

# INSTITUTE OF AERONAUTICAL ENGINEERING (AUTONOMOUS)

Dundigal, Hyderabad - 500 043

## COMPUTER SCIENCE AND ENGINEERING

### TUTORIAL QUESTION BANK

<b>Course Name</b>	: <b>DATABASE MANAGEMENT SYSTEMS</b>
<b>Course Code</b>	: A40507
<b>Class</b>	: II B. Tech II Semester
<b>Branch</b>	: Computer Science and Engineering
<b>Year</b>	: 2016 – 2017
<b>Course Faculty</b>	: Dr. M, Madhu Bala, Professor Ms. K Mayuri, Assistant Professor Mr. A V Srinivas, Assistant Professor

#### OBJECTIVES

To meet the challenge of ensuring excellence in engineering education, the issue of quality needs to be addressed, debated and taken forward in a systematic manner. Accreditation is the principal means of quality assurance in higher education. The major emphasis of accreditation process is to measure the outcomes of the program that is being accredited.

In line with this, Faculty of Institute of Aeronautical Engineering, Hyderabad has taken a lead in incorporating philosophy of outcome based education in the process of problem solving and career development. So, all students of the institute should understand the depth and approach of course to be taught through this question bank, which will enhance learner’s learning process.

#### PART – A (Short Answer Questions)

Q. No	Questions	Blooms Taxonomy Level	Course Outcome
<b>UNIT – I</b>			
1	<b>List</b> the advantages of DBMS?	Knowledge	1
2	<b>List</b> the database Applications?	Knowledge	2
3	<b>Define</b> instances and schemas of database?	Knowledge	2
4	<b>Discuss</b> Data Independence?	Understand	2
5	<b>Explain</b> database Access for applications Programs	Understand	2
6	<b>Define</b> (i) Database (ii) DBMS	Knowledge	2
7	<b>Explain</b> about Database storage structure?	Understand	2
8	<b>Discuss</b> Transaction management?	Understand	2
9	<b>Explain</b> the Query Processor?	Understand	2
10	<b>Define</b> (i) Entity (ii) Attribute	Knowledge	3
11	<b>Define</b> Relationship and Relationship set?	Knowledge	3
12	<b>Discuss</b> about Data Definition language?	Understand	9
13	<b>Discuss</b> about Data Manipulation language?	Understand	9
14	<b>Explain</b> about querying relational data?	Understand	9
15	<b>Explain</b> the History of Data base Systems?	Understand	2
16	<b>Discuss</b> how can you change the data in the table?	Understand	9
17	<b>List</b> various types of attributes?	Knowledge	3
18	<b>Discuss</b> How can you alter and destroy tables?	Understand	9
19	<b>Explain</b> data model and list the types of data model used?	Understand	2
20	<b>List</b> the disadvantages of file processing system?	Knowledge	2
21	<b>Give</b> the levels of data abstraction?	Understand	2
22	<b>Define</b> instance and schema?	Knowledge	3

