synchronization and Bluetooth clocks, Master-Slave Switch; Bluetooth security; Enhancements to Bluetooth: Bluetooth interference issues, Intra and Inter Piconet scheduling, Bridge selection, Traffic Engineering, QoS and Dynamics Slot Assignment, Scatter net formation.
MODULE V	**THE IEEE802.15 WORKING GROUP FOR WPANS**
	The IEEE 802.15.3, The IEEE 802.15.4, ZigBee Technology, ZigBee components and network topologies, The IEEE 802.15.4 LR-WPAN Device architecture: Physical Layer, Data Link Layer, The Network Layer, Applications; IEEE 802.15.3a Ultra-wideband.

COURSE DESCRIPTION

Branch	**ELECTRONICS AND COMMUNICATION ENGINEERING**				
Course Title	**PRINCIPLES OF DISTRIBUTED EMBEDDED SYSTEMS**				
Course Code	BESC10				
Program	M.Tech(EMBEDDED SYSTEMS)				
Semester	I				
Course Type	Professional Core Elective - II				
Regulation	PG-21				
Course Structure	Theory			Practical	
	Lecture	Tutorials	Credits	Laboratory	Credits
	3	-	3	-	-
Course Coordinator	Dr. Surekha Reddy Bandela, Assistant Professor				

I COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
B.Tech	-	-	Embedded Systems
B.Tech	-	-	Real Time Systems

II COURSE OVERVIEW:

A distributed embedded system consists of hardware and software parts interacting via an interconnection network. This course deals with the importance of real time communication systems, classification of real time systems, real time operating systems, and the design of real-time protocols. The applications include mobiles, routers, video games consoles, mp3 players, printers, GPS receivers, dishwashers, thermostats, anti-lock banking systems, medical imaging etc.

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Principles of Distributed Embedded Systems	70 Marks	30 Marks	100

IV DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Power Point Presentations	✓	Chalk & Talk	✓	Assignments	**x**	MOOC
x	Open Ended Experiments	**x**	Seminars	**x**	Mini Project	**x**	Videos
x	Others						

V EVALUATION METHODOLOGY:

The course will be evaluated for a total of 100 marks, with 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). Out of 30 marks allotted for CIA during the semester, marks are awarded by taking average of two CIA examinations or the marks scored in the make-up examination.

Semester End Examination (SEE): The SEE shall be conducted for 70 marks of 3 hours duration. The syllabus for the theory courses shall be divided into FIVE units and each unit carries equal weightage in terms of marks distribution. The question paper pattern shall be as defined below. Two full questions with 'either' 'or' choice will be drawn from each unit. Each question carries 14 marks. There could be a maximum of three sub divisions in a question.
The emphasis on the questions is broadly based on the following criteria:

50%	To test the objectiveness of the concept
30%	To test the analytical skill of the concept
20%	To test the application skill of the concept

Continuous Internal Assessment (CIA):
For each theory course the CIA shall be conducted by the faculty / teacher handling the course. CIA is conducted for a total of 30 marks, with 20 marks for Continuous Internal Examination (CIE), 05 marks for Assignment and 05 marks for Alternative Assessment Tool (AAT). **Two CIE Tests are Compulsory** and sum of the two tests, along with the scores obtained in the assignment / AAT shall be considered for computing the final CIA of a student in a given course.

Component	**Theory**			**Total Marks**
Type of Assessment	**CIE Exam**	**Assignment**	**AAT**	
CIA Marks	20	05	05	30

Continuous Internal Examination (CIE):
Two CIE exams shall be conducted at the end of the 9^{th} and 17^{th} th week of the semester respectively for 10 marks each of 2 hours duration consisting of five descriptive type questions out of which four questions have to be answered. The valuation and verification of answer scripts of CIE exams shall be completed within a week after the conduct of the Examination.

Assignment:
To improve the writing skills in the course an assignment will be evaluated for 05 marks. One assignment has to submit at the end of the CIE2 for the questions provided by the each course coordinator in that semester. Assignments to be handed in as loose paper collection stapled together at the top left corner. The assignment should be presented as a professional report. It must consist of a cover sheet, content page, and should have an introduction, a body, a conclusion or recommendation, and a reference page.

Alternative Assessment Tool (AAT):
In order to encourage innovative methods while delivering a course, the faculty members are encouraged to use the Alternative Assessment Tool (AAT). This AAT enables faculty to design own assessment patterns during the CIA. The AAT enhances the autonomy (freedom and flexibility) of individual faculty and enables them to create innovative pedagogical practices. If properly applied, the AAT converts the classroom into an effective learning center.**The AAT**

may includes, concept videos, course related term paper, technical seminar, term paper, paper presentations conducted by reputed organizations relevant to the course etc.

VI COURSE OBJECTIVES:

The students will try to learn:

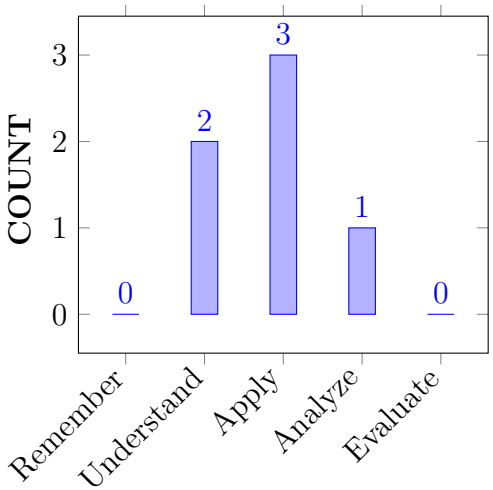
I	The concepts of embedded computing, RTOS (Real Time Operating System) and embedded software tools for implementing embedded systems.
II	The design principles of distributed embedded systems
III	CAN (Control Area Network) based systems to move into different embedded applications

VII COURSE OUTCOMES:

After successful completion of the course, students should be able to:

CO1	**Summarize** the concepts of real time systems for real time embedded applications	Understand
CO2	**Build** time constrained embedded systems using the concepts of RTOS (Real Time Operating System) for rapid design and programming embedded systems.	Apply
CO3	**Construct** the time constrained application as a member of a small group to meet design specifications	Apply
CO4	**Identify** the working of CAN (Control Area Network) standard protocol to execute real time applications	Apply
CO5	**Explore** the fundamentals of CAN (Control Area Network) standards and its configuration files, service data objectives for preparing different electronic data sheets	Analyze
CO6	**Illustrate** the concepts of CAN (Control Area Network) open standards to acquire a network protocol	Understand

COURSE KNOWLEDGE COMPETENCY LEVEL



BLOOMS TAXONOMY

VIII PROGRAM OUTCOMES:

Program Outcomes	
PO 1	Independently carry out research / investigation and development work to solve practical problems.
PO 2	Write and present a substantial technical report / document.
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program.
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skillful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team.
PO 6	Recognize the need to engage in life long learning through continuing education and research.

IX HOW PROGRAM OUTCOMES ARE ASSESSED:

PROGRAM OUTCOMES		Strength	Proficiency Assessed by
PO 3	Demonstrate the importance of embedded technologies and design innovative products for solving society relevant problems.	3	SEE/CIE/AAT
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skillful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.	2	SEE/CIE/AAT
PO 6	Recognize the need to engage in life long learning through continuing education and research.	1	SEE/CIE/AAT

3 = High; 2 = Medium; 1 = Low

X MAPPING OF EACH CO WITH PO(s):

COURSE OUTCOMES	PROGRAM OUTCOMES

Term Paper	-	Seminars	-	Student Viva	-
Laboratory Practices	-	5 Minutes Video / Concept Video	✓	Open Ended Experiments	-
Micro Projects	-	-	-	-	-

XVI SYLLABUS:

MODULE I	**REAL-TIME ENVIRONMENT**
	Real-time computer system requirements, classification of real time systems, simplicity, global time, internal and external clock synchronization, real time model. Real time communication, temporal relations, dependability, power and energy awareness, real time communication, event triggered, rate constrained, time triggered
MODULE II	**REAL-TIME OPERATING SYSTEMS**
	Inter component communication, task management and dual role of time; Inter task interactions, process input/output, agreement protocols, error detection
MODULE III	**SYSTEM DESIGN**
	Scheduling problem, static and dynamic scheduling, system design. Validation, time-triggered architecture
MODULE IV	**INTRODUCTION TO CAN**
	Introduction to CAN open CAN open standard, object directory, electronic data sheets and devices
MODULE V	**CAN STANDARDS**
	Configuration files, service data objectives, network management CAN open messages, device profile encoder

ANNEXURE - I

KEY ATTRIBUTES FOR ASSESSING PROGRAM OUTCOMES

PO Number	NBA Statement / Key Competencies Features (KCF)	No. of KCF's
PO 1	Independently carry out research / investigation and development work to solve practical problems. 1. Independence 2. Self driven 3. Quality of work 4. Problem identification and implementation 5. Demonstrate the solutions 6. Budget	6
PO 2	Write and present a substantial technical report / document. 1. Demonstrate and communicate effectively in writing report and document/ present orally. 2. Clarity (writing/ presentation) 3. Grammar/ punctuation (writing) 4. References 5. Speaking/ Presenting 6. Subject knowledge while preparing report	6
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program. 1. Knowledge, understanding and demonstrations of embedded applications in real time scenario. 2. Ability to demonstrate and communicate effectively in writing / orally societal problems. 3. Analyze and design innovative products 4. Problem formulation and abstraction 5. Use creativity to establish innovative solutions 6. Experimental design 7. Manage the design process and evaluate outcomes using modern tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation	9

PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications. 1. Understand the need of users with the importance of considerations such as IoT and Robotics 2. Scientific principles and methodology 3. Problem formulation and abstraction 4. Use creativity to establish innovative solutions 5. Experimental design 6. Manage the design process and evaluate outcomes 7. Computer software / simulation packages / diagnostic equipment / technical library resources / literature search tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation 10. Under take research and development projects in the field of Embedded Systems	10
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team. 1. Maturity – requiring only the achievement of goals to drive their performance 2. Self-direction (take a vaguely defined problem and systematically work to resolution) 3. Individual performance is used during the classroom periods, in the hands-on labs, and in the design projects. 4. Knowledge of management techniques which may be used achieve engineering objectives 5. Meeting deadlines and producing solutions 6. Work with all level of people in the team. 7. Demonstrate ability to work well with a team	7
PO 6	Recognize the need to engage in lifelong learning through continuing education and research. 1. Project management and research orientation/ Ph.D 2. Strengthen in embedded and advanced engineering areas 3. Continuing education efforts through literature and courses 4. Personal development 5. Plan tasks and resources, manage risk and produce deliverables 6. Meeting deadlines and producing solutions 7. Work with all levels of people in team 8. Demonstrated ability to work well with a team	8

M.Tech	BESC02	I	Microcontrollers and Programmable Digital Signal Processing

II COURSE OVERVIEW:

This course outlines the design and implementation of embedded systems using suitable hardware(ARM and PSOC) and Keil Embedded C software tools.The instruction set, Embedded C programming for I/O and memory interfacing techniques are covered.The hands-on experience acquired by the student's during the course makes them to carry out processor/controller based projects and extend their knowledge on the latest trends and technologies in the field of embedded system.

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Advanced Microprocessors and Interfacing Laboratory	70 Marks	30 Marks	100

IV DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Demo Video	✓	Lab Worksheets	✓	Viva Questions	✓	Probing further Questions

V EVALUATION METHODOLOGY:

Each laboratory will be evaluated for a total of 100 marks consisting of 30 marks forinternal assessment and 70 marks for semester end lab examination. Out of 30 marks ofinternal assessment, continuous lab assessment will be done for 20 marks for the day today performance and 10 marks for the final internal lab assessment.

Semester End Examination (SEE): The semester end labexamination for 70 marks shall be conducted by two examiners, one of them beingInternal Examiner and the other being External Examiner, both nominated by thePrincipal from the panel of experts recommended by Chairman, BOS. The emphasis on the experiments is broadly based on the following criteria given in Table: 1

	Experiment Based	Programming based
20 %	Objective	Purpose
20 %	Analysis	Algorithm
20 %	Design	Programme
20 %	Conclusion	Conclusion
20 %	Viva	Viva

Continuous Internal Assessment (CIA):

CIA is conducted for a total of 30 marks (Table 1), with 20 marks for continuous lab assessment during day to day performance, 10 marks for final internal lab assessment.

Component	**Laboratory**		**Total Marks**
Type of Assessment	**Day to day performance**	**Final internal lab assessment**	
CIA Marks	20	10	30

Continuous Internal Examination (CIE):

One CIE exams shall be conducted at the end of the 16th week of the semester. The CIE exam is conducted for 10 marks of 3 hours duration.

1. **Experiment Based**

Objective	Analysis	Design	Conclusion	Viva	Total
2	2	2	2	2	10

2. **Programming Based**

Objective	Analysis	Design	Conclusion	Viva	Total
2	2	2	2	2	10

VI COURSE OBJECTIVES:

The students will try to learn:

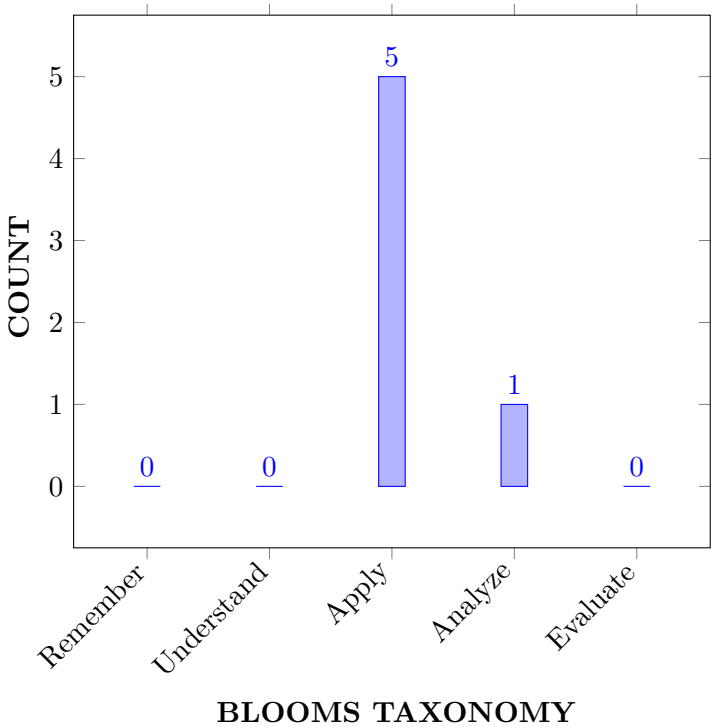
I	The embedded C for reading data from port pins.
II	The interfacing of data I/O devices with microcontroller.
III	The serial communication and port RTOS on microcontroller.

VII COURSE OUTCOMES:

After successful completion of the course, students should be able to:

CO 1	**Make use** of emulators and cross-compilers for writing, compiling and running an embedded C language programs on ARM and PSoC training boards.	Apply
CO 2	**Develop** Embedded C language programs for accomplishing code to reading the data from ports, blinking the LED and interfacing of switch and buzzer , temperature sensors and other display units to the ARM processors.	Apply
CO 3	**Select** suitable RTOS of ARM and PSoC and write Embedded C language program to run 2 to 3 tasks simultaneously.	Apply
CO 4	**Identify** different filters and timers in PSoC for transmitting the data between PSOC and peripherals.	Apply
CO 5	**Utilize** Analog to Digital and Digital to Analog converters with PSoC for data conversion.	Apply
CO 6	**Build** an interface between PSoC and peripherals to provide solutions to the real world problems.	Analyze

COURSE KNOWLEDGE COMPETENCY LEVEL



VIII PROGRAM OUTCOMES:

Program Outcomes	
PO 1	Independently carry out research / investigation and development work to solve practical problems.
PO 2	Write and present a substantial technical report / document.
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program.
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skillful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team.
PO 6	Recognize the need to engage in life long learning through continuing education and research.

IX HOW PROGRAM OUTCOMES ARE ASSESSED:

Program		Strength	Proficiency Assessed by
PO1	Independently carry out research / investigation and development work to solve practical problems.	1	Day to Day Evaluation/CIE/SEE
PO3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program.	3	Day to Day Evaluation/CIE/SEE
PO4	Apply the skills and knowledge needed to serve as a professional engineer skillful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.	2	Day to Day Evaluation/CIE/SEE

3 = High; 2 = Medium; 1 = Low

X JUSTIFICATIONS FOR CO – PO/ PSO MAPPING -DIRECT:

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
CO1	PO 3	Demonstrate the importance of embedded technologies and design new innovative products for solving society relevant problems for applying **knowledge, understanding and demonstrations of embedded applications in real time scenario** and **use creativity to establish innovative solutions** to get the **solution development** and **communicate effectively in writing / orally societal problems**.	4
	PO 4	Apply the concepts (knowledge) of embedded systems using their architectures by using **Scientific principles and methodology** and **problem formulation and abstraction** for **understand the need of users with the importance of considerations such as IoT and Robotics** and **use creativity to establish the solutions** and make the **experimental design**.	5
CO2	PO 3	Demonstrate the importance of embedded technologies and design new innovative products for solving society relevant problems for applying **knowledge, understanding and demonstrations of embedded applications in real time scenario** and **use creativity to establish innovative solutions** and make the **experimental design** with **manage the design process and evaluate outcomes using modern tools** to get **the solution development** and **communicate effectively in writing / orally societal problems**.	6
	PO 4	Apply the concepts (knowledge) of embedded systems using their architectures by using **Scientific principles and methodology** and **problem formulation and abstraction** for **understand the need of users with the importance of considerations such as IoT and Robotics** and **use creativity to establish the solutions** and make the **experimental design**.	5
CO3	PO 3	Demonstrate the importance of embedded technologies and design new innovative products for solving society relevant problems for applying **knowledge, understanding and demonstrations of embedded applications in real time scenario** and **use creativity to establish innovative solutions** and **manage the design process and evaluate outcomes using modern tools** to get **the solution development** and **communicate effectively in writing / orally societal problems**. **science** and **engineering fundamentals**.	5

Laboratory Practices	✓	Student Viva	✓	Certification	-

XV ASSESSMENT METHODOLOGY INDIRECT:

✓	Early Semester Feedback	✓	End Semester OBE Feedback
X	Assessment of Mini Projects by Experts		

XVI SYLLABUS:

WEEK I	**LED BLINKING**
	Program to toggle all the led to port and with some time delay using ARM .
WEEK II	**INTERFACING OF SWITCH AND BUZZER**
	Program to interface a switch and a buzzer to two different pins of a port such that the buzzer should soundas long as the switch is pressed.
WEEK III	**INTERFACING OF LCD**
	Program to interface LCD data pins to port P1 and display a message on it.
WEEK IV	**INTERFACING SEVEN SEGMENT DISPLAY**
	Program to interface seven segment display.
WEEK V	**INTERFACING OF KEYPAD**
	Program to interface keypad. Whenever a key is pressed, it should be displayed on LCD.
WEEK VI	**SERIAL COMMUNICATION**
	Program to transmit message from microcontroller to PC serially using RS232. Program to receive a message from PC to microcontroller serially using RS232.
WEEK VII	**INTERFACING OF STEPPER MOTOR**
	Program to interface Stepper Motor to rotate the motor in clockwise and anticlockwise directions.
WEEK VIII	**INTERFACING TEMPERATURE SENSOR**
	Program to read data from temperature sensor and display the temperature value.
WEEK IX	**PORTING OF RTOS**
	Port RTOS on to 89V51 Microcontroller and verify. Run 2 to 3 tasks simultaneously on 89V51 SDK. UseLCD interface, LED interface, Serial communication.
WEEK X	**INTERFACING OF ADC**
	Program to convert analog signal into digital (ADC).
WEEK XI	**INTERFACING OF DAC**
	Program to convert Digital into Analog (DAC).
WEEK XII	**INTERFACING OF ELEVATOR**
	Program to interface Elevator.

