Chief Coordinator	Coordinator Dr. Paidu Raghavulu, Professor						
Course Faculty Dr. Paidu Raghavulu, Professor							

COURSE OBJECTIVES:

The cou	The course should enable the students to:				
I	Identify an appropriate research problem in their interesting domain.				
П	Understand ethical issues				
III	Understand the Preparation of a research project thesis report.				
IV	Understand the law of patent and copyrights.				
V	Understand the Adequate knowledge on IPR				

COURSE OUTCOMES (COs):

CO1	Understand the research problem and research process.
CO2	Understand research ethics
CO3	Prepare a well -structured research paper and scientific presentations.
CO4	Explore on various IPR components and process of filing
CO5	Understand the adequate knowledge on patent and rights

COURSE LEARNING OUTCOMES (CLOs):

BCSB31.01	Understand the characteristics, objects of a good research problem.
BCSB31.02	Understand the selection, approaches of research problem
BCSB31.03	Understand concepts of data collection, analysis.
BCSB31.04	Understand the principles of ethics and ethical issues in science and engineering.
BCSB31.05	Understand the analysis Plagiarism.
BCSB31.06	Understand research ethic concepts.
BCSB31.07	Understand significance, effective technical writing and report.
BCSB31.08	Paper developing a research proposal and report.
BCSB31.09	Understand writing a research report as per format.
BCSB31.10	Report presentation and assessment by a review committee
BCSB31.11	Understand the techniques of interpretation, and making scientific presentation
BCSB31.12	Understand the patent laws, patent and searching process.
BCSB31.13	Understand International cooperation on intellectual property
BCSB31.14	Understand the patent laws, patent and searching process, patent data base.
BCSB31.15	Understand the patent rights and transfer of technology.
BCSB31.16	Study of new developments in IPR.