23	<b>Define</b> the terms i) Entity type ii) Entity set	Knowledge	3
24	<b>Define</b> weak and strong entity sets?	Knowledge	3
25	<b>Explain</b> about stored and derived attributes?	Understand	3
<b>UNIT – II</b>			
1	<b>Define</b> relational database query?	Knowledge	8
2	<b>State</b> about SELECT operation in Relational algebra?	Knowledge	8
3	<b>State</b> about PROJECT operation in Relational algebra?	Knowledge	8
4	<b>Define</b> Aggregate Functions?	Knowledge	10
5	<b>Discuss</b> the use of rename operation?	Understand	8
6	<b>Illustrate</b> division operation?	Apply	8
7	<b>Discuss</b> the basic form of SQL query?	Understand	9
8	<b>Define</b> Null Values.	Knowledge	10
9	<b>Define</b> tuple variable with its syntax?	Knowledge	8
10	<b>Define</b> Dynamic SQL?	Knowledge	10
11	<b>Define</b> Assertions?	Knowledge	6
12	<b>Discuss</b> about trigger?	Understand	10
13	<b>Demonstrate</b> how to add a NOT NULL column to a table?	Apply	10
14	<b>List</b> the aggregate functions supported by SQL?	Knowledge	10
15	<b>List</b> the table modification commands in SQL?	Knowledge	10
16	<b>What</b> is domain integrity? Give example.	Understand	10
17	<b>List</b> the set operations of SQL?	Knowledge	10
18	<b>What</b> is the use of group by clause?	Understand	10
19	<b>Discuss</b> about the operators SELECT, PROJECT, UNION?	Knowledge	10
20	<b>Discuss</b> about the operators renaming, joins, division?	Knowledge	10
<b>UNIT – III</b>			
1	<b>Define</b> redundancy?	Knowledge	5
2	<b>Define</b> functional dependency? Why are some functional dependencies trivial?	Knowledge	5
3	<b>Discuss</b> normalization?	Understand	5
4	<b>Illustrate</b> functional dependency with example?	Apply	5
5	<b>Illustrate</b> fully functional dependency with example?	Apply	5
6	<b>Demonstrate</b> transitive dependency? Give an example?	Apply	5
7	<b>Discuss</b> Domain-Key Normal Form?	Understand	5
8	<b>Define</b> Armstrong axioms for FD's?	Knowledge	5
9	<b>Define</b> First Normal Form?	Knowledge	5
10	<b>Define</b> Second Normal Form?	Knowledge	5
11	<b>Define</b> Third Normal Form?	Knowledge	5
12	<b>Define</b> Fourth Normal Form?	Knowledge	5
13	<b>List</b> out the Problems related to decompositions?	Knowledge	5
14	<b>Explain</b> about Loss less-join dependency?	Understand	5
15	<b>Explain</b> about BCNF?	Understand	5
16	<b>Explain</b> about multi-valued dependencies?	Understand	5
17	<b>Define</b> join dependency and fifth normal form?	Knowledge	5
18	<b>Explain</b> the concept scheme refinement in database design?	Understand	5
19	<b>Define</b> dependency preserving decomposition?	Knowledge	5
20	<b>Explain</b> about inclusion dependency?	Understand	5
<b>UNIT – IV</b>			
1	<b>Define</b> a Transaction? List the properties of transaction	Knowledge	7
2	<b>Discuss</b> different phases of transaction?	Understand	7
3	<b>Discuss</b> recoverable schedules?	Understand	7
4	<b>Discuss</b> cascade less schedules?	Understand	7
5	<b>Define</b> Two Phase Commit protocol?	Knowledge	7
6	<b>Demonstrate</b> the implementation of Isolation?	Apply	7
7	<b>Discuss</b> the Procedure to test Serializability?	Understand	7
8	<b>Explain</b> about different types of locks?	Understand	7
9	<b>Discuss</b> about Failure Classification?	Understand	7
10	<b>Define</b> a checkpoint?	Knowledge	7
11	<b>Discuss</b> the failures that can occur with loss of Non-volatile storage?	Understand	7
12	<b>Demonstrate</b> Conflict Serializability?	Apply	7
13	<b>Discuss</b> View Serializability?	Understand	7
14	<b>Explain</b> about transition states?	Understand	7
15	<b>Explain</b> about acid properties?	Understand	7

16	<b>Explain</b> about locking protocols?	Understand	7
17	<b>Define</b> timestamp based protocol?	Understand	7
18	<b>Explain</b> about multiple granularity?	Understand	7
19	<b>Explain</b> about storage structure?	Understand	7
20	<b>Explain</b> about remote backup systems?	Understand	7
<b>UNIT – V</b>			
1	<b>Discuss</b> about data on External storage?	Understand	2
2	<b>Explain</b> Clustered Indexes?	Understand	11
3	<b>Discuss</b> the Primary and Secondary indexes?	Understand	11
4	<b>Define</b> Tree Indexing?	Knowledge	11
5	<b>Explain</b> Hash based Indexing?	Understand	11
6	<b>Discuss</b> the intuition for Tree Indexes?	Understand	11
7	<b>Define</b> Indexed Sequential Access Method?	Knowledge	11
8	<b>Discuss</b> about Overflow pages and Locking considerations of ISAM?	Understand	11
9	<b>Discuss</b> the Cost model of Heap files?	Understand	11
10	<b>Discuss</b> the Cost model of Sorted files?	Understand	11
11	<b>Discuss</b> the Cost model of Clustered files?	Understand	11
12	<b>Explain</b> about several ordered indexing?	Understand	11
13	<b>Explain</b> about B+ tree index file?	Understand	11
14	<b>Explain</b> about static hashing?	Understand	11
15	<b>Explain</b> about organization of records in files?	Understand	11
16	<b>Discuss</b> the impact of Workload on Indexes?	Knowledge	11
17	<b>Explain</b> about RAID	Understand	2
18	<b>Define</b> extendable hashing?	Knowledge	11
19	<b>Define</b> linear hashing?	Knowledge	11
20	<b>Differentiate</b> extendable vs linear hashing?	Knowledge	11