Course Coordinator	Dr. G Mary Swarna Latha ,Assistant Professor				

I COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
B.Tech	-	-	Digital Signal Processing
B.Tech	-	-	Microprocessors and Microcontrollers

II COURSE OVERVIEW:

This course provides knowledge of basics of DSP processors and embedded C programming language. It covers the concepts like blinking an LED with software delay, system clock real time alteration using the PLL modules and controlling an LED using switch by polling method. Through laboratory experiments, students are provided learning experiences that enable them to provide in depth knowledge about embedded and DSP processors.

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
MICROCONTROLLERS AND PROGRAMMABLE DSP LAB	70 Marks	30 Marks	100

IV DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Demo Video	✓	Lab Worksheets	✓	Viva Questions	✓	Probing further Questions

V EVALUATION METHODOLOGY:

Each lab will be evaluated for a total of 100 marks consisting of 30 marks for internal assessment and 70 marks for semester end lab examination. Out of 30 marks of internal assessment, continuous lab assessment will be done for 20 marks for the day to day performance and 10 marks for the final internal lab assessment. The semester end lab examination for 70 marks shall be conducted by two examiners, one of them being a internal examiner and another is external examiner, both nominated by the Principal from the panel of experts recommended by Chairman, BOS.
All the drawing related courses are evaluated in line with lab courses. The distribution shall be 30 marks for internal evaluation (20 marks for day–to–day work, and 10 marks for internal tests) and 70 marks for semester end lab examination. There shall be ONE internal test for 10 marks each in a semester.
The emphasis on the experiments is broadly based on the following criteria given in Table: 1

	Experiment Based	Programming based
20 %	Objective	Purpose
20 %	Analysis	Algorithm
20 %	Design	Programme
20 %	Conclusion	Conclusion
20 %	Viva	Viva

Continuous Internal Assessment (CIA):

CIA is conducted for a total of 30 marks (Table 1), with 20 marks for continuous lab assessment during day to day performance, 10 marks for final internal lab assessment.

Component	**Laboratory**		**Total Marks**
Type of Assessment	**Day to day performance**	**Final internal lab assessment**	
CIA Marks	20	10	30

Continuous Internal Examination (CIE):

One CIE exams shall be conducted at the end of the 16th week of the semester. The CIE exam is conducted for 10 marks of 3 hours duration.

XIV SYLLABUS:

Part A) Experiments to be carried out on Cortex-M3 development boards and using GNU tool chain	
WEEK I	**Blink an LED with software delay, delay generated using the SysTick timer.**
WEEK II	**System clock real time alteration using the PLL modules.**
WEEK III	**Control intensity of an LED using PWM implemented in software and hardware**
WEEK IV	**Control an LED using switch by polling method, by interrupt method and flash the LED once.**
WEEK V	**UART Echo Test.**

WEEK VI	**Take analog readings on rotation of rotary potentiometer connected to an ADC channel**
WEEK VII	**Temperature indication on an RGB LED**
WEEK VIII	**Mimic light intensity sensed by the light sensor by varying the blinking rate of an LED.**
WEEK IX	**Evaluate the various sleep modes by putting core in sleep and deep sleep modes.**
WEEK X	**System reset using watchdog timer in case something goes wrong.**
WEEK XI	**Sample sound using a microphone and display sound levels on LEDs.**
Part B) Experiments to be carried out on DSP C6713 evaluation kits and using (CCS)	
WEEK XII	**To develop an assembly code and C code to compute Euclidian distance between any two points**
WEEK XIII	**To develop assembly code and study the impact of parallel, serial and mixed execution.**
WEEK XIV	**To develop assembly and C code for implementation of convolution operation.**
WEEK XV	**To design and implement filters in C to enhance the features of given input sequence/signal**

Course Coordinator	Dr.S.China Venkateswarlu, Professor, ECE				

I COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
B.Tech	AECB24	VI	Microprocessors and Microcontrollers

II COURSE OVERVIEW:

Processor and Controller cores are the key components in most of the modern embedded and system-on-chip designs. This course outlines the ARM architecture, programming model and its interfacing with peripherals. It also covers the ARM cortex processor, memory management, programming model and interfacing peripherals with ARM processor.The applications include Calculators, Accounting system, Games machine, Complex industrial controllers, Military applications, Defense systems, Computation systems etc.

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Advanced Microprocessors and Interfacing	70 Marks	30 Marks	100

IV DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Power Point Presentations	✓	Chalk & Talk	✓	Assignments	**x**	MOOC
x	Open Ended Experiments	**x**	Seminars	**x**	Mini Project	**x**	Videos
x	Others						

V EVALUATION METHODOLOGY:

The course will be evaluated for a total of 100 marks, with 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). Out of 30 marks allotted for CIA during the semester, marks are awarded by taking average of two CIA examinations or the marks scored in the make-up examination.

Semester End Examination (SEE): The SEE shall be conducted for 70 marks of 3 hours duration. The syllabus for the theory courses shall be divided into FIVE units and each unit carries equal weightage in terms of marks distribution. The question paper pattern shall be as defined below. Two full questions with 'either' 'or' choice will be drawn from each unit. Each question carries 14 marks. There could be a maximum of three sub divisions in a question.
The emphasis on the questions is broadly based on the following criteria:

50%	To test the objectiveness of the concept
30%	To test the analytical skill of the concept
20%	To test the application skill of the concept

Continuous Internal Assessment (CIA):
For each theory course the CIA shall be conducted by the faculty / teacher handling the course. CIA is conducted for a total of 30 marks, with 20 marks for Continuous Internal Examination (CIE), 05 marks for Assignment and 05 marks for Alternative Assessment Tool (AAT). **Two CIE Tests are Compulsory** and sum of the two tests, along with the scores obtained in the assignment / AAT shall be considered for computing the final CIA of a student in a given course.

Component	**Theory**			**Total Marks**
Type of Assessment	**CIE Exam**	**Assignment**	**AAT**	
CIA Marks	20	05	05	30

Continuous Internal Examination (CIE):
Two CIE exams shall be conducted at the end of the 9^{th} and 17^{th} th week of the semester respectively for 10 marks each of 2 hours duration consisting of five descriptive type questions out of which four questions have to be answered. The valuation and verification of answer scripts of CIE exams shall be completed within a week after the conduct of the Examination.

Assignment:
To improve the writing skills in the course an assignment will be evaluated for 05 marks. One assignment has to submit at the end of the CIE2 for the questions provided by the each course coordinator in that semester. Assignments to be handed in as loose paper collection stapled together at the top left corner. The assignment should be presented as a professional report. It must consist of a cover sheet, content page, and should have an introduction, a body, a conclusion or recommendation, and a reference page.

Alternative Assessment Tool (AAT):
In order to encourage innovative methods while delivering a course, the faculty members are encouraged to use the Alternative Assessment Tool (AAT). This AAT enables faculty to design own assessment patterns during the CIA. The AAT enhances the autonomy (freedom and flexibility) of individual faculty and enables them to create innovative pedagogical practices. If properly applied, the AAT converts the classroom into an effective learning center.**The AAT**

may includes, concept videos, course related term paper, technical seminar, term paper, paper presentations conducted by reputed organizations relevant to the course etc.

VI COURSE OBJECTIVES:

The students will try to learn:

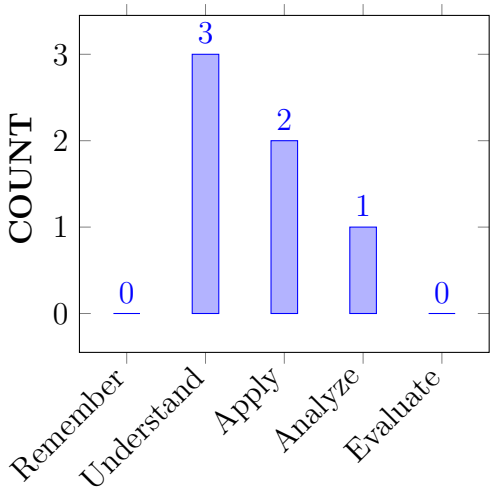
I	The architecture of ARM series microprocessors and its programming models.
II	The memory management in ARM processors
III	The peripherals interfacing with ARM processors using high and low level languages.

VII COURSE OUTCOMES:

After successful completion of the course, students should be able to:

CO 1	**Describe** the features of ARM processors for signal description and architecture.	Understand
CO 2	**Illustrate** the programmer's model of ARM processor and test the programming model using high level and low level languages.	Understand
CO 3	**Demonstrate** the internal architecture and various modes of operation of the devices used for interfacing memory and I/O devices with ARM processor.	Understand
CO 4	**Apply** the memory management architecture for allocating the MMU	Apply
CO 5	**Analyze** floating point processor architecture and its architectural support for higher level language.	Analyze
CO 6	**Build** prototype models and products subsequently in embedded field for real life needs and applications.	Apply

COURSE KNOWLEDGE COMPETENCY LEVEL



BLOOMS TAXONOMY

VIII PROGRAM OUTCOMES:

Program Outcomes	
PO 1	Independently carry out research / investigation and development work to solve practical problems.
PO 2	Write and present a substantial technical report / document
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team.
PO 6	Recognize the need to engage in lifelong learning through continuing education and research.

IX HOW PROGRAM OUTCOMES ARE ASSESSED:

PROGRAM OUTCOMES		Strength	Proficiency Assessed by
PO 1	Independently carry out research / investigation and development work to solve practical problems.	2	CIE/SEE/AAT
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program	2	CIE/SEE/AAT
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.	3	CIE/SEE/AAT

XVII SYLLABUS:

MODULE I	**ARM ARCHITECTURE and INSTRUCTION SET**
	ARM Design Philosophy, Registers, PSR, Pipeline, Interrupts and Vector Table, Architecture Revision, ARM Processor Families. Instruction Set: Data Processing Instructions, Branch, Load, Store Instructions, PSR Instructions, Conditional Instructions.
MODULE II	**ARM PROGRAMMING MODEL**
	Thumb Instruction Set: Register Usage, Other Branch Instructions, Data Processing Instructions, Single- Register and Multi Register Load-Store Instructions, Stack, Interrupts, Software Interrupt Instructions, Exception handling

MODULE III	**MEMORY MANAGEMENT**
	Cache Architecture, Polices, Flushing and Caches, MMU Page Tables, Translation, Access Permissions, Content Switch.
MODULE IV	**ARM PROGRAMMING USING HIGH LEVEL LANGUAGE**
	Simple C Programs using Function Calls, Pointers, Structures, Integer and Floating Point Arithmetic, Assembly Code using Instruction Scheduling, Register Allocation, Conditional Execution and Loops.
MODULE V	**PERIPHERAL INTERFACING OF ARM PROCESSOR**
	Timer – UART –interrupt structure – ADC and DAC Interfacing, keyboard Interface, LCD interface, on chip ADC/DAC interface. Implementation using Keil: Interfacing ADC for LCD display, Interfacing DAC to RELAY, Interfacing KEYPAD

ANNEXURE - I

KEY ATTRIBUTES FOR ASSESSING PROGRAM OUTCOMES

PO Number	NBA Statement / Key Competencies Features (KCF)	No. of KCF's
PO 1	Independently carry out research / investigation and development work to solve practical problems. 1. Independence 2. Self driven 3. Quality of work 4. Problem identification and implementation 5. Demonstrate the solutions 6. Budget	6
PO 2	Write and present a substantial technical report / document. 1. Demonstrate and communicate effectively in writing report and document/ present orally. 2. Clarity (writing/ presentation) 3. Grammar/ punctuation (writing) 4. References 5. Speaking/ Presenting 6. Subject knowledge while preparing report	6
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program. 1. Knowledge, understanding and demonstrations of embedded applications in real time scenario. 2. Ability to demonstrate and communicate effectively in writing / orally societal problems. 3. Analyze and design innovative products 4. Problem formulation and abstraction 5. Use creativity to establish innovative solutions 6. Experimental design 7. Manage the design process and evaluate outcomes using modern tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation	9

PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications. 1. Understand the need of users with the importance of considerations such as IoT and Robotics 2. Scientific principles and methodology 3. Problem formulation and abstraction 4. Use creativity to establish innovative solutions 5. Experimental design 6. Manage the design process and evaluate outcomes 7. Computer software / simulation packages / diagnostic equipment / technical library resources / literature search tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation 10. Under take research and development projects in the field of Embedded Systems	10
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team. 1. Maturity – requiring only the achievement of goals to drive their performance 2. Self-direction (take a vaguely defined problem and systematically work to resolution) 3. Individual performance is used during the classroom periods, in the hands-on labs, and in the design projects. 4. Knowledge of management techniques which may be used achieve engineering objectives 5. Meeting deadlines and producing solutions 6. Work with all level of people in the team. 7. Demonstrate ability to work well with a team	7
PO 6	Recognize the need to engage in lifelong learning through continuing education and research. 1. Project management and research orientation/ Ph.D 2. Strengthen in embedded and advanced engineering areas 3. Continuing education efforts through literature and courses 4. Personal development 5. Plan tasks and resources, manage risk and produce deliverables 6. Meeting deadlines and producing solutions 7. Work with all levels of people in team 8. Demonstrated ability to work well with a team	8

INSTITUTE OF AERONAUTICAL ENGINEERING
(Autonomous)
Dundigal, Hyderabad - 500 043

COURSE DESCRIPTION

Department	**Electronics and Communication Engineering**				
Course Title	**Internet of Things**				
Course Code	BESC14				
Program	M.Tech- Embedded Systems				
Semester	II				
Course Type	Core				
Regulation	PG - 21				
Course Structure	Theory			Practical	
	Lecture	Tutorials	Credits	Laboratory	Credits
	3	1	4	-	-
Course Coordinator	Dr. B. Polaiah,Professor				

I COURSE OVERVIEW:

The Internet of things allows every device to connect the world for exchange of information among the associated devices. It focuses on the concepts of data communication, network protocols, cloud computing and network security fundamental techniques, customs and terms including the basic components of hardware and software. The applications of IoT include home automation, smart parking, smart lighting, and smart phone detection.

II COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
B.Tech	AECB24	VI	Microprocessors and Microcontrollers

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Internet of Things	70 Marks	30 Marks	100

IV CONTENT DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Power Point Presentations	✓	Chalk & Talk	✓	Assignments	**x**	MOOC
x	Open Ended Experiments	✓	Seminars	**x**	Mini Project	**x**	Videos
x	Tech Talks	x	Concept Videos	**x**	others		

V EVALUATION METHODOLOGY:

The course will be evaluated for a total of 100 marks, with 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). Out of 30 marks allotted for CIA during the semester, marks are awarded by taking average of two CIA examinations or the marks scored in the make-up examination.

Semester End Examination (SEE): The SEE is conducted for 70 marks of 3 hours duration. The syllabus for the theory courses is divided into five modules and each module carries equal weightage in terms of marks distribution. The question paper pattern is as follows. Two full questions with "either" or "choice" will be drawn from each module. Each question carries 14 marks. There could be a maximum of two sub divisions in a question.
The expected percentage of cognitive level of the questions is broadly based on the criteria given in below Table.

45%	To test the objectiveness of the concept
30%	To test the analytical skill of the concept
25%	To test the application skill of the concept

Continuous Internal Assessment (CIA):
Continuous Internal Assessment (CIA): For each theory course the CIA shall be conducted by the faculty / teacher handling the course. CIA is conducted for a total of 30 marks, with 20 marks for Continuous Internal Examination (CIE), 05 marks for Assignment and 05 marks for Alternative Assessment Tool (AAT). Two CIE Tests are Compulsory and sum of the two tests, along with the scores obtained in the assignment / AAT shall be considered for computing the final CIA of a student in a given course.

The CIE Tests/Assignment /AAT shall be conducted by the course faculty with due approval from the HOD. Advance notification for the conduction of Assignment/AAT is mandatory and the responsibility lies with the concerned course faculty. CIA is conducted for a total of 30 marks (Table 1), with 25 marks for Continuous Internal Examination (CIE), 05 marks for Technical Seminar and Term Paper

Component	Theory			Total Marks
Type of Assessment	CIE Exam	Assignment	AAT	
CIA Marks	20	5	5	30

Continuous Internal Examination (CIE):
Two CIE exams shall be conducted at the end of the 8^{th} and 16^{th} week of the semester respectively. The CIE exam is conducted for 20 marks of 2 hours duration consisting of five descriptive type questions out of which four questions have to be answered where, each question carries 5 marks. Marks are awarded by taking average of marks scored in two CIE exams.

Assignment:
To improve the writing skills in the course an assignment will be evaluated for 05 marks. One assignment has to submit at the end of the CIE2 for the questions provided by the each course coordinator in that semester. Assignments to be handed in as loose paper collection stapled together at the top left corner. The assignment should be presented as a professional report. It must consist of a cover sheet,content page, and should have an introduction, a body, a conclusion or recommendation, and a reference page

Alternative Assessment Tool (AAT)
In order to encourage innovative methods while delivering a course, the faculty members are encouraged to use the Alternative Assessment Tool (AAT). This AAT enables faculty to design own assessment patterns during the CIA. The AAT enhances the autonomy (freedom and flexibility) of individual faculty and enables them to create innovative pedagogical practices. If properly applied, the AAT converts the classroom into an effective learning center.**The AAT may includes, concept videos, course related term paper, technical seminar, term paper, paper presentations conducted by reputed organizations relevant to the course etc.**

VI COURSE OBJECTIVES:

The students will try to learn:

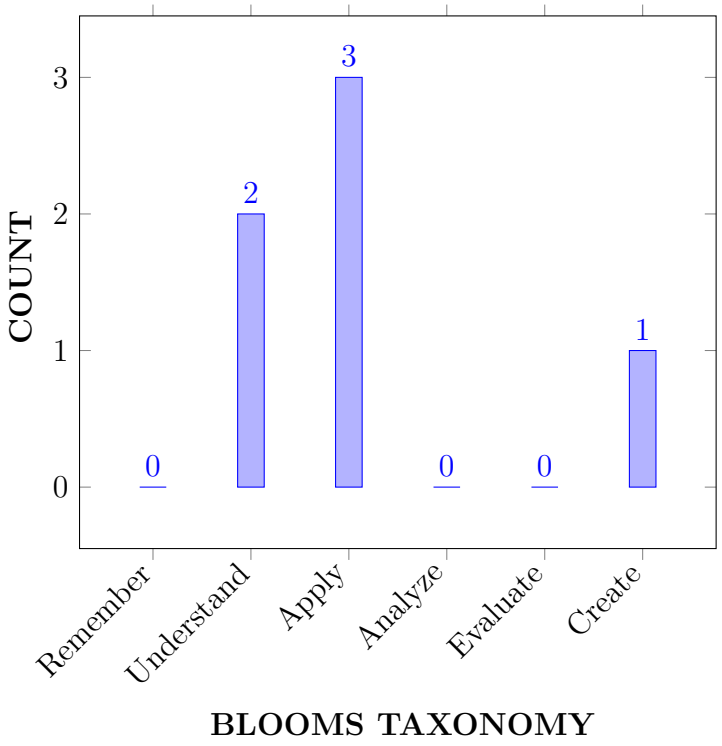
I	The principle and operation of software defined networking and network function virtualization.
II	The knowledge of IoT enabled technologies, security protocols and architectures.
III	Python programming skills to move into specific areas – deep learning (DL), data science, machine learning (ML),artificial intelligence (AI) etc.

VII COURSE OUTCOMES:

After successful completion of the course, students will be able to:

CO 1	**Understand** the programming of microcontroller for the functional stack of IoT ecosystem.	Understand
CO 2	**Understand** the concepts of data synchronization for agility and autonomy in protocols.	Understand
CO 3	**Apply** IEEE 802.11 protocol for topology and security in physical and MAC layer.	Apply
CO 4	**Identify** the applications of IoT including home automation, smart cities, and smart environment to implement the real time applications.	Apply
CO 5	**Develop** the cloud environment using web enabling constrained devices in Internet of things.	Create
CO 6	**Make use of** appropriate communication protocolsto acquire the knowledge of programming with Raspberry PI.	Apply

COURSE KNOWLEDGE COMPETENCY LEVEL



VIII PROGRAM OUTCOMES:

Program Outcomes	
PO 1	Independently carry out research / investigation and development work to solve practical problems.
PO 2	Write and present a substantial technical report / document.
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program.
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team.
PO 6	Recognize the need to engage in lifelong learning through continuing education and research.

IX HOW PROGRAM OUTCOMES ARE ASSESSED:

PROGRAM OUTCOMES		Strength	Proficiency Assessed by
PO 1	Independently carry out research / investigation and development work to solve practical problems.	3	SEE/CIE/AAT
PO 2	Write and present a substantial technical report / document.	2	SEE/CIE/AAT

PROGRAM OUTCOMES		Strength	Proficiency Assessed by
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program.	2	SEE/CIE/AAT

3 = High; 2 = Medium; 1 = Low

XVII SYLLABUS:

MODULE I	**Fundamentals of IoT**
	Evolution of Internet of Things - Enabling Technologies – IoT Architectures: oneM2M, IoT World Forum (IoTWF) and Alternative IoT models – Simplified IoT Architecture and Core IoT Functional Stack – Fog, Edge and Cloud in IoT – Functional blocks of an IoT ecosystem – Sensors, Actuators, Smart Objects and Connecting Smart Objects.
MODULE II	**IoT Protocols IoT access technologies**
	Physical and MAC layers, topology and Security of IEEE 802.15.4, 802.15.4g, 802.15.4e, 1901.2a,802.11ah and LoRaWAN – Network Layer: IP versions, Constrained Nodes and Constrained Networks – Optimizing IP for IoT: From 6LoWPAN to 6Lo, Routing over Low Power and Lossy Networks – Application Transport Methods: Supervisory Control and Data Acquisition – Application Layer Protocols: CoAP and MQTT.
MODULE III	**Design and development design methodology**
	Embedded computing logic - Microcontroller, System on Chips - IoT system building blocks - Arduino - Board details. IDE programming -Raspberry Pi - Interfaces and Raspberry Pi with Python Programming
MODULE IV	**Data analytics and supporting services**
	Structured Vs Unstructured Data and Data in Motion Vs Data in Rest – Role of Machine Learning – No SQL Databases – Hadoop Ecosystem – Apache Kafka, Apache Spark – Edge Streaming Analytics and Network Analytics – Xively Cloud for IoT, Python Web Application Framework – Django – AWS for IoT – System Management with NETCONF-YANG Developing.
MODULE V	**IoT Physical Servers and Cloud Offerings**
	Introduction to cloud storage models and communication APIs; WAMP: AutoBahn for IoT, Xively cloud for IoT; Case studies illustrating IoT design: Home automation, smart cities, smart environment.

ANNEXURE - I

KEY ATTRIBUTES FOR ASSESSING PROGRAM OUTCOMES

PO Number	NBA Statement / Key Competencies Features (KCF)	No. of KCF's
PO 1	Independently carry out research / investigation and development work to solve practical problems. 1. Independence 2. Self driven 3. Quality of work 4. Problem identification and implementation 5. Demonstrate the solutions 6. Budget	6
PO 2	Write and present a substantial technical report / document. 1. Demonstrate and communicate effectively in writing report and document/ present orally. 2. Clarity (writing/ presentation) 3. Grammar/ punctuation (writing) 4. References 5. Speaking/ Presenting 6. Subject knowledge while preparing report	6
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program. 1. Knowledge, understanding and demonstrations of embedded applications in real time scenario. 2. Ability to demonstrate and communicate effectively in writing / orally societal problems. 3. Analyze and design innovative products 4. Problem formulation and abstraction 5. Use creativity to establish innovative solutions 6. Experimental design 7. Manage the design process and evaluate outcomes using modern tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation	9

PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications. 1. Understand the need of users with the importance of considerations such as IoT and Robotics 2. Scientific principles and methodology 3. Problem formulation and abstraction 4. Use creativity to establish innovative solutions 5. Experimental design 6. Manage the design process and evaluate outcomes 7. Computer software / simulation packages / diagnostic equipment / technical library resources / literature search tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation 10. Under take research and development projects in the field of Embedded Systems	10
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team. 1. Maturity – requiring only the achievement of goals to drive their performance 2. Self-direction (take a vaguely defined problem and systematically work to resolution) 3. Individual performance is used during the classroom periods, in the hands-on labs, and in the design projects. 4. Knowledge of management techniques which may be used achieve engineering objectives 5. Meeting deadlines and producing solutions 6. Work with all level of people in the team. 7. Demonstrate ability to work well with a team	7
PO 6	Recognize the need to engage in lifelong learning through continuing education and research. 1. Project management and research orientation/ Ph.D 2. Strengthen in embedded and advanced engineering areas 3. Continuing education efforts through literature and courses 4. Personal development 5. Plan tasks and resources, manage risk and produce deliverables 6. Meeting deadlines and producing solutions 7. Work with all levels of people in team 8. Demonstrated ability to work well with a team	8

INSTITUTE OF AERONAUTICAL ENGINEERING
(Autonomous)
Dundigal, Hyderabad - 500 043
COURSE DESCRIPTION

Branch	**Electronics and Communication Engineering(ES)**				
Course Title	**Embedded wireless sensor networks**				
Course Code	BESC15				
Program	M.Tech				
Semester	II				
Course Type	Professional Elective-III				
Regulation	PG21				
Course Structure	Theory			Practical	
	Lecture	Tutorials	Credits	Laboratory	Credits
	3	0	3	-	-
Course Coordinator	Dr. Surekha Reddy Bandela,Assistant Professor				

I COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
M.TECH	BESC01	I	EMBEDDED SYSTEM DESIGN AND ARCHITECTURE

II COURSE OVERVIEW:

This course introducing basic ideas of wireless, embedded, internetworked sensor/actuator systems, an emerging technology that can provide visibility into and control over complex physical processes. This course covers the overview of WSN, Architecture of wireless networks, sensor programming techniques, programming models and wireless sensor networks for different applications. Wireless sensor networks are a becoming an important application of embedded systems, giving scope for unique designs and applications.

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Embedded Wireless sensor Networks	70 Marks	30 Marks	100

IV DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Power Point Presentations	x	Chalk & Talk	✓	Assignments	x	MOOC
x	Open Ended Experiments	✓	Seminars	x	Mini Project	x	Videos
x	Others						

V EVALUATION METHODOLOGY:

Each theory course will be evaluated for a total of 100 marks, out of which 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). **Semester End Examination (SEE):** The SEE is conducted for 70 marks of 3 hours duration. The syllabus for the theory courses is divided into FIVE modules and each module carries equal weightage in terms of marks distribution. The question paper pattern is as follows. Two full questions with "either" or "choice" will be drawn from each module. Each question carries 14 marks. There could be a maximum of three sub divisions in a question.

The emphasis on the questions is broadly based on the following criteria:

50%	To test the objectiveness of the concept
30%	To test the analytical skill of the concept
20%	To test the application skill of the concept

Continuous Internal Assessment (CIA):

For each theory course the CIA shall be conducted by the faculty / teacher handling the course. CIA is conducted for a total of 30 marks, with 20 marks for Continuous Internal Examination (CIE), 05 marks for Assignment and 05 marks for Alternative Assessment Tool (AAT). Two CIE Tests are Compulsory and sum of the two tests, along with the scores obtained in the assignment / AAT shall be considered for computing the final CIA of a student in a given course.

The CIE Tests/Assignment /AAT shall be conducted by the course faculty with due approval from the HOD. Advance notification for the conduction of Assignment/AAT is mandatory and the responsibility lies with the concerned course faculty. CIA is conducted for a total of 30 marks (Table 1), with 25 marks for Continuous Internal Examination (CIE), 05 marks for Quiz/ Alternative Assessment Tool (AAT).

Component	Theory			Total Marks
Type of Assessment	CIE Exam	Assignment	AAT	
CIA Marks	20	05	05	30

Continuous Internal Examination (CIE):

Two CIE exams shall be conducted at the end of the 8th and 16th week of the semester respectively. The CIE exam is conducted for 25 marks of 2 hours duration consisting of five descriptive type questions out of which four questions have to be answered where, each question carries 5 marks. Marks are awarded by taking average of marks scored in two CIE exams.

Quiz/Alternative Assessment Tool (AAT):

Two Quiz exams shall be online examination consisting of 25 multiple choice questions and are be answered by choosing the correct answer from a given set of choices (commonly four). Marks shall be awarded considering the average of two quizzes for every course. The AAT may include seminars, assignments, term paper, open ended experiments, five minutes video and MOOCs.

VI COURSE OBJECTIVES:

The students will try to learn:

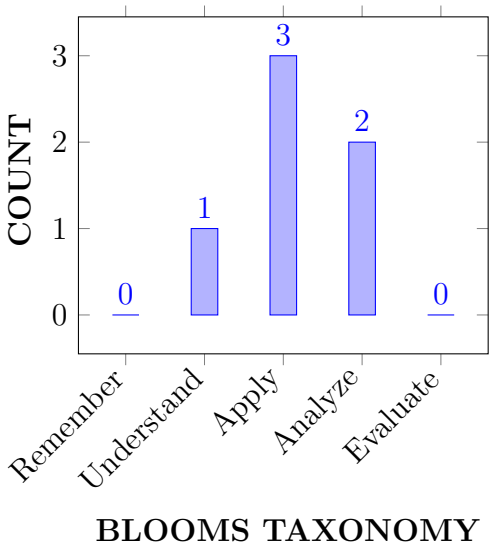
I	The characteristic requirements and sensor network scenarios to design the embedded wireless sensor networks.
II	The fundamentals of programming sensors and models are used to implement the wireless sensor networks.
III	Develop program wireless sensor networks using embedded C for real time applications.

VII COURSE OUTCOMES:

After successful completion of the course, students should be able to:

CO 1	**Relate** the concept of wireless sensor networks with characteristic requirements involved in demonstrating of sensor nodes.	Understand
CO 2	**Make use of** energy consumption of sensor nodes to improve the life span of wireless sensor networks.	Apply
CO 3	**Contrast** sensor network scenarios for designing of large scale wireless sensor networks.	Analyze
CO 4	**Identify** the optimisation and figure of merit to measure the performance characteristics of sensor networks.	Apply
CO 5	**Categorize** tiny os programming for providing interfaces among sensor nodes.	Analyze
CO 6	**Utilize** inter vehicle communication networks to enhance the safety of moving vehicles.	Apply

COURSE KNOWLEDGE COMPETENCY LEVEL



BLOOMS TAXONOMY

VIII PROGRAM OUTCOMES:

Program Outcomes	
PO 1	Independently carry out research / investigation and development work to solve practical problems.
PO 2	Write and present a substantial technical report / document.
PO 3	Demonstrate a degree mastery over the area as per the area of specialization of the program.The mastery should be at a level of higher than the requirements in the appropriate bachelor program.
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team.
PO 6	Recognize the need to engage in lifelong learning through continuing education and research.

IX HOW PROGRAM OUTCOMES ARE ASSESSED:

PROGRAM OUTCOMES		Strength	Proficiency Assessed by
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program.	2	SEE / CIE / AAT
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.	1	SEE / CIE / AAT
PO 6	Recognize the need to engage in lifelong learning through continuing education and research.	2	SEE / CIE / AAT

X MAPPING OF EACH CO WITH PO(s):

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1		-	✓	✓		✓
CO 2		-	✓	✓		✓
CO 3			✓	✓		✓
CO 4		-	✓	✓	-	✓
CO 5		-	✓	✓		✓
CO 6		-	✓	✓		✓

XI JUSTIFICATIONS FOR CO – PO/ PSO MAPPING -DIRECT :

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
CO1	PO 3	**understand** the concept of wireless sensor networks in **real time** systems with characteristic requirements involved in **demonstrating** of sensor nodes in real time scenario.**Analyze and design** innovative products by **Using of creativity** to **establish innovative solutions**	5
	PO 4	**understand** the concepts of embedded real time systems for real time embedded applications by **Managing** the design process and evaluate outcomes and **interpreting** of results and **Validation**	4
	PO 6	**Illustrate** the concepts **knowledge** of embedded real time systems for real time embedded applications by using **strengthen** in embedded and advanced engineering areas by **Working** with all levels of people in team	2
CO2	PO 3	**Demonstrate** energy consumption of sensor nodes byunderstanding embedded applications in real time scenario by**Analyzing and design innovative products Appl,y the complex engineering problems and their system components** by design and programming of sensor nodes in embedded systems **for solution development**	5
	PO 4	**Make use of** time constrained embedded systems using the concepts of **engineering** fundamentals to the solution of problem formulation and abstraction to establish innovative solutions for **Interpretation of results and Validation**	4
	PO 6	Improve the life span of wireless sensor networks by **Strengthen** in embedded and advanced engineering area and time constrained embedded systems using the concepts of **engineering fundamentals** to the solution of **problem formulation** and **abstraction** to establish innovative solutions.	4
CO 3	PO 3	**Contrast** the design process and evaluation outcomes for Knowledge, understanding and demonstrations of embedded applications in real time scenario for **designing** of large scale wireless sensor networks for**Solution development** or experimentation / Implementation in **Interpretation** of results and Validation	4

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
	PO 4	**Experimental Design** for large scale wireless sensor networks by**under take research** and **development projects** in the field of Embedded Systemstime constrained application as a member of a small group to meet design specifications.	3
	PO 6	**Build** time constrained embedded systems using the concepts of **engineering fundamentals to the solution of problem formulation and abstraction to establish innovative solutions** using RTOS (Real Time Operating System) rapid **design** and its programming	5
CO4	PO 3	**Problem formulation and abstraction** by **Identifying** engineering problems solution development and **implementation**in various applications of embedded wireless sensor networks.	4
	PO 4	**Apply** the skills and knowledge needed to serve as a professional engineer skilful at **designing** embedded systems by **Interpreting** algorithms of wireless sensor networks for target area coverage to improve the performance of wireless sensor networks.	3
	PO 6	**Recognize** the need to engage in **lifelong learning** through continuing education and research to **improve** the performance of wireless sensor networks.	3
CO5	PO 3	**Knowledge** understanding and demonstrations of embedded applications in real time scenario by **Examine** the architecture of multicore embedded systems in **Analyze** and **design** innovative products like wireless videosystems.	4
	PO 4	**Apply**the skills and knowledge needed to serve as a professional engineer skilful by learning the **architecture** of multicore embedded systems in signal processing applications by **Under** take research and **development** projects in the field of Embedded Systems.	4
	PO 6	**Using creativity** to establish innovative solutions by**Apply** the principles and architecture of multicore embedded systems to establish **Solution development** or experimentation / Implementation	4
CO 6	PO 3	**Demonstrate problem formulation and abstraction** in sensor networks for inter vehicle communication system in **Embedded systems.**	3

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
	PO 4	**Apply** the skills and knowledge needed to serve as a professional engineer skilful at **designing** embedded systems for effective use in inter vehicle communication networks to **Enchance** the safety of moving vehicles.	3
	PO 6	**Knowledge, understanding** and demonstrations of embedded applications in real time scenario for inter vehicle communication networks by **applying the principles and methodology of** inter vehicle communication system by **Experimental design** of communication networks.	5

XII TOTAL COUNT OF KEY COMPETENCIES FOR CO – PO MAPPING:

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
	6	6	9	10	7	8
CO 1	-	-	5	4	-	2
CO 2	-	-	5	4	-	4
CO 3	-	-	4	3	-	5
CO 4	-	-	4	3	-	3
CO 5	-	-	4	4	-	4
CO 6	-	-	3	3	-	5

XIII PERCENTAGE OF KEY COMPETENCIES FOR CO – PO:

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
	6	6	9	10	7	8
CO 1	-	-	55.5	40	-	25
CO 2	-	-	55.5	40	-	50
CO 3	-	-	44	30	-	62.5
CO 4	-	-	44	30	-	37.5
CO 5	-	-	44	30	-	50
CO 6	-	-	33	30	-	62.5

XIV COURSE ARTICULATION MATRIX (PO MAPPING):

CO'S and PO'S and CO'S and PSO'S on the scale of 0 to 3, 0 being no correlation, 1 being the low correlation, 2 being medium correlation and 3 being high correlation.