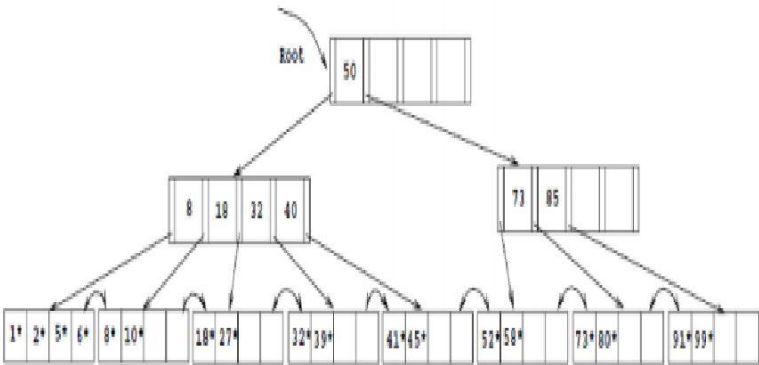

## PART – B (Long Answer Questions)

Q. No	Questions	Blooms Taxonomy Level	Course Outcome
<b>UNIT – I</b>			
1	<b>Compare and Contrast</b> file Systems with database systems?	Apply	1
2	<b>Define</b> Data Abstraction and discuss levels of Abstraction?	Knowledge	2
3	<b>Discuss</b> about different types of Data models?	Understand	2
4	<b>Describe</b> the Structure of DBMS?	Understand	2
5	<b>Discuss</b> additional features of the ER-Models.	Understand	3
6	<b>Discuss</b> about the Concept Design with the ER Model?	Understand	4
7	<b>Write</b> about views and updates on views?	Knowledge	10
8	<b>Explain</b> different types of database users and write the functions of DBA?	Understand	2
9	<b>Explain</b> about different types of integrity constraints?	Understand	6
10	<b>Discuss</b> about the logical database Design?	Understand	4
11	<b>Distinguish</b> strong entity set with weak entity set? Draw an ER diagram to illustrate weak entity set?	Apply	3
12	<b>Differentiate</b> relation schema and relational instance? Define the terms arity and degree of s relation? What are domain constraints?	Understand	2
13	<b>Illustrate</b> outer joins with example?	Apply	10
14	<b>Describe</b> logical connectives of SQL?	Understand	10
15	<b>Discuss</b> about active databases?	Understand	10
<b>UNIT – II</b>			
1	<b>Illustrate</b> different set operations in Relational algebra with an example?	Apply	8
2	<b>Define</b> Join? Explain different types of joins?	Knowledge	10
3	<b>Discuss</b> about Domain Relational calculus in detail?	Understand	8
4	<b>Define</b> trigger and explain its three parts? Differentiate row level and statement level triggers?	Knowledge	10
5	<b>Illustrate</b> Group by and Having clauses with examples?	Apply	10
6	<b>Discuss</b> about Complex integrity constraints in SQL?	Understand	6
7	<b>Discuss</b> different types of aggregate operators with examples in SQL?	Understand	10
8	a. <b>Define</b> a nested query? b. <b>Write</b> a nested query to find the names of sailors who have reserved both a	Knowledge	