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	-	-	2	2	-	1
CO 2	-	-	2	2	-	2
CO 3	-	-	2	1	-	3
CO 4	-	-	2	1	-	1
CO 5	-	-	2	1	-	2
CO 6	-	-	1	1	-	3
TOTAL	-	-	**11**	**8**	-	**12**
AVERAGE	-	-	**2**	**1.3**	-	**2**

XV ASSESSMENT METHODOLOGY DIRECT:

Quiz	-	Tech - Talk	-	Certification	-
Term Paper	✓	Seminars	✓	Student Viva	-
Laboratory Practices	-	5 Minutes Video / Concept Video	-	Open Ended Experiments	-
Micro Projects	-	-	-	-	-

XVI SYLLABUS:

UNIT I	**INTRODUCTION TO WSN:**
	Introduction to WSN, challenges for WSNs, characteristic requirements, required mechanisms, C, hardware components, energy consumption of sensor nodes, operating systems and execution environments, some examples of sensor nodes.
UNIT II	**NETWORK ARCHITECTURE:**
	Sensor network scenarios, optimization goals and figures of merit, design principles for WSNs, service interfaces of WSNs, gateway concepts.
UNIT III	**SENSOR NETWORK IMPLEMENTATION:**
	Sensor programming, introduction to tiny OS programming and fundamentals of programming sensors using nes C. Algorithms for WSN: Techniques for protocol programming.
UNIT IV	**PROGRAMMING MODELS:**
	An introduction to the concept of cooperating objects and sensor networks, system architectures and programming models.

UNIT V	CASE STUDIES
	Wireless sensor networks for environmental monitoring, wireless sensor networks with mobile nodes, autonomous robotic teams for surveillance and monitoring, Inter-vehicle communication networks.

ANNEXURE - I

KEY ATTRIBUTES FOR ASSESSING PROGRAM OUTCOMES

PO Number	NBA Statement / Key Competencies Features (KCF)	No. of KCF's
PO 1	Independently carry out research / investigation and development work to solve practical problems. 1. Independence 2. Self driven 3. Quality of work 4. Problem identification and implementation 5. Demonstrate the solutions 6. Budget	6
PO 2	Write and present a substantial technical report / document. 1. Demonstrate and communicate effectively in writing report and document/ present orally. 2. Clarity (writing/ presentation) 3. Grammar/ punctuation (writing) 4. References 5. Speaking/ Presenting 6. Subject knowledge while preparing report	6
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program. 1. Knowledge, understanding and demonstrations of embedded applications in real time scenario. 2. Ability to demonstrate and communicate effectively in writing / orally societal problems. 3. Analyze and design innovative products 4. Problem formulation and abstraction 5. Use creativity to establish innovative solutions 6. Experimental design 7. Manage the design process and evaluate outcomes using modern tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation	9

PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications. 1. Understand the need of users with the importance of considerations such as IoT and Robotics 2. Scientific principles and methodology 3. Problem formulation and abstraction 4. Use creativity to establish innovative solutions 5. Experimental design 6. Manage the design process and evaluate outcomes 7. Computer software / simulation packages / diagnostic equipment / technical library resources / literature search tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation 10. Under take research and development projects in the field of Embedded Systems	10
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team. 1. Maturity – requiring only the achievement of goals to drive their performance 2. Self-direction (take a vaguely defined problem and systematically work to resolution) 3. Individual performance is used during the classroom periods, in the hands-on labs, and in the design projects. 4. Knowledge of management techniques which may be used achieve engineering objectives 5. Meeting deadlines and producing solutions 6. Work with all level of people in the team. 7. Demonstrate ability to work well with a team	7
PO 6	Recognize the need to engage in lifelong learning through continuing education and research. 1. Project management and research orientation/ Ph.D 2. Strengthen in embedded and advanced engineering areas 3. Continuing education efforts through literature and courses 4. Personal development 5. Plan tasks and resources, manage risk and produce deliverables 6. Meeting deadlines and producing solutions 7. Work with all levels of people in team 8. Demonstrated ability to work well with a team	8

INSTITUTE OF AERONAUTICAL ENGINEERING
(Autonomous)
Dundigal, Hyderabad - 500 043
COURSE DESCRIPTION

Branch	**Electronics and Communication Engineering(ES)**				
Course Title	**Embedded Networking**				
Course Code	BESC19				
Program	M.Tech-Embedded Systems				
Semester	II				
Course Type	Professional Elective-IV				
Regulation	PG21				
Course Structure	Theory			Practical	
	Lecture	Tutorials	Credits	Laboratory	Credits
	3	0	3	-	-
Course Coordinator	Dr.V Padmanabha Reddy, Professor				

I COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
M.Tech	BESC06	I	Wireless LANs and PANs

II COURSE OVERVIEW:

Embedded networking course deals related to the design and synthesis of high-performance embedded computer systems and networks. The emphasis is on the fundamental concepts and analytical techniques that are applicable to a range of embedded and networking applications, rather than on specific embedded architectures, software development, or system-level integration. This system point of view guides designers in dealing with the trade-offs to optimize performance, power, cost, and other system-level non-functional requirements.

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Embedded Networking	70 Marks	30 Marks	100

IV DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	PowerPoint Presentation	✓	Chalk & Talk	✓	Assignments	x	MOOC
x	Open Ended Experiments	x	Seminars	x	Mini Projects	x	Videos
x	Others						

V EVALUATION METHODOLOGY:

The course will be evaluated for a total of 100 marks, with 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). Out of 30 marks allotted for CIA during the semester, marks are awarded by taking average of two CIA examinations or the marks scored in the make-up examination. **Semester End Examination (SEE):** The SEE shall be conducted

for 70 marks of 3 hours duration. The syllabus for the theory courses shall be divided into FIVE units and each unit carries equal weightage in terms of marks distribution. The question paper pattern shall be as defined below. Two full questions with 'either' 'or' choice will be drawn from each unit. Each question carries 14 marks. There could be a maximum of three sub divisions in a question.
The emphasis on the questions is broadly based on the following criteria:

50 %	To test the objectiveness of the concept
30 %	To test the analytical skill of the concept
20 %	To test the application skill of the concept

Continuous Internal Assessment (CIA):
For each theory course the CIA shall be conducted by the faculty / teacher handling the course. CIA is conducted for a total of 30 marks, with 20 marks for Continuous Internal Examination (CIE), 05 marks for Assignment and 05 marks for Alternative Assessment Tool (AAT).**Two CIE Tests are Compulsory** and sum of the two tests, along with the scores obtained in the assignment / AAT shall be considered for computing the final CIA of a student in a given course.

Component	Theory			Total Marks
Type of Assessment	CIE Exam	Assignment	AAT	
CIA Marks	20	05	05	30

Continuous Internal Examination (CIE):
Two CIE exams shall be conducted at the end of the 9th and 17th th week of the semester respectively for 10 marks each of 2 hours duration consisting of five descriptive type questions out of which four questions have to be answered. The valuation and verification of answer scripts of CIE exams shall be completed within a week after the conduct of the Examination.

Assignment:
To improve the writing skills in the course an assignment will be evaluated for 05 marks. One assignment has to submit at the end of the CIE2 for the questions provided by the each course coordinator in that semester. Assignments to be handed in as loose paper collection stapled together at the top left corner. The assignment should be presented as a professional report. It must consist of a cover sheet, content page, and should have an introduction, a body, a conclusion or recommendation, and a reference page.

Quiz/Alternative Assessment Tool (AAT):
In order to encourage innovative methods while delivering a course, the faculty members are encouraged to use the Alternative Assessment Tool (AAT). This AAT enables faculty to design own assessment patterns during the CIA. The AAT enhances the autonomy (freedom and flexibility) of individual faculty and enables them to create innovative pedagogical practices. If properly applied, the AAT converts the classroom into an effective learning center.**The AAT may includes, concept videos, course related term paper, technical seminar, term paper, paper presentations conducted by reputed organizations relevant to the course etc.**

VI COURSE OBJECTIVES:

The students will try to learn:

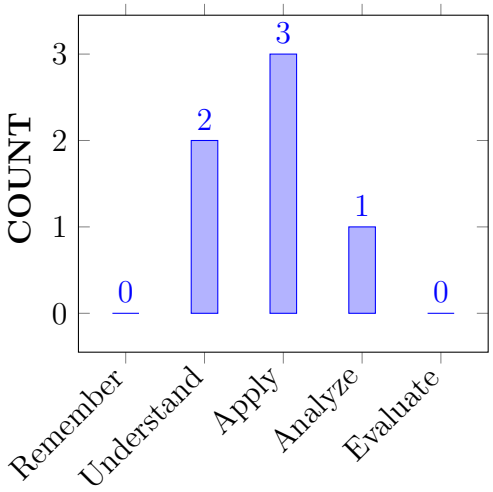
I	The basic embedded communication protocols and their use in embedded systems.
II	The fundamental concepts of Ethernet, its design and protocols used in embedded networking
III	The characteristics of wireless embedded networking protocols useful for design and implementation of internet and wireless devices.

VII COURSE OUTCOMES:

After successful completion of the course, students should be able to:

CO 1	**Illustrate** Serial and parallel communication protocols used for data Communication in embedded networking systems.	Understand
CO 2	**Infer** the USB and CAN serial bus system used to communicate between several embedded micro controllers and network systems.	Apply
CO 3	**Explain** the basic principles of Ethernet for providing an internet connection, connect devices to a local network	Apply
CO 4	**Develop** the frame work for embedded Ethernet protocols used to create local area networks.	Apply
CO 5	**Make use of** the various client-server programming models for the users to access the information stored on a web server on the Internet	Apply
CO 6	**Classify** the wireless local area networks for the user device to communicate with the network.	Analyze

COURSE KNOWLEDGE COMPETENCY LEVEL



BLOOMS TAXONOMY

VIII PROGRAM OUTCOMES:

Program Outcomes	
PO 1	Independently carry out research / investigation and development work to solve practical problems.
PO 2	Write and present a substantial technical report / document.
PO 3	Demonstrate a degree mastery over the area as per the area of specialization of the program.The mastery should be at a level of higher than the requirements in the appropriate bachelor program.
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team.
PO 6	Recognize the need to engage in lifelong learning through continuing education and research.

IX HOW PROGRAM OUTCOMES ARE ASSESSED:

PROGRAM OUTCOMES		Strength	Proficiency Assessed by
PO 3	Demonstrate a degree mastery over the area as per the area of specialization of the program.The mastery should be at a level of higher than the requirements in the appropriate bachelor program.	3	SEE / CIE / AAT
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.	3	SEE / CIE / AAT

X MAPPING OF EACH CO WITH PO(s):

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	-	-	✓	✓	-	-
CO 2	-	-	✓	✓	-	-
CO 3	-	-	✓	✓	-	-

XVII SYLLABUS:

MODULE I	**EMBEDDED COMMUNICATION PROTOCOLS**
	Embedded Networking: Introduction,serial/parallel communication,serial communication protocols, RS232 standard, RS485, synchronous serial protocols, serial peripheral interface, inter integrated circuits I2C– pc parallel port programming, ISA/PCI bus protocols, fire wire
MODULE II	**USB AND CAN BUS**
	USB bus, introduction, speed identification on the bus, USB states, USB bus communication: Packets,data flow types, enumeration, descriptors,PIC18 micro controller USB interface, C programs; CAN bus: Introduction, frames, bit stuffing, types of errors, nominal bit timing, PIC micro controller CAN interface, simple application with CAN.
MODULE III	**ETHERNET BASICS**
	Elements of a network, inside Ethernet, building a network: Hardware options, cables, connections and network speed. Design choices: Selecting components, Ethernet controllers, using the internet in local and communications, inside the Internet protocol.
MODULE IV	**EMBEDDED ETHERNET**
	Exchanging messages using UDP and TCP: Inside UDP and TCP, Serving web pages with dynamic data, serving web pages that respond to user Input, email for embedded systems, using FTP, keeping devices and network secure.
MODULE V	**WIRELESS EMBEDDED NETWORKING**
	Wireless sensor networks: Introduction, applications, network topology, localization approaches, time synchronization, energy efficient MAC protocols, SMAC, energy efficient and robust routing, data centric routing: direct diffusion, pullvs. push diffusion.

ELECTRONICS AND COMMUNICATION ENGINEERING
COURSE DESCRIPTION

Course Title	Advanced Microprocessors and Interfacing Laboratory				
Course Code	BESC23				
Program	M.Tech(EMBEDDED SYSTEMS)				
Semester	II				
Course Type	Laboratory				
Regulation	PG-21				
Course Structure	Theory			Practical	
	Lecture	Tutorials	Credits	Laboratory	Credits
	-	-	-	4	2
Course Coordinator	Mr. B.Brahmaiah,Assistant Professor,ECE				

I COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
B.Tech	AECB24	V	Microprocessors and Microcontrollers
M.Tech	BESC02	I	Microcontrollers and Programmable Digital Signal Processing

II COURSE OVERVIEW:

This course outlines the design and implementation of embedded systems using suitable hardware(ARM and PSOC) and Keil Embedded C software tools.The instruction set, Embedded C programming for I/O and memory interfacing techniques are covered.The hands-on experience acquired by the student's during the course makes them to carry out processor/controller based projects and extend their knowledge on the latest trends and technologies in the field of embedded system.

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Advanced Microprocessors and Interfacing Laboratory	70 Marks	30 Marks	100

IV DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Demo Video	✓	Lab Worksheets	✓	Viva Questions	✓	Probing further Questions

V EVALUATION METHODOLOGY:

Each laboratory will be evaluated for a total of 100 marks consisting of 30 marks forinternal assessment and 70 marks for semester end lab examination. Out of 30 marks ofinternal assessment, continuous lab assessment will be done for 20 marks for the day today performance and 10 marks for the final internal lab assessment.

Semester End Examination (SEE): The semester end labexamination for 70 marks shall be conducted by two examiners, one of them beingInternal Examiner and the other being External Examiner, both nominated by thePrincipal from the panel of experts recommended by Chairman, BOS. The emphasis on the experiments is broadly based on the following criteria given in Table: 1

	Experiment Based	Programming based
20 %	Objective	Purpose
20 %	Analysis	Algorithm
20 %	Design	Programme
20 %	Conclusion	Conclusion
20 %	Viva	Viva

Continuous Internal Assessment (CIA):

CIA is conducted for a total of 30 marks (Table 1), with 20 marks for continuous lab assessment during day to day performance, 10 marks for final internal lab assessment.

Component	**Laboratory**		**Total Marks**
Type of Assessment	**Day to day performance**	**Final internal lab assessment**	
CIA Marks	20	10	30

Continuous Internal Examination (CIE):

One CIE exams shall be conducted at the end of the 16th week of the semester. The CIE exam is conducted for 10 marks of 3 hours duration.

1. **Experiment Based**

Objective	Analysis	Design	Conclusion	Viva	Total
2	2	2	2	2	10

2. **Programming Based**

Objective	Analysis	Design	Conclusion	Viva	Total
2	2	2	2	2	10

VI COURSE OBJECTIVES:

The students will try to learn:

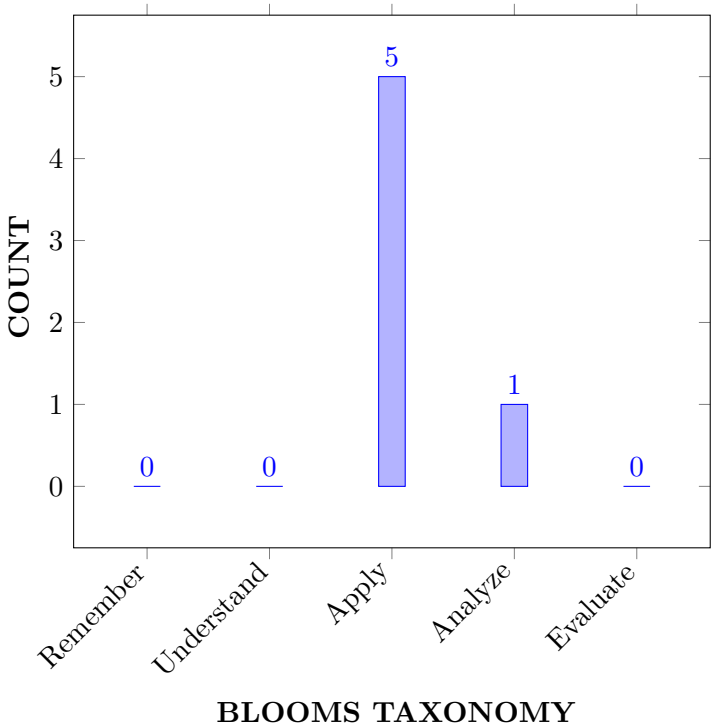
I	The embedded C for reading data from port pins.
II	The interfacing of data I/O devices with microcontroller.
III	The serial communication and port RTOS on microcontroller.

VII COURSE OUTCOMES:

After successful completion of the course, students should be able to:

CO 1	**Make use** of emulators and cross-compilers for writing, compiling and running an embedded C language programs on ARM and PSoC training boards.	Apply
CO 2	**Develop** Embedded C language programs for accomplishing code to reading the data from ports, blinking the LED and interfacing of switch and buzzer , temperature sensors and other display units to the ARM processors.	Apply
CO 3	**Select** suitable RTOS of ARM and PSoC and write Embedded C language program to run 2 to 3 tasks simultaneously.	Apply
CO 4	**Identify** different filters and timers in PSoC for transmitting the data between PSOC and peripherals.	Apply
CO 5	**Utilize** Analog to Digital and Digital to Analog converters with PSoC for data conversion.	Apply
CO 6	**Build** an interface between PSoC and peripherals to provide solutions to the real world problems.	Analyze

COURSE KNOWLEDGE COMPETENCY LEVEL



VIII PROGRAM OUTCOMES:

Program Outcomes	
PO 1	Independently carry out research / investigation and development work to solve practical problems.
PO 2	Write and present a substantial technical report / document.
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program.
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skillful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team.
PO 6	Recognize the need to engage in life long learning through continuing education and research.

IX HOW PROGRAM OUTCOMES ARE ASSESSED:

Program		Strength	Proficiency Assessed by
PO1	Independently carry out research / investigation and development work to solve practical problems.	1	Day to Day Evaluation/CIE/SEE
PO3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program.	3	Day to Day Evaluation/CIE/SEE
PO4	Apply the skills and knowledge needed to serve as a professional engineer skillful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.	2	Day to Day Evaluation/CIE/SEE

3 = High; 2 = Medium; 1 = Low

X JUSTIFICATIONS FOR CO – PO/ PSO MAPPING -DIRECT:

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
CO1	PO 3	Demonstrate the importance of embedded technologies and design new innovative products for solving society relevant problems for applying **knowledge, understanding and demonstrations of embedded applications in real time scenario** and **use creativity to establish innovative solutions** to get the **solution development** and **communicate effectively in writing / orally societal problems**.	4
	PO 4	Apply the concepts (knowledge) of embedded systems using their architectures by using **Scientific principles and methodology** and **problem formulation and abstraction** for **understand the need of users with the importance of considerations such as IoT and Robotics** and **use creativity to establish the solutions** and make the **experimental design**.	5
CO2	PO 3	Demonstrate the importance of embedded technologies and design new innovative products for solving society relevant problems for applying **knowledge, understanding and demonstrations of embedded applications in real time scenario** and **use creativity to establish innovative solutions** and make the **experimental design** with **manage the design process and evaluate outcomes using modern tools** to get **the solution development** and **communicate effectively in writing / orally societal problems**.	6
	PO 4	Apply the concepts (knowledge) of embedded systems using their architectures by using **Scientific principles and methodology** and **problem formulation and abstraction** for **understand the need of users with the importance of considerations such as IoT and Robotics** and **use creativity to establish the solutions** and make the **experimental design**.	5

XIV SYLLABUS:

WEEK I	**LED BLINKING**
	Program to toggle all the led to port and with some time delay using ARM .
WEEK II	**INTERFACING OF LCD**
	Program to Interface LCD to ARM7 and display message on screen.
WEEK III	**INTERFACING OF KEYPAD**
	Program to Interface keypad with ARM7.
WEEK IV	**INTERFACING OF LED**
	Program to Interface LED with ARM7.
WEEK V	**INTERFACING OF STEPPER MOTOR**
	Program to interfacing Stepper motor .
WEEK VI	**INTERFACING OF DC MOTOR**
	Program to interfacing DC motor .
WEEK VII	**PROGRAMMABLE GAIN AMPLIFIER**
	Study and characterization of the Programmable Gain Amplifier (PGA): Gain Bandwidth Product.
WEEK VIII	**FILTERS**
	Realization of Low pass, High pass and Band pass filters and their characterization.
WEEK IX	**ADC AND DAC**
	Experiments with on-chip ADC and DACs.
WEEK X	**DIGITAL FUNCTION IMPLEMENTATION**
	Digital Function Implementation using Digital Blocks. a. Timer experiment b. Counter for blinking LED c. PWM experiment d. Digital buffer and digital inverter
WEEK XI	**ALU OPERATIONS**
	Logical/Arithmetic function implementation using Microcontroller.
WEEK XII	**TIMER**
	Timer operation in different Modes.

ELECTRONICS AND COMMUNICATION ENGINEERING
COURSE DESCRIPTION

Course Title	INTERNET OF THINGS LABORATORY				
Course Code	BESC24				
Program	M.Tech(EMBEDDED SYSTEMS)				
Semester	II				
Course Type	Laboratory				
Regulation	PG-21				
Course Structure	Theory			Practical	
	Lecture	Tutorials	Credits	Laboratory	Credits
	-	-	-	4	2
Course Coordinator	Dr. B.Polaiah, Professor,ECE				

I COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
M.Tech	BESC02	I	Microcontrollers and Programmable Digital Signal Processing

II COURSE OVERVIEW:

This course outlines the design and implementation of embedded systems using suitable hardware(ARM and PSOC) and Keil Embedded C software tools.The instruction set, Embedded C programming for I/O and memory interfacing techniques are covered.The hands-on experience acquired by the student's during the course makes them to carry out processor/controller based projects and extend their knowledge on the latest trends and technologies in the field of embedded system.

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Advanced Microprocessors and Interfacing Laboratory	70 Marks	30 Marks	100

IV DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Demo Video	✓	Lab Worksheets	✓	Viva Questions	✓	Probing further Questions

V EVALUATION METHODOLOGY:

Each laboratory will be evaluated for a total of 100 marks consisting of 30 marks forinternal assessment and 70 marks for semester end lab examination. Out of 30 marks ofinternal assessment, continuous lab assessment will be done for 20 marks for the day today performance and 10 marks for the final internal lab assessment.

Semester End Examination (SEE): The semester end labexamination for 70 marks shall be conducted by two examiners, one of them beingInternal Examiner and the other being External Examiner, both nominated by thePrincipal from the panel of experts recommended by Chairman, BOS. The emphasis on the experiments is broadly based on the following criteria given in Table: 1

	Experiment Based	Programming based
20 %	Objective	Purpose
20 %	Analysis	Algorithm
20 %	Design	Programme
20 %	Conclusion	Conclusion
20 %	Viva	Viva

Continuous Internal Assessment (CIA):

CIA is conducted for a total of 30 marks (Table 1), with 20 marks for continuous lab assessment during day to day performance, 10 marks for final internal lab assessment.

Component	**Laboratory**		**Total Marks**
Type of Assessment	**Day to day performance**	**Final internal lab assessment**	
CIA Marks	20	10	30

Continuous Internal Examination (CIE):

One CIE exams shall be conducted at the end of the 16th week of the semester. The CIE exam is conducted for 10 marks of 3 hours duration.

1. **Experiment Based**

Objective	Analysis	Design	Conclusion	Viva	Total
2	2	2	2	2	10

2. **Programming Based**

Objective	Analysis	Design	Conclusion	Viva	Total
2	2	2	2	2	10

VI COURSE OBJECTIVES:

The students will try to learn:

I	The IoT using Arduino programming.
II	The interfacing of data I/O devices with Arduino.
III	The design steps using Rasberry Pi.

VII COURSE OUTCOMES:

After successful completion of the course, students should be able to:

CO 1	**Make use of** Arduino programming for Internet of Things (IoT) on Controlling RGB LED and Wi-Fi Module .	Apply
CO 2	**Develop** Programming for Internet of things with Android and Arduino to control a remote LED and interface HC-05 Bluetooth Module.	Apply
CO 3	**Choose** suitable temperature sensor to Interface Tempaetaure sensor and Monitoring the values using IoT with Arduino Uno and display digital value on LCD.	Apply
CO 4	**Identify** different IR sensors to Interface IR sensors and Bluetooth for detecting obstacle using Arduino with android application.	Apply
CO 5	**Utilize** GPS module to track location with GPS module and send data from Arduino to Webpage using Wi-Fi module	Apply
CO 6	**Analyze** the interface sensors on a motion sensor by using GPIO pins with a Raspberry Pi. and Gas sensor for detection and monitoring the values.	Analyze

COURSE KNOWLEDGE COMPETENCY LEVEL

X	Assessment of Mini Projects by Experts		

XIV SYLLABUS:

WEEK I	**IOT WITH ARDUINO PROGRAMMING**
	Introduction to Internet of Things (IoT) using Arduino programming.
WEEK II	**CONROLLING RGB LED**
	Programming for Controlling RGB LED using Arduino and Wi-Fi Module
WEEK III	**IOT TO CONTROL REMOTE LED**
	Programming for Internet of things with Android and Arduino. Build an Arduino IoT to control a remote LED
WEEK IV	**INTERFACING BLUETOOTH MODULE**
	Programming for how to interface HC-05 Bluetooth Module with Arduino UNO for various application.
WEEK V	**INTERFACING TO TEMPERATURE SENSOR**
	Programming to Interface Tempaetaure sensor and Monitoring using IoT with Arduino Uno and display digital value on LCD.
WEEK VI	**INTERFCAING IR SENSOR**
	Programming to Interface IR sensors and Blue tooth for detecting obstacle using Arduino with android Application.
WEEK VII	**TRACK LOCATION**
	Programming for Node MCU for track location without using GPS module
WEEK VIII	**SEND DATA FROM ARDUINO TO WEB PAGE**
	Programming for how to send data from Arduino to Webpage using Wi-Fi module.
WEEK IX	**IOT WITH RASBERRY PI**
	Introduction to Internet of things (IoT) by using a Raspberry Pi to connect devices.
WEEK X	**SETUP WI-FI ON RASBERRY PI USING USB**
	Programming for how to Setup Wi-Fi on Raspberry Pi 2 using USB Dongle
WEEK XI	**INTERFACE TO MOTION SENSOR**
	Programming to interface a motion sensor to use GPIO pins with a Raspberry Pi.
WEEK XII	**INTERFACE TO GAS SENSOR**
	Programming to interface Gas sensor for detection and monitoring using Arduino and IoT.

COURSE DESCRIPTION

Department	ELECTRONICS AND COMMUNICATION ENGINEERING				
Course Title	COMMUNICATION NETWORKS				
Course Code	BESC29				
Program	M.Tech				
Semester	III				
Course Type	Professional Elective				
Regulation	PG-21				
Course Structure	Theory			Practical	
	Lecture	Tutorials	Credits	Laboratory	Credits
	3	-	3	-	-
Course Coordinator	Ms. B Lakshmi Prasanna, Asst.Professor				

I COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
M.Tech	BESC06	I	Wireless LANS and PANS
M.Tech	BESC14	II	Internet of Things

II COURSE OVERVIEW:

This course provides the basic principles of communication networks and routing protocols. The performance of network architecture, TCP and various communication protocols.The applications include resource sharing, exchange of information by means of e-mails, video conferences and Parallel computing.

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Communication Networks	70 Marks	30 Marks	100

IV CONTENT DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Power Point Presentations	x	Chalk & Talk	✓	Assignments	✓	MOOC
x	Open Ended Experiments	✓	Seminars	x	Mini Project	-	Videos
x	Others						

V EVALUATION METHODOLOGY:

Each theory course will be evaluated for a total of 100 marks, out of which 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). **Semester End Examination (SEE):** The SEE is conducted for 70 marks of 3 hours duration. The syllabus for the theory courses is divided into FIVE modules and each module carries equal weightage in terms of marks distribution. The question paper pattern is as follows. Two full questions with "either" or "choice" will be drawn from each module. Each question carries 14 marks. There could be a maximum of three sub divisions in a question.

The emphasis on the questions is broadly based on the following criteria:

50 %	To test the objectiveness of the concept
30 %	To test the analytical skill of the concept
20 %	To test the application skill of the concept

Continuous Internal Assessment (CIA):
For each theory course the CIA shall be conducted by the faculty / teacher handling the course. CIA is conducted for a total of 30 marks, with 20 marks for Continuous Internal Examination (CIE), 05 marks for Assignment and 05 marks for Alternative Assessment Tool (AAT). Two CIE Tests are Compulsory and sum of the two tests, along with the scores obtained in the assignment / AAT shall be considered for computing the final CIA of a student in a given course.

The CIE Tests/Assignment /AAT shall be conducted by the course faculty with due approval from the HOD. Advance notification for the conduction of Assignment/AAT is mandatory and the responsibility lies with the concerned course faculty. CIA is conducted for a total of 30 marks (Table 1), with 25 marks for Continuous Internal Examination (CIE), 05 marks for Quiz/ Alternative Assessment Tool (AAT).

Component	Theory			Total Marks
Type of Assessment	CIE Exam	Assignment	AAT	
CIA Marks	20	05	05	30

Continuous Internal Examination (CIE):
Two CIE exams shall be conducted at the end of the 8th and 16th week of the semester respectively. The CIE exam is conducted for 25 marks of 2 hours duration consisting of five descriptive type questions out of which four questions have to be answered where, each question carries 5 marks. Marks are awarded by taking average of marks scored in two CIE exams.

Quiz/Alternative Assessment Tool (AAT):
Two Quiz exams shall be online examination consisting of 25 multiple choice questions and are be answered by choosing the correct answer from a given set of choices (commonly four). Marks shall be awarded considering the average of two quizzes for every course. The AAT may include seminars, assignments, term paper, open ended experiments, five minutes video and MOOCs.

VI COURSE OBJECTIVES:

The students will try to learn:

I	The computer networks, printers and other peripherals are the transmission medium for data communication and network.
II	The computer and communication network applications are for the storage devices, Internet and Instant messaging.
III	The queuing models are for the mathematical study of waiting in lines along with simulation of the network.

VII COURSE OUTCOMES:

After successful completion of the course, students should be able to:

CO 1	**Demonstrate** the functionality of layered and computer network architecture for reducing the complexity of communication network	Understand
CO 2	**Make use of** various end to end protocols for delivering messages and synchronization between the sender and the receiver.	Apply
CO 3	**Utilize** the applications World Wide Web and multimedia information between computers on the Internet Clocks.	Apply
CO 4	**Apply** the mathematical functions to solve computational problems in computer networking domain resolutions.	Apply
CO 5	**Illustrate** the importance of queuing models, IPv6, Switching and bridging for communication network for communication network.	Understand
CO 6	**Analyze** the routing algorithms to solve scaling issues and queuing issues in communication network.	Analyze

XI JUSTIFICATIONS FOR CO – PO/ PSO MAPPING -DIRECT:

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
CO1	PO 2	Understand the importance of network types, suitable transmission medium, devices and the Internet in supporting business communications and everyday activities by understanding fundamentals of Computer engineering specialization and scientific principles.	1
CO2	PO 2	Understand the significance of data communication models, packet switching, circuit switching for internal and external operations, in data communications and networking using mathematical principles, fundamental of Computer engineering specialization and scientific principles..	2
CO3	PO 1	Explain the concept of Hamming distance, and the significance of the minimum Hamming Distance and its relationship to errors by understanding mathematical principles and scientific principles.	3
CO4	PO 4	Describe the relationship between data and signals, their types, behavior, properties, characterization and transmission through the physical layer by understanding mathematical principles and scientific principles..	2
	PO 3	Explain the role of Protocol in data transmission and types of their versions by understanding mathematical principles and scientific principles.	3
CO5	PO 1	Analyze the correct transport layer protocol, such as TCP, UDP, SCTP to transfer data segments in the networks using mathematical principles and scientific principles.	3
	PO 2	Apply standardised protocols in applications for secure data transmission in the network by applying the knowledge of computer engineering fundamentals, mathematical principles, and scientific principles..	2

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
CO6	PO 4	Describe importance of email system by apply the the knowledge of computer engineering fundamentals, and scientific principles..	2

XII TOTAL COUNT OF KEY COMPETENCIES FOR CO – PO/ PSO MAPPING:

CO'S and PO'S and CO'S and PSO'S on the scale of 0 to 3, 0 being no correlation, 1 being the low correlation, 2 being medium correlation and 3 being high correlation.

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
	6	6	9	10	7	8
CO 1	6	-	-	-	-	-
CO 2	6	2	-	-	–	-
CO 3	6	2	-	-	-	-
CO 4	-	2	-	-	-	-
CO 5	4	2	-	-	-	-
CO 6	4	-	-	-	-	-

XIII PERCENTAGE OF KEY COMPETENCIES FOR CO – PO/ PSO :

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
	6	6	9	10	7	8
CO 1	100	-		-	-	-

XVI ASSESSMENT METHODOLOGY INDIRECT:

✓	**End Semester OBE Feed Back**

XVII SYLLABUS:

MODULE I	**Introduction**
	Introduction to communication system,Architecture of communication network
MODULE II	**CONNECTING NODES**
	Connecting nodes: - Connecting links, Encoding, framing, Reliable transmission, Ethernet and Multiple access networks, Wireless networks
MODULE III	**QUEUING MODELS**
	Queuing models –For a) one or more servers b) within finite and finite queue size c) Infinite population Internetworking: - Switching and bridging, IPv4, Addressing, Routing Protocols, Scale issues, Routers - Architecture,IPv6.
MODULE IV	**END-TO-END PROTOCOLS**

	End-to-End Protocols:-Services, Multiplexing, De-multiplexing, UDP, TCP, RPC, RTP
MODULE V	**CONGESTION CONTROL AND RESOURCE ALLOCATION**
	Congestion control and Resource Allocation- Issues, Queuing disciplines, TCP congestion control, Congestion Avoidance, QoS Applications: Domain Name Resolution, File Transfer, Electronic Mail, WWW, Multimedia Applications. Network monitoring – Packet sniffing tools such as Wireshark Simulations using NS2/OPNET.