	red and green boat? c. <b>Write</b> a nested query to find the names of sailors who have reserved all boats?		10
9	a. <b>Discuss</b> correlated nested queries? b. <b>Write</b> a query to find the names of sailors who have reserved a red boat? c. <b>Write</b> a query to find the names of sailors who have not reserved a red boat?	Understand	10
10	a. <b>Explain</b> Relational calculus? b. <b>Write</b> a TRC query to find the names of sailors who have reserved boat 103? c. <b>Write</b> a DRC query to find the names of sailors who have reserved boat 103?	Understand	10
<b>UNIT – III</b>			
1	<b>Illustrate</b> redundancy and the problems that it can cause?	Apply	5
2	<b>Define</b> decomposition and how does it address redundancy? Discuss the problems that may be caused by the use of decompositions?	Knowledge	5
3	<b>Define</b> functional dependencies. How are primary keys related to FD's?	Knowledge	5
4	<b>Define</b> normalization? Explain 1NF, 2NF, 3NF Normal forms?	Knowledge	5
5	<b>Compare and contrast</b> BCNF with 3NF?	Apply	5
6	<b>Describe</b> properties of decompositions?	Understand	5
7	<b>Explain</b> about Schema refinement in Database design?	Understand	5
8	<b>Illustrate</b> Multivalued dependencies and Fourth normal form with example?	Apply	5
9	<b>Discuss</b> about Join dependencies and Fifth normal form?	Understand	5
10	<b>Illustrate</b> Inclusion dependencies with example?	Apply	5
<b>UNIT – IV</b>			
1	<b>Explain</b> ACID properties and Illustrate them through examples?	Understand	7
2	<b>Discuss</b> How do you implement Atomicity and Durability?	Understand	7
3	<b>Illustrate</b> Concurrent execution of transaction with examples?	Apply	7
4	<b>Discuss</b> Serializability in detail?	Understand	7
5	<b>Discuss</b> two phase locking protocol and strict two phase locking protocols?	Understand	7
6	<b>Describe</b> Timestamp based locking protocols?	Understand	7
7	<b>Describe</b> Validation-based locking protocols?	Understand	7
8	<b>Discuss</b> in detail Multiple Granularity?	Understand	7
9	<b>Explain</b> in detail Storage structure?	Understand	7
10	<b>Discuss</b> Deferred database modification and Immediate database modification?	Understand	7
11	<b>Discuss</b> how do you recover from Concurrent transactions?	Understand	7
12	<b>Explain</b> Buffer Management?	Understand	7
13	<b>Explain</b> different types of Advanced Recovery Techniques?	Understand	7
14	<b>Write</b> in detail about Remote Backup systems?	Apply	7
<b>UNIT – V</b>			
1	<b>Write</b> in detail about Hash based Indexing and Tree based Indexing?	Apply	11
2	<b>Compare</b> I/O costs for all File Organizations?	Understand	11
3	<b>Explain</b> in detail about ISAM?	Understand	11
4	<b>Explain</b> B+ trees? Discuss about this Dynamic Index Structure?	Understand	11
5	<b>Demonstrate</b> searching a given element in B+ trees? Explain with example?	Understand	11
6	<b>Illustrate</b> insertion and deletion of an element in B+ trees with example?	Apply	11
7	<b>Write</b> in detail about Static Hashing?	Apply	11
8	<b>Explain</b> in detail about Extendible Hashing?	Understand	11
9	<b>Explain</b> in detail about Linear Hashing?	Understand	11
10	<b>Compare and Contrast</b> Extendible Hashing with Linear Hashing?	Apply	11