ANNEXURE - I

KEY ATTRIBUTES FOR ASSESSING PROGRAM OUTCOMES

PO Number	NBA Statement / Key Competencies Features (KCF)	No. of KCF's
PO 1	Independently carry out research / investigation and development work to solve practical problems. 1. Independence 2. Self driven 3. Quality of work 4. Problem identification and implementation 5. Demonstrate the solutions 6. Budget	6
PO 2	Write and present a substantial technical report / document. 1. Demonstrate and communicate effectively in writing report and document/ present orally. 2. Clarity (writing/ presentation) 3. Grammar/ punctuation (writing) 4. References 5. Speaking/ Presenting 6. Subject knowledge while preparing report	6

PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program. 1. Knowledge, understanding and demonstrations of embedded applications in real time scenario. 2. Ability to demonstrate and communicate effectively in writing / orally societal problems. 3. Analyze and design innovative products 4. Problem formulation and abstraction 5. Use creativity to establish innovative solutions 6. Experimental design 7. Manage the design process and evaluate outcomes using modern tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation	9
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications. 1. Understand the need of users with the importance of considerations such as IoT and Robotics 2. Scientific principles and methodology 3. Problem formulation and abstraction 4. Use creativity to establish innovative solutions 5. Experimental design 6. Manage the design process and evaluate outcomes 7. Computer software / simulation packages / diagnostic equipment / technical library resources / literature search tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation 10. Under take research and development projects in the field of Embedded Systems	10
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team. 1. Maturity – requiring only the achievement of goals to drive their performance 2. Self-direction (take a vaguely defined problem and systematically work to resolution) 3. Individual performance is used during the classroom periods, in the hands-on labs, and in the design projects. 4. Knowledge of management techniques which may be used achieve engineering objectives 5. Meeting deadlines and producing solutions 6. Work with all level of people in the team. 7. Demonstrate ability to work well with a team	7

PO 6	Recognize the need to engage in lifelong learning through continuing education and research. 1. Project management and research orientation/ Ph.D 2. Strengthen in embedded and advanced engineering areas 3. Continuing education efforts through literature and courses 4. Personal development 5. Plan tasks and resources, manage risk and produce deliverables 6. Meeting deadlines and producing solutions 7. Work with all levels of people in team 8. Demonstrated ability to work well with a team	8

INSTITUTE OF AERONAUTICAL ENGINEERING
(Autonomous)
Dundigal, Hyderabad - 500 043

COURSE DESCRIPTION

Branch	**Electronics and Communication Engineering(ES)**				
Course Title	**Research Methodology and IPR**				
Course Code	BHSC11				
Program	M.Tech				
Semester	III				
Course Type	Core				
Regulation	IARE - PG21				
Course Structure	Theory			Practical	
	Lecture	Tutorials	Credits	Laboratory	Credits
	2	-	2	-	-
Course Coordinator	Mr. B Santhosh Kumar, Assistant Professor				

I COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
M.Tech	-	-	-

II COURSE OVERVIEW:

This course provides the basic concepts on research methodology and intellectual property rights. This course emphasis on sampling techniques, data collection, writing Reports, Projects, Dissertations, thesis and articles for publication in academic journals, avail the intellectual property rights of the inventors or owners for their assets like patents on innovative design, copy rights on literary and artistic works, trademark on goods & services and geographical indications on products famous for specific geographical areas.This course makes use of the potential future economic benefits to the intellectual property owner or authorized user.

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Research Methodology and IPR	70 Marks	30 Marks	100

IV CONTENT DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Power Point Presentations	✓	Chalk & Talk	✓	Assignments	x	MOOC
x	Open Ended Experiments	x	Seminars	x	Mini Project	x	Videos
✓	Others						

V EVALUATION METHODOLOGY:

The course will be evaluated for a total of 100 marks, with 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). Out of 30 marks allotted for CIA during the semester, marks are awarded by taking average of two CIA examinations or the marks scored in the make-up examination.

Semester End Examination (SEE): The SEE shall be conducted for 70 marks of 3 hours duration. The syllabus for the theory courses shall be divided into FIVE units and each unit carries equal weightage in terms of marks distribution. The question paper pattern shall be as defined below. Two full questions with 'either' 'or' choice will be drawn from each unit. Each question carries 14 marks.

There could be a maximum of three sub divisions in a question.
The emphasis on the questions is broadly based on the following criteria:

50%	To test the objectiveness of the concept
30%	To test the analytical skill of the concept
20%	To test the application skill of the concept

Continuous Internal Assessment (CIA):
For each theory course the CIA shall be conducted by the faculty / teacher handling the course. CIA is conducted for a total of 30 marks, with 20 marks for Continuous Internal Examination (CIE), 05 marks for Assignment and 05 marks for Alternative Assessment Tool (AAT). **Two CIE Tests are Compulsory** and sum of the two tests, along with the scores obtained in the assignment / AAT shall be considered for computing the final CIA of a student in a given course.

Component	**Theory**			**Total Marks**
Type of Assessment	**CIE Exam**	**Assignment**	**AAT**	
CIA Marks	20	05	05	30

Continuous Internal Examination (CIE):
Two CIE exams shall be conducted at the end of the 9^{th} and 17^{th} th week of the semester respectively for 10 marks each of 2 hours duration consisting of five descriptive type questions out of which four questions have to be answered. The valuation and verification of answer scripts of CIE exams shall be completed within a week after the conduct of the Examination.

Assignment:
To improve the writing skills in the course an assignment will be evaluated for 05 marks. One assignment has to submit at the end of the CIE2 for the questions provided by the each course coordinator in that semester. Assignments to be handed in as loose paper collection stapled together at the top left corner. The assignment should be presented as a professional report. It must consist of a cover sheet, content page, and should have an introduction, a body, a conclusion or recommendation, and a reference page.

Alternative Assessment Tool (AAT):
In order to encourage innovative methods while delivering a course, the faculty members are encouraged to use the Alternative Assessment Tool (AAT). This AAT enables faculty to design own assessment patterns during the CIA. The AAT enhances the autonomy (freedom and flexibility) of individual faculty and enables them to create innovative pedagogical practices. If properly applied, the AAT converts the classroom into an effective learning center.**The AAT may includes, concept videos, course related term paper, technical seminar, term paper, paper presentations conducted by reputed organizations relevant to the course etc.**

VI COURSE OBJECTIVES:

The students will try to learn:

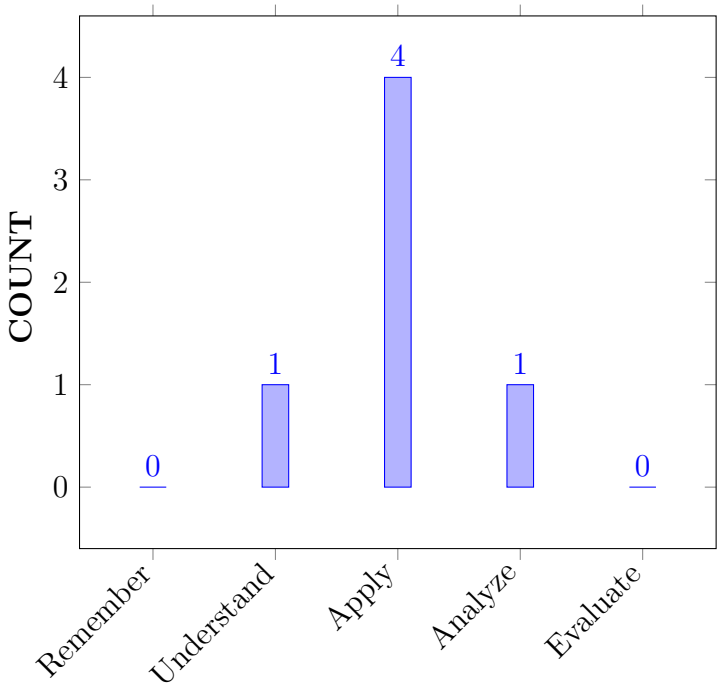
I	The knowledge on sources of research problem, data collection, analysis, and interpretation.
II	The importance of effective technical writing and analysis plagiarism.
III	The new developments in the law of intellectual property rights in order to bring progressive changes towards a free market society.

VII COURSE OUTCOMES:

After successful completion of the course, students will be able to:

CO 1	**Interpret** the technique of determining a research problem for a crucial part of the research study	Understand
CO 2	**Examine** the way of methods for avoiding plagiarism in research	Analyze
CO 3	**Apply** the feasibility and practicality of research methodology for a proposed project	Apply
CO 4	**Make use of** the legal procedure and document for claiming patent of invention.	Apply
CO 5	**Identify** different types of intellectual properties, the right of ownership, scope of protection to create and extract value from IP	Apply
CO 6	**Defend** Defend the intellectual property rights throughout the world with the involvement of World Intellectual Property Organization	Apply

COURSE KNOWLEDGE COMPETENCY LEVEL



VIII PROGRAM OUTCOMES:

Program Outcomes	
PO 1	Independently carry out research / investigation and development work to solve practical problems
PO 2	Write and present a substantial technical report / document.
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program.
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.

Program Outcomes	
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team.
PO 6	Recognize the need to engage in lifelong learning through continuing education and research.

IX HOW PROGRAM OUTCOMES ARE ASSESSED:

PROGRAM SPECIFIC OUTCOMES		Strength	Proficiency Assessed by
PO 1	Independently carry out research / investigation and development work to solve practical problems.	2	SEE/CIE/AAT
PO 2	Write and present a substantial technical report / document.	3	SEE/CIE/AAT
PO 6	Recognize the need to engage in lifelong learning through continuing education and research.	2	SEE/CIE/AAT

3 = High; 2 = Medium; 1 = Low

X MAPPING OF EACH CO WITH PO(s),PSO(s):

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	✓	✓	-	-	-	✓
CO 2	✓	-	-	-	-	✓
CO 3	✓	✓	-		-	-
CO 4	✓	✓	-		-	-
CO 5	✓	-	-	-		✓
CO 6	-	✓	-	-	-	-

XI JUSTIFICATIONS FOR CO – PO/ PSO MAPPING -DIRECT:

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
CO 1	**PO 1**	**Describe** the steps involved in **problem identification for the research process** with **quality of work** and **demonstrate the solutions**	4
	PO 2	**Demonstrate and communicate** effectively in writing the **research problem** with **clarity** and **subject the knowledge while preparing report**	4
	PO 6	**Describe** the importance of **continuing education efforts through literature, personal development, meeting deadlines** and **producing solutions** in research study	4
CO 2	**PO 1**	**Explain** the methods for avoiding plagiarism in research work for improving the **quality of work, self driven** and **Independence** in research process	3

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
	PO 6	**Describe** the methods for avoiding plagiarism in research work by **continuing education efforts through literature, manage risk, meeting deadlines** and **producing solutions**	3
CO 3	**PO 1**	**Describe** the steps of **problem identification and implementation** in development of **independence, quality of work** by using research methodology	3
	PO 2	**Demonstrate and communicate effectively in writing** a proposed project with **clarity** and avoid the mistakes in terms of **grammar (writing)** to **subject knowledge while preparing report**	4
CO 4	**PO 1**	**Demonstrate the solutions** and **self driven, independence** in work for copyright and **quality of work** in document	4
	PO 2	**Demonstrate and communicate** effectively in Process of applying **presenting** Patent with clarity and **subject knowledge** of intellectual property management for claiming patent of invention	3
CO 5	**PO 1**	**Demonstrate the solutions** to attain the right of ownership and **independence and self driven** for scope of protection	3
	PO 6	**Continuing education efforts through literature, demonstrated ability to work well with a team, meeting deadlines and producing solutions** for licensing and transfer of technology in patent rights	4
CO 6	**PO 2**	**Demonstrate and communicate effectively** of the new Developments in IPR with considering **references** and **clarity** in **presentation**	4

XII TOTAL COUNT OF KEY COMPETENCIES FOR CO – PO MAPPING:

XVI ASSESSMENT METHODOLOGY-INDIRECT:

✓	Early Semester Feedback	✓	End Semester OBE Feedback
✓	Assessment of mini projects by experts		

XVII SYLLABUS:

MODULE I	**INTRODUCTION**
	Meaning of research problem, Sources of research problem, Criteria Characteristics of a good research problem, Errors in selecting a research problem, Scope and objectives of research problem. Approaches of investigation of solutions for research problem, data collection, analysis, interpretation, Necessary instrumentations
MODULE II	**RESEARCH ETHICS**
	Effective literature studies approaches, analysis Plagiarism, Research ethics.
MODULE III	**RESEARCH PROPOSAL**
	Effective technical writing, how to write report, Paper Developing a Research Proposal. Format of research proposal, a presentation and assessment by a review committee
MODULE IV	**PATENTING**
	Nature of Intellectual Property: Patents, Designs, Trade and Copyright. Process of Patenting and Development: technological research, innovation, patenting, development. International Scenario: International cooperation on Intellectual Property. Procedure for grants of patents, Patenting under PCT
MODULE V	**PATENT RIGHTS**
	Patent Rights: Scope of Patent Rights. Licensing and transfer of technology. Patent information and databases. Geographical Indications. New Developments in IPR: Administration of Patent System. New developments in IPR; IPR of Biological Systems, Computer Software etc. Traditional knowledge Case Studies, IPR and IITs

ANNEXURE - I

KEY ATTRIBUTES FOR ASSESSING PROGRAM OUTCOMES

PO Number	NBA Statement / Key Competencies Features (KCF)	No. of KCF's
PO 1	Independently carry out research / investigation and development work to solve practical problems. 1. Independence 2. Self driven 3. Quality of work 4. Problem identification and implementation 5. Demonstrate the solutions 6. Budget	6
PO 2	Write and present a substantial technical report / document. 1. Demonstrate and communicate effectively in writing report and document/ present orally. 2. Clarity (writing/ presentation) 3. Grammar/ punctuation (writing) 4. References 5. Speaking/ Presenting 6. Subject knowledge while preparing report	6
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program. 1. Knowledge, understanding and demonstrations of embedded applications in real time scenario. 2. Ability to demonstrate and communicate effectively in writing / orally societal problems. 3. Analyze and design innovative products 4. Problem formulation and abstraction 5. Use creativity to establish innovative solutions 6. Experimental design 7. Manage the design process and evaluate outcomes using modern tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation	9

PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications. 1. Understand the need of users with the importance of considerations such as IoT and Robotics 2. Scientific principles and methodology 3. Problem formulation and abstraction 4. Use creativity to establish innovative solutions 5. Experimental design 6. Manage the design process and evaluate outcomes 7. Computer software / simulation packages / diagnostic equipment / technical library resources / literature search tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation 10. Under take research and development projects in the field of Embedded Systems	10
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team. 1. Maturity – requiring only the achievement of goals to drive their performance 2. Self-direction (take a vaguely defined problem and systematically work to resolution) 3. Individual performance is used during the classroom periods, in the hands-on labs, and in the design projects. 4. Knowledge of management techniques which may be used achieve engineering objectives 5. Meeting deadlines and producing solutions 6. Work with all level of people in the team. 7. Demonstrate ability to work well with a team	7
PO 6	Recognize the need to engage in lifelong learning through continuing education and research. 1. Project management and research orientation/ Ph.D 2. Strengthen in embedded and advanced engineering areas 3. Continuing education efforts through literature and courses 4. Personal development 5. Plan tasks and resources, manage risk and produce deliverables 6. Meeting deadlines and producing solutions 7. Work with all levels of people in team 8. Demonstrated ability to work well with a team	8

ELECTRONICS AND COMMUNICATION ENGINEERING
COURSE DESCRIPTION

Course Title	**WASTE TO ENERGY**				
Course Code	BPSC30				
Program	M.Tech				
Semester	III	ES			
Course Type	Open Elective				
Regulation	PG 21				
Course Structure	Theory			Practical	
	Lecture	Tutorials	Credits	Laboratory	Credits
	3	-	3	-	-
Course Coordinator	Mrs.C.Radhika, Assistant Professor				

I COURSE OVERVIEW:

The course is designed to create environmental awareness and consciousness among the present generation to become environmental responsible citizens. The course will discuss on the municipal solid waste composition, characteristics and to improve the methods to minimize municipal solid waste generation. This course deals with methods of disposal of solid waste by thermal biochemical processes and production of energy from different types of waste sand to know the environmental impacts of all types of municipal waste. This course will discuss the overall scenario of E-Waste management in India in comparison with other countries around the globe. This course will deals with E-waste legislation and government regulations on E-waste management.

II COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
B.Tech	AHS009	II	Environmental Studies

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
WASTE TO ENERGY	70 Marks	30 Marks	100

IV DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Power Point Presentations	✓	Chalk & Talk	✓	Assignments	x	MOOC
x	Open Ended Experiments	x	Seminars	x	Mini Project	x	Videos
x	Others						

V EVALUATION METHODOLOGY:

The course will be evaluated for a total of 100 marks, with 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). Out of 30 marks allotted for CIA during the semester, marks are awarded by taking average of two CIA examinations or the marks scored in the make-up examination.

Semester End Examination (SEE): The SEE shall be conducted for 70 marks of 3 hours duration. The syllabus for the theory courses shall be divided into FIVE units and each unit carries equal weightage in terms of marks distribution. The question paper pattern shall be as defined below. Two full questions with 'either' 'or' choice will be drawn from each unit. Each question carries 14 marks. There could be a maximum of three sub divisions in a question.
The emphasis on the questions is broadly based on the following criteria:

50%	To test the objectiveness of the concept
30%	To test the analytical skill of the concept
20%	To test the application skill of the concept

Continuous Internal Assessment (CIA):
For each theory course the CIA shall be conducted by the faculty / teacher handling the course. CIA is conducted for a total of 30 marks, with 20 marks for Continuous Internal Examination (CIE), 05 marks for Assignment and 05 marks for Alternative Assessment Tool (AAT). **Two CIE Tests are Compulsory** and sum of the two tests, along with the scores obtained in the assignment / AAT shall be considered for computing the final CIA of a student in a given course.

Component	**Theory**			**Total Marks**
Type of Assessment	**CIE Exam**	**Assignment**	**AAT**	
CIA Marks	20	05	05	30

Continuous Internal Examination (CIE):
Two CIE exams shall be conducted at the end of the 9^{th} and 17^{th} th week of the semester respectively for 10 marks each of 2 hours duration consisting of five descriptive type questions out of which four questions have to be answered. The valuation and verification of answer scripts of CIE exams shall be completed within a week after the conduct of the Examination.

Assignment:
To improve the writing skills in the course an assignment will be evaluated for 05 marks. One assignment has to submit at the end of the CIE2 for the questions provided by the each course coordinator in that semester. Assignments to be handed in as loose paper collection stapled together at the top left corner. The assignment should be presented as a professional report. It must consist of a cover sheet, content page, and should have an introduction, a body, a conclusion or recommendation, and a reference page.

Alternative Assessment Tool (AAT):
In order to encourage innovative methods while delivering a course, the faculty members are encouraged to use the Alternative Assessment Tool (AAT). This AAT enables faculty to design own assessment patterns during the CIA. The AAT enhances the autonomy (freedom and flexibility) of individual faculty and enables them to create innovative pedagogical practices. If properly applied, the AAT converts the classroom into an effective learning center.**The AAT**

may includes, concept videos, course related term paper, technical seminar, term paper, paper presentations conducted by reputed organizations relevant to the course etc.

VI COURSE OBJECTIVES:

The students will try to learn:

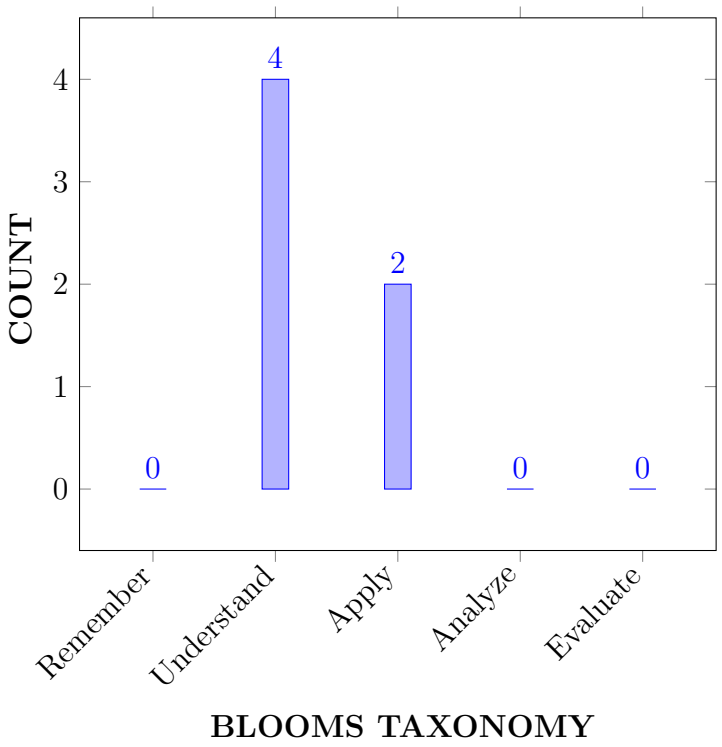
I	The principles of solid waste management in reducing and eliminating dangerous impacts of waste materials on human health and the environment to contribute economic development and superior quality of life.
II	The insight of the design and operations of a municipal solid waste landfill by collection, transfer and transportation of municipal solid waste for the final disposal.
III	The main operational challenges in operating thermal and biochemical energy from waste facilities and device processes involved in recovering energy from wastes.
IV	The scenario of E-Waste management in India and other countries around the globe and assess the impact of electronic waste on human, environment and society by informal recycling and management. The sustainable solution of E-Waste Management can be achieved by adopting modern techniques and Life-Cycle Analysis approach.

VII COURSE OUTCOMES:

After successful completion of the course, students should be able to:

CO 1	**Identify** the different sources and types of solid waste by the properties of municipal solid waste for segregation and collection of waste.	Apply
CO 2	**Explain** the energy generation technologies from waste treatment plants and disposal of solid waste by aerobic composting and incineration process.	Understand
CO 3	**Explain** the classification, preliminary design considerations of landfill and methods of landfill disposal of solid to control greenhouse gases.	Understand
CO 4	**Understand** the Composition, characteristics of leachate to control the emission of gases by monitoring the movement of landfill leachate.	Understand
CO 5	**Outline** the Biochemical conversion of biomass for energy generation by anaerobic digestion of solid waste.	Understand
CO 6	**Apply** the knowledge in planning and operations of waste to Energy plants by following legal legislation related to solid waste management.	Apply

COURSE KNOWLEDGE COMPETENCY LEVEL



VIII HOW PROGRAM OUTCOMES ARE ASSESSED:

Program		Strength	Proficiency Assessed by
PO 1	Independently carry out research / investigation and development work to solve practical problems.	2	CIE/SEE/AAT
PO 2	Write and present a substantial technical report / document.	1	CIE/SEE/AAT
PO 6	Recognize the need to engage in lifelong learning through continuing education and research.	2	CIE/SEE/AAT

3 = High; 2 = Medium; 1 = Low

IX MAPPING OF EACH CO WITH PO(s):

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1		✓		-		✓
CO 2	✓	✓		-		-
CO 3		✓	-			✓
CO 4		✓		-	-	✓
CO 5	✓	-		-	-	-
CO 6		-	-	-		✓

X JUSTIFICATIONS FOR CO – (PO) MAPPING -DIRECT:

COURSE OUTCOMES	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key Competencies
CO 1	PO 2	List out the different sources, types of municipal solid waste by **considering environmental limitations, health, safety and risk assessment issues** for waste segregation, **operation and maintenance**	1
	PO 6	Apply the **knowledge of management techniques** by understanding the **requirement for engineering activities**of municipal solid waste for the **sustainable development**.	1
CO 2	PO 1	Apply the **Scientific principles** for energy generation by applying different technologies from waste management plants.	1
	PO 2	Identify the **constraints including environmental health and safety and risk assessment issues** of different methods of disposal of municipal solid waste by aerobic composting **to promote sustainable development.**	1
CO 3	PO 2	Understand **customer and user needs considerations such as aesthetics** by disposal of solid waste in land fill sites and **identify constraints including environmental and sustainability suitability.**	1
	PO 6	Understand the **commercial and economic context** of landfill layout and preliminary design as per environmental laws to safeguard the **personnel, health, safety, and risk (including environmental risk) issues**	1
CO 4	PO 2	Identify **constraints including environmental and sustainability limitations, health and safety and risk assessment issues** for environmental monitoring system of land fill gases and composition of leachate and **Understanding commercial and economic context** of managing the land fill site	1
	PO 6	Understand the characteristics, generation and movement of leachate in landfills by the **management techniques** which uses for controlling the emission of gases in landfills **to promote sustainable development**	1
CO 5	PO 1	Explain the **Scientific principles** for Energy generation from waste bio-chemical conversion and **to integrate / support the engineering disciplines**	1

CO 6	PO 6	outline the biochemical conversation of biomass for energy generation by anaerobic deigestion of soild waste**for sustainable development** by following **legal legislation** related to solid waste management for **high level of professional and ethical values.**	1

XI TOTAL COUNT OF KEY COMPETENCIES FOR CO – (PO) MAPPING:

COURSE OUTCOMES	**Program Outcomes/ No. of Key Competencies Matched**					
	PO1	PO2	PO3	PO4	PO5	PO6
CO 1		1		-		1
CO 2	1	1		-	-	-
CO 3		1	-	-		1
CO 4		1		-	-	1
CO 5	1	-	-	-	-	-
CO 6		-	-	-	-	1

XII PERCENTAGE OF KEY COMPETENCIES FOR CO – (PO):

COURSE OUTCOMES	**PROGRAM OUTCOMES**					
	PO1	PO2	PO3	PO4	PO5	PO6
CO 1	-	16.7		-		12.5
CO 2	16.7	16.7		-	-	-
CO 3		16.7	-	-		12.5
CO 4		16.7		-	-	12.5
CO 5	16.7	-	-	-	-	-
CO 6		-	-	-		12.5

XIII COURSE ARTICULATION MATRIX (PO mapping):

CO'S and PO'S and CO'S and PSO'S on the scale of 0 to 3, 0 being no correlation, 1 being the low correlation, 2 being medium correlation and 3 being high correlation.
0 - 0≤ C≤ 5% – No correlation
2 - 40 % <C < 60% –Moderate
1-5 <C≤ 40% – Low/ Slight
3 - 60% ≤ C < 100% – Substantial /High

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO1	PO2	PO3	PO4	PO5	PO6
CO 1	-	1	-	-	-	1
CO 2	1	1	-	-	-	-
CO 3	-	1	-	-	-	1
CO 4	-	1	-	-	-	1
CO 5	1	-	-	-	-	-
CO 6	-	-	-	-	-	1
TOTAL	**2**	4	-	-	-	4
AVERAGE	**1**	1	-	-	-	1

XIV ASSESSMENT METHODOLOGY DIRECT:

CIE Exams	✓	SEE Exams	✓	Assignments	✓
Quiz	-	Tech - Talk	-	Certification	-
Term Paper	-	Seminars	-	Student Viva	-
Laboratory Practices	-	5 Minutes Video / Concept Video	✓	Open Ended Experiments	-
Micro Projects	-	-	-	-	-

XV SYLLABUS:

MODULE I	**INTRODUCTION TO ENERGY FROM WASTE**
	Introduction to Energy from Waste: Classification of waste as fuel, Agro based, Forest residue, Industrial waste. MSW, Conversion devices. Incinerators, gasifiers, digestors
MODULE II	**BIOMASS PYROLYSIS**
	Biomass Pyrolysis: Pyrolysis, Types, slow fast , Manufacture of charcoal, Methods, Yields and application, Manufacture of pyrolytic oils and gases, yields and applications.
MODULE III	**BIOMASS GASIFICATION**
	Gasifiers, Fixed bed system, Downdraft and updraft gasifiers, Fluidized bed gasifiers, Design, construction and operation. Gasifier burner arrangement for thermal heating. Gasifier engine arrangement and electrical power, Equilibrium and kinetic consideration in gasifier operation.
MODULE IV	**BIOMASS COMBUSTION**

	Biomass stoves, Improved chullahs, types, some exotic designs, Fixed bed combustors, Types, inclined grate combustors, Fluidized bed combustors, Design, construction and operation - Operation of all the above biomass combustors.
MODULE V	**BIOGAS**
	Properties of biogas (Calorific value and composition), Biogas plant technology and status, Bio energy system. Design and constructional features, Biomass resources and their classification, Biomass conversion processes, Thermo chemical conversion, Direct combustion, biomass gasification, pyrolysis and liquefaction, biochemical conversion, anaerobic digestion. Types of biogas Plants, Applications. Alcohol production from biomass, Bio diesel production. Urban waste to energy conversion, Biomass energy programme in India.

XVI COURSE PLAN:

The course plan is meant as a guideline. Probably there may be changes.

S.No	Topics to be covered	CO's	Reference T1: 4.1
1	Summarize about solid waste sources and its importance.	CO 1	T1:3.3, T2:1.2, R2: 2.2
2	Discuss solid waste properties and its composition.	CO 1	T1:3.4, T2:1.4
3	Provides the information regarding collection and transfer of solid waste.	CO 1	T1:3.5, R2:1.5

4	Discuss the need of waste minimization and recycling	CO 1	T1:3.7, R2:1.8
5	Discuss the need of segregating waste and managing solid waste.	CO 2	T1: 3.9, R3: 1.10
6	Acquire the knowledge about the technologies for generation of energy from solid waste.	CO 2	T1:5.5, T2:6.2, R3:4.8
7	Acquire the knowledge about the technologies for generation of energy from biomedical waste.	CO 2	T1:5.6, T2:6.3, R3:7.5
8	Discuss the environmental impacts of incineration process.	CO 2	T1:4.3, T2:5.2, R2: 5.7
9	Illustrate the importance of landfill method of disposal.	CO 3	T1: 4.4, R1:3.3
10	Discuss the types of land fill disposal and classification of land fill sites.	CO 3	T1:4.5, T2: 5.4, R3: 7.3
11	Analyze the layout and preliminary design of landfills.	CO 3	T1:4.6, T2:5.5
12	Summarize the properties and characteristics of landfills.	CO 4	T1: 4.5.2., T2: 5.6
13	Acquire the knowledge of generating energy from landfills.	CO 4	T1:4.6, T2:5.5
14	Discuss the emission of gasses and leach ate from landfills.	CO 4	T1:4.6.2, T2:5.5.2
15	Discuss the environmental monitoring system for land fill gases.	CO 4	T1:4.7, T2:5.6
16	Discuss about the biochemical conversion and their advantages.	CO 5	T1:4.7, T2:5.8
17	Illustrate the sources of biochemical conversion process.	CO 5	T1:4.7.2, T2:5.8.2
18	Analyze anaerobic digestion of sewage and municipal waste.	CO 5	T1:4.8, T2:5.9
19	Analyze direct combustion of Municipal solid waste.	CO 6	T1:4.9, T2:5.7
20	Discuss about refuse derived solid fuel and their importance in energy generation.	CO 6	T1:6.2, T2:5.6
21	Discuss about industrial waste and agro residues.	CO 6	T1:6.3, T2:5.7
22	Understand the concept of Thermo-chemical Conversion.	CO 3	T1:6.4, T2:5.8
23	Discuss about Biogas production and generation of energy by Biogas.	CO 5	T1:6.5, T2:5.3

24	Explain the land fill gas generation and utilization of landfill gas for various purposes.	CO 5	T1:6..6, T2:5.2
25	Illustrate sources of thermo chemical energy generation	CO 4	T1:6.7, T2:5.3
26	Explain gasification of waste using gasifies briquetting process.	CO 3	T1:6.5, T2:7.5
27	Discuss utilization of various municipal solid wastes by recycling, refuse and reuse techniques.	CO 8	T1: 6.2, 6.3, R2: 7.9
28	Discuss advantages and disadvantages of briquetting process.	CO 2	T1: 6.2
29	Summarize environmental benefits of bio-chemical conversion	CO 2	T1:6.2, T2:7.2
30	Summarize environmental benefits of thermo- chemical conversion	CO 5	T1:6.3, T2:7.3
31	Outline the Growth of electrical industry in India.	CO 4	T1:6.4, T2:7.5
32	Summarize the E-waste generation in India and in the global context.	CO 4	T1: 6.2, T2: 5.6
33	Understand the Growth of E waste generated from electrical industry in India	CO 3	T1:6.3, T2: 5.7
34	Identify environmental concerns and health hazards	CO 3	T1:6.4, T2:5.8
35	Determine recycling concept of E-Waste and advantages of E-waste.	CO 2	T1:2.1, T2:9.1
36	Discuss A thriving economy of the unorganized sector of E-waste	CO 5	T1:2.2, T2:9.2
37	Discuss the global trade in hazardous waste and their impact on the environment	CO 6	T1: 2.1, R2: 9.1
38	Discuss impact of hazardous E-waste in India and effects on human health	CO 2	T1:2.6, R1:5.1
39	Understand the management processes of E-waste and the importance of formal recycling of E-waste	CO 1	T1:2.7, R1:5.2
40	Outline E-waste legislation for the recycling and disposal	CO 5	T1:2.8, R1:5.5
41	Summarize government regulations on E-waste management	CO 5	T1:2.1, R1:5.6
42	Outline international E-waste management and the guidelines imposed for formal disposal	CO 4	T1:2.2, R1:5.4
43	Explain the need for stringent health safeguards of human health and their effects	CO 1	T1:2.4,R1:5
44	Discuss the need for environmental protection laws and	CO 3	T1:2.4, R1:5.5
45	Outline environmental protection laws of India with respect to E-waste management.	CO 2	T1:2.4, R1:5.5

DISCUSSION OF QUESTION BANK			
1	Discuss the need of waste minimization and recycling	CO1	Understand
2	Mention primary applications of Syngas in various engineering fields	CO3	Apply
3	How gasifier output is utilized in Electrical Power Plants - Justify	CO3	Apply
4	Write short notes on (i) Charcoal (ii) Pyrolytic oils (iii) Pyrolytic gases	CO2	Understand
5	Draw Gasifier engine arrangement for production of Electric power and explain the methodology.	CO4	Apply

COURSE DESCRIPTION

Department	ELECTRONICS AND COMMUNICATION ENGINEERING				
Course Title	COMMUNICATION NETWORKS				
Course Code	BESC29				
Program	M.Tech				
Semester	III				
Course Type	Professional Elective				
Regulation	PG-21				
Course Structure	Theory			Practical	
	Lecture	Tutorials	Credits	Laboratory	Credits
	3	-	3	-	-
Course Coordinator	Ms.B.Laxmi Prasanna, Asst.Professor,ECE				

I COURSE PRE-REQUISITES:

Level	Course Code	Semester	Prerequisites
M.Tech	BESC06	I	Wireless LANS and PANS
M.Tech	BESC14	II	Internet of Things

II COURSE OVERVIEW:

This course provides the basic principles of communication networks and routing protocols. The performance of network architecture, TCP and various communication protocols.The applications include resource sharing, exchange of information by means of e-mails, video conferences and Parallel computing.

III MARKS DISTRIBUTION:

Subject	SEE Examination	CIE Examination	Total Marks
Communication Networks	70 Marks	30 Marks	100

IV CONTENT DELIVERY / INSTRUCTIONAL METHODOLOGIES:

✓	Power Point Presentations	x	Chalk & Talk	✓	Assignments	x	MOOC
x	Open Ended Experiments	x	Seminars	x	Mini Project	✓	Videos
x	Others						

V EVALUATION METHODOLOGY:

Each theory course will be evaluated for a total of 100 marks, out of which 30 marks for Continuous Internal Assessment (CIA) and 70 marks for Semester End Examination (SEE). **Semester End Examination (SEE):** The SEE is conducted for 70 marks of 3 hours duration. The syllabus for the theory courses is divided into FIVE modules and each module carries equal weightage in terms of marks distribution. The question paper pattern is as follows. Two full questions with "either" or "choice" will be drawn from each module. Each question carries 14 marks. There could be a maximum of three sub divisions in a question.

The emphasis on the questions is broadly based on the following criteria:

50 %	To test the objectiveness of the concept
30 %	To test the analytical skill of the concept
20 %	To test the application skill of the concept

Continuous Internal Assessment (CIA):
For each theory course the CIA shall be conducted by the faculty / teacher handling the course. CIA is conducted for a total of 30 marks, with 20 marks for Continuous Internal Examination (CIE), 05 marks for Assignment and 05 marks for Alternative Assessment Tool (AAT). Two CIE Tests are Compulsory and sum of the two tests, along with the scores obtained in the assignment / AAT shall be considered for computing the final CIA of a student in a given course.

The CIE Tests/Assignment /AAT shall be conducted by the course faculty with due approval from the HOD. Advance notification for the conduction of Assignment/AAT is mandatory and the responsibility lies with the concerned course faculty. CIA is conducted for a total of 30 marks (Table 1), with 25 marks for Continuous Internal Examination (CIE), 05 marks for Quiz/ Alternative Assessment Tool (AAT).

Component	Theory			Total Marks
Type of Assessment	CIE Exam	Assignment	AAT	
CIA Marks	20	05	05	30

Continuous Internal Examination (CIE):
Two CIE exams shall be conducted at the end of the 8th and 16th week of the semester respectively. The CIE exam is conducted for 25 marks of 2 hours duration consisting of five descriptive type questions out of which four questions have to be answered where, each question carries 5 marks. Marks are awarded by taking average of marks scored in two CIE exams.

Quiz/Alternative Assessment Tool (AAT):
Two Quiz exams shall be online examination consisting of 25 multiple choice questions and are be answered by choosing the correct answer from a given set of choices (commonly four). Marks shall be awarded considering the average of two quizzes for every course. The AAT may include seminars, assignments, term paper, open ended experiments, five minutes video and MOOCs.

VI COURSE OBJECTIVES:

The students will try to learn:

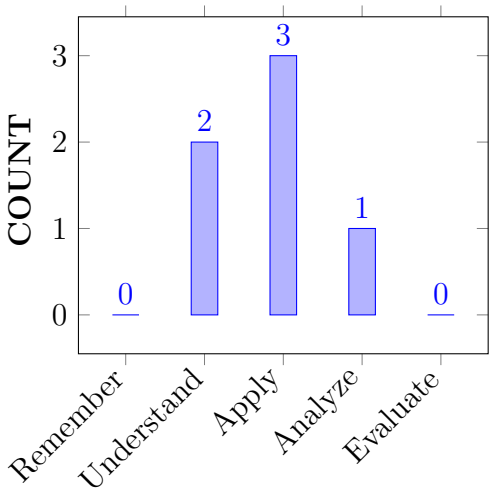
I	The computer networks, printers and other peripherals are the transmission medium for data communication and network.
II	The computer and communication network applications are for the storage devices, Internet and Instant messaging.
III	The queuing models are for the mathematical study of waiting in lines along with simulation of the network.

VII COURSE OUTCOMES:

After successful completion of the course, students should be able to:

CO 1	**Demonstrate** the functionality of layered and computer network architecture for reducing the complexity of communication network	Understand
CO 2	**Make use of** various end to end protocols for delivering messages and synchronization between the sender and the receiver.	Apply
CO 3	**Utilize** the applications World Wide Web and multimedia information between computers on the Internet Clocks.	Apply
CO 4	**Apply** the mathematical functions to solve computational problems in computer networking domain resolutions.	Apply
CO 5	**Illustrate** the importance of queuing models, IPv6, Switching and bridging for communication network for communication network.	Understand
CO 6	**Analyze** the routing algorithms to solve scaling issues and queuing issues in communication network.	Analyze

COURSE KNOWLEDGE COMPETENCY LEVEL



BLOOMS TAXONOMY

VIII PROGRAM OUTCOMES:

Program Outcomes	
PO 1	Independently carry out research / investigation and development work to solve practical problems.
PO 2	Write and present a substantial technical report / document.
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program.
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skillful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications.
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team.
PO 6	Recognize the need to engage in life long learning through continuing education and research.

IX HOW PROGRAM OUTCOMES ARE ASSESSED:

PROGRAM OUTCOMES		Strength	Proficiency Assessed by
PO 1	Independently carry out research / investigation and development work to solve practical problems.	2	SEE/CIE/AAT
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor pr.	2	SEE/CIE/AAT
PO 4	Apply the skills and knowledge needed to serve as a professional engineer skillful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications	3	SEE/CIE/AAT

3 = High; 2 = Medium; 1 = Low

X MAPPING OF EACH CO WITH PO(s):

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO1	✓	-	✓	✓	-	-
CO2	✓	-	-	-	-	-
CO3	✓	-	✓	✓	-	-
CO4	✓	-	-	✓	-	-
CO5	✓	-	-	✓	-	-
CO6	✓	-	✓	✓	-	-

XI JUSTIFICATIONS FOR CO – PO/ PSO MAPPING -DIRECT:

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
CO 1	PO 1	Understand the importance of network types, suitable transmission medium, devices and the Internet in supporting business communications and everyday activities by understanding fundamentals of Computer engineering specialization and scientific principles.	3
	PO 3	Understand the importance of network types, suitable transmission medium, devices and the Internet in supporting business communications and everyday activities by understanding fundamentals of Computer engineering specialization and scientific principles.	1
	PO 4	Describe the relationship between data and signals, their types, behavior, properties, characterization and transmission through the physical layer by understanding mathematical principles and scientific principles..	2
CO 2	PO 1	Understand the importance of network types, suitable transmission medium, devices and the Internet in supporting business communications and everyday activities by understanding fundamentals of Computer engineering specialization and scientific principles.	3
CO 3	PO 1	Understand the importance of network types, suitable transmission medium, devices and the Internet in supporting business communications and everyday activities by understanding fundamentals of Computer engineering specialization and scientific principles.	3
	PO 3	Understand the importance of network types, suitable transmission medium, devices and the Internet in supporting business communications and everyday activities by understanding fundamentals of Computer engineering specialization and scientific principles.	1

Course Outcomes	PO'S PSO'S	Justification for mapping (Students will be able to)	No. of Key competencies matched.
	PO 4	Describe the relationship between data and signals, their types, behavior, properties, characterization and transmission through the physical layer by understanding mathematical principles and scientific principles..	2
CO 4	PO 1	Understand the importance of network types, suitable transmission medium, devices and the Internet in supporting business communications and everyday activities by understanding fundamentals of Computer engineering specialization and scientific principles.	1
	PO 4	Describe the relationship between data and signals, their types, behavior, properties, characterization and transmission through the physical layer by understanding mathematical principles and scientific principles..	2
CO 5	PO 1	Understand the importance of network types, suitable transmission medium, devices and the Internet in supporting business communications and everyday activities by understanding fundamentals of Computer engineering specialization and scientific principles.	1
	PO 4	Describe the relationship between data and signals, their types, behavior, properties, characterization and transmission through the physical layer by understanding mathematical principles and scientific principles..	2
CO 6	PO 1	Understand the importance of network types, suitable transmission medium, devices and the Internet in supporting business communications and everyday activities by understanding fundamentals of Computer engineering specialization and scientific principles.	1
	PO 3	Understand the importance of network types, suitable transmission medium, devices and the Internet in supporting business communications and everyday activities by understanding fundamentals of Computer engineering specialization and scientific principles.	1
	PO 4	Describe the relationship between data and signals, their types, behavior, properties, characterization and transmission through the physical layer by understanding mathematical principles and scientific principles..	2

XII TOTAL COUNT OF KEY COMPETENCIES FOR CO – PO/ PSO MAPPING:

CO'S and PO'S and CO'S and PSO'S on the scale of 0 to 3, 0 being no correlation, 1 being the low correlation, 2 being medium correlation and 3 being high correlation.

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
	6	6	9	10	7	8
CO 1	3	-	1	2	-	-
CO 2	3	-	-	-	–	-
CO 3	3	-	1	2	-	-
CO 4	1	-	-	2	-	-
CO 5	1	-	2	-	-	-
CO 6	1	-	1	2	-	-

XIII PERCENTAGE OF KEY COMPETENCIES FOR CO – PO/ PSO :

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
	6	6	9	10	7	8
CO 1	50	-	16.67	20	-	-
CO 2	50	-	-	-	-	-
CO 3	50	-	16.67	20	-	-
CO 4	16.67	-	-	20	-	-
CO 5	16.67	-	33.33	-	-	-
CO 6	16.67	-	16.67	20	-	-

XIV COURSE ARTICULATION MATRIX (PO – PSO MAPPING):

CO'S and PO'S and CO'S and PSO'S on the scale of 0 to 3, 0 being no correlation, 1 being the low correlation, 2 being medium correlation and 3 being high correlation.

0 - $0 \leq C \leq 5\%$ – No correlation

1 -$5 < C \leq 40\%$ – Low/ Slight

2 - $40\% < C < 60\%$ –Moderate

3 - $60\% \leq C < 100\%$ – Substantial /High

COURSE OUTCOMES	PROGRAM OUTCOMES					
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6
CO 1	2	-	1	1	-	-
CO 2	2	-	-	-	-	-
CO 3	2	-	1	1	-	-
CO 4	1	-	-	1	-	-
CO 5	1	-	1	-	-	-
CO 6	1	-	1	1	-	-
TOTAL	9	-	4	4	-	-
AVERAGE	1.5	-	0.66	0.66	-	-

XV ASSESSMENT METHODOLOGY DIRECT:

CIE Exams	✓	SEE Exams	✓	Seminar and term paper	-
Laboratory Practices	-	Student Viva	-	Mini Project	-

XVI ASSESSMENT METHODOLOGY INDIRECT:

✓	**End Semester OBE Feed Back**

XVII SYLLABUS:

MODULE I	**Introduction**
	Introduction to communication system,Architecture of communication network
MODULE II	**CONNECTING NODES**
	Connecting nodes: - Connecting links, Encoding, framing, Reliable transmission, Ethernet and Multiple access networks, Wireless networks
MODULE III	**QUEUING MODELS**
	Queuing models –For a) one or more servers b) within finite and finite queue size c) Infinite population Internetworking: - Switching and bridging, IPv4, Addressing, Routing Protocols, Scale issues, Routers - Architecture,IPv6.
MODULE IV	**END-TO-END PROTOCOLS**
	End-to-End Protocols:-Services, Multiplexing, De-multiplexing, UDP, TCP, RPC, RTP
MODULE V	**CONGESTION CONTROL AND RESOURCE ALLOCATION**
	Congestion control and Resource Allocation- Issues, Queuing disciplines, TCP congestion control, Congestion Avoidance, QoS Applications: Domain Name Resolution, File Transfer, Electronic Mail, WWW, Multimedia Applications. Network monitoring – Packet sniffing tools such as Wireshark Simulations using NS2/OPNET.

TEXTBOOKS

1. 1. Larry L. Peterson, Bruce S, Devie, —Computer Networks‖, MK, 5 th Edition, 2020.

XVIII COURSE PLAN:

The course plan is meant as a guideline. Probably there may be changes.

S.No	Topics to be covered	CO's	Reference T1: 4.1
OBE DISCUSSION			
1	Course Description on Outcome Based Education(OBE): Course Objectives,Course Outcomes(CO),Program Outcomes(PO) and CO-PO Mapping	-	-
CONTENT DELIVERY (THEORY)			
lecture No.	**Topics to be covered**	**Course Out-comes**	**Reference**
1.	Understand the basic concepts of COMMUNICATION NETWORK	CO1	T1:1.5
2.	Internet history, standards and administration	CO1	T1:2
3.	OSI model Transmission media: Introduction, guided media, unguided media;	CO1	T1:3.1
4.	Introduction: Link layer addressing;	CO1	T1:3.2, 3.3
5.	media access control: Random access	CO1	T1:4.1
6.	Ethernet	CO1	T1:4.1.1
7.	Multiple access networks	CO2	T1:4.1.3
8.	Wireless Networks	CO2	T1:4.2
9.	QUEUING MODELS: The network layer in the internet: IPv4 addresses	CO2	T1:4.2.1
10.	TCP (Transport Control Protocol	CO2	T1:4.2.1
11.	Switching: Introduction, circuit switched networks	CO2	T1:4.2.1
12.	The network layer in the internet	CO2	T1:4.2.2
13.	Types of switching	CO2	T1:4.2.3
14.	internet control protocols	CO2	T1:4.2.3
15.	internet control protocols	CO2	T1:4.2.4
16.	packet switching	CO2	T1:4.3
17.	Congestion control and Resource Allocation.	CO2	T1:5
18.	Congestion Avoidance facility, timing wheels	CO3	T1:5.1
19.	QoS Applications	CO3	T1:5.3

20.	QoS Applications : Domain Name Resolution, File Transfer	CO3	T1:5.4
21.	Electronic Mail, WWW	CO3	T1:7.1
22.	WWW applications	CO4	T1:7.1
23.	Multimedia Applications	CO4	T1:7.2
24.	QoS Applications	CO5	T1:7.3
25.	Introduction of Packet sniffing tools	CO5	T1:10.1
26.	importance of Wireshark Simulations Noise in DM	CO5	T1:10.3
27.	IPv4 addresses	CO5	T1:10.3
28.	IPv6 addresses	CO5	T1:10.3
29.	IPv6 internet control protocols	CO5	T1:10.4
30.	Congestion timing wheels.	CO5	T1:10.4.2
31.	Types of internet control protocols	CO5	T1:10.4.3
32.	Introduction of Packet sniffing tools	CO6	T1:11
33.	Applications of packet sniffing tools	CO6	T1:11.1
34.	Applications of packet sniffing tools	CO6	T1:11.1
35.	Basics of sniffing tools	CO6	T1:11.1
36.	Linear Block Codes: Introduction to error control coding; Matrix description of linear block codes	CO6	T1:11.1
36.	Error detection and error correction capabilities of linear block codes	CO6	T1:12.1.4
37.	Error detection and correction: Cyclic codes, checksum, forward error correction	CO6	T1:12.2
38.	Explain Packet sniffing tools such as Wireshark Simulations using NS2/OPNET.	CO6	T1:12.3
DISCUSSION OF QUESTION BANK			
1	Cyclic codes, checksum, forward error correction;	CO1	R2:1.1
2	Error detection and correction	CO2	R2:2.1
3	checksum, forward error correction	CO3,4	R2:2.6,9.1
4	linear block codes.	CO 5	R2:10.1
5	Problem solving on Hamming codes;	CO6	R2: 10.7

Signature of Course Coordinator **HOD,ECE**

ANNEXURE - I

KEY ATTRIBUTES FOR ASSESSING PROGRAM OUTCOMES

PO Number	NBA Statement / Key Competencies Features (KCF)	No. of KCF's
PO 1	Independently carry out research / investigation and development work to solve practical problems. 1. Independence 2. Self driven 3. Quality of work 4. Problem identification and implementation 5. Demonstrate the solutions 6. Budget	6
PO 2	Write and present a substantial technical report / document. 1. Demonstrate and communicate effectively in writing report and document/ present orally. 2. Clarity (writing/ presentation) 3. Grammar/ punctuation (writing) 4. References 5. Speaking/ Presenting 6. Subject knowledge while preparing report	6
PO 3	Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level of higher than the requirements in the appropriate bachelor program. 1. Knowledge, understanding and demonstrations of embedded applications in real time scenario. 2. Ability to demonstrate and communicate effectively in writing / orally societal problems. 3. Analyze and design innovative products 4. Problem formulation and abstraction 5. Use creativity to establish innovative solutions 6. Experimental design 7. Manage the design process and evaluate outcomes using modern tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation	9

PO 4	Apply the skills and knowledge needed to serve as a professional engineer skilful at designing embedded systems for effective use in communications, IoT, medical electronics and signal processing applications. 1. Understand the need of users with the importance of considerations such as IoT and Robotics 2. Scientific principles and methodology 3. Problem formulation and abstraction 4. Use creativity to establish innovative solutions 5. Experimental design 6. Manage the design process and evaluate outcomes 7. Computer software / simulation packages / diagnostic equipment / technical library resources / literature search tools 8. Solution development or experimentation / Implementation 9. Interpretation of results and Validation 10. Under take research and development projects in the field of Embedded Systems	10
PO 5	Function on multidisciplinary environments by working cooperatively, creatively and responsibly as a member of a team. 1. Maturity – requiring only the achievement of goals to drive their performance 2. Self-direction (take a vaguely defined problem and systematically work to resolution) 3. Individual performance is used during the classroom periods, in the hands-on labs, and in the design projects. 4. Knowledge of management techniques which may be used achieve engineering objectives 5. Meeting deadlines and producing solutions 6. Work with all level of people in the team. 7. Demonstrate ability to work well with a team	7
PO 6	Recognize the need to engage in lifelong learning through continuing education and research. 1. Project management and research orientation/ Ph.D 2. Strengthen in embedded and advanced engineering areas 3. Continuing education efforts through literature and courses 4. Personal development 5. Plan tasks and resources, manage risk and produce deliverables 6. Meeting deadlines and producing solutions 7. Work with all levels of people in team 8. Demonstrated ability to work well with a team	8