**PART – C (Problem Solving and Critical Thinking Questions)**

Q. No	Questions	Blooms Taxonomy Level	Course Outcome																														
<b>UNIT – I</b>																																	
1	Let E1 and E2 be two entities in an E/R diagram with simple single-valued attributes. R1 and R2 are two relationships between E1 and E2, where R1 is one-to-many and R2 is many-to-many. R1 and R2 do not have any attributes of their own. <b>Calculate</b> the minimum number of tables required to represent this situation in the relational model?	Apply	3																														
2	<b>Analyze</b> and find whether View exists if the table is dropped from the database?	Analyze	10																														
3	We can convert any weak entity set to strong entity set by simply adding appropriate attributes. <b>Analyze</b> why, then, do we have weak entity sets?	Analyze	3																														
<b>UNIT – II</b>																																	
1	Consider the following relational schema Employee (empno,name,office,age) Books(isbn,title,authors,publisher) Loan(empno, isbn,date) <b>Write</b> the following queries in relational algebra. a. Find the names of employees who have borrowed a book Published by McGraw-Hill? b. Find the names of employees who have borrowed all books Published by McGraw-Hill? c. Find the names of employees who have borrowed more than five different books published by McGraw-Hill? d. For each publisher, find the names of employees who have borrowed?	Apply	10																														
2	Given the Students relation as shown below <table border="1" style="margin-left: 20px;"> <thead> <tr> <th>StudentID</th> <th>StudentName</th> <th>StudentEmail</th> <th>StudentAge</th> <th>CPI</th> </tr> </thead> <tbody> <tr> <td>2345</td> <td>Shankar</td> <td>shankar@math</td> <td>X</td> <td>9.4</td> </tr> <tr> <td>1287</td> <td>Swati</td> <td>swati@ee</td> <td>19</td> <td>9.5</td> </tr> <tr> <td>7853</td> <td>Shankar</td> <td>shankar@cse</td> <td>19</td> <td>9.4</td> </tr> <tr> <td>9876</td> <td>Swati</td> <td>swati@mech</td> <td>18</td> <td>9.3</td> </tr> <tr> <td>8765</td> <td>Ganesh</td> <td>ganesh@civil</td> <td>19</td> <td>8.7</td> </tr> </tbody> </table> <p>For (Student Name, Student Age) to be the key for this instance, analyze and <b>find</b> value of X not be equal to?</p>	StudentID	StudentName	StudentEmail	StudentAge	CPI	2345	Shankar	shankar@math	X	9.4	1287	Swati	swati@ee	19	9.5	7853	Shankar	shankar@cse	19	9.4	9876	Swati	swati@mech	18	9.3	8765	Ganesh	ganesh@civil	19	8.7	Apply	10
StudentID	StudentName	StudentEmail	StudentAge	CPI																													
2345	Shankar	shankar@math	X	9.4																													
1287	Swati	swati@ee	19	9.5																													
7853	Shankar	shankar@cse	19	9.4																													
9876	Swati	swati@mech	18	9.3																													
8765	Ganesh	ganesh@civil	19	8.7																													
3	Given the relations <i>employee(name,salary,deptno)</i> <i>department (deptno, deptname, address)</i> <b>Solve</b> which query cannot be expressed using the basic relational algebra Operations(U, -,x , ,p)?	Apply	10																														
4	<b>Write</b> SQL Query to find second highest salary of Employee from Employee table?	Apply	10																														
<b>UNIT – III</b>																																	
1	Consider a relation scheme R = (A, B, C, D, E, H) on which the following functional dependencies hold: {A→B, BC→ D, E→C, D→A}. <b>Write</b> the candidate keys of R?	Apply	5																														
2	Consider the following relational schemes for a library database: <i>Book (Title, Author, Catalog_no, Publisher, Year, Price)</i> <i>Collection (Title, Author, Catalog_no)</i> the following are functional dependencies: a. Title Author --> Catalog_no b. Catalog_no --> Title Author Publisher Year c. Publisher Title Year --> Price d. Assume {Author, Title} is the key for both schemes. <b>Apply</b> the appropriate normal form for Book and Cancellation?																																
3	Consider a schema R (A, B, C, D) and functional dependencies A → B and C →D. <b>Solve</b> and find whether the decomposition of R into R1 (A, B) and R2(C, D) belongs to which one or both (dependency preserving and loss less join)?	Apply	5																														
4	<b>Show</b> that: if $\alpha \rightarrow \beta$ and $\alpha \rightarrow \gamma$ then $\alpha \rightarrow \beta\gamma$	Apply	5																														
<b>UNIT - IV</b>																																	
3	Consider the following transactions with data items P and Q initialized to zero: T1: read(P); read(Q); If P=0 then Q:=Q+1;	Apply	7																														

	write(Q); T2: read(Q); read(P); If Q=0 then P:=P+1; write(P); <b>Solve</b> and find any non-serial interleaving of T1 and T2 for concurrent execution leads to a serializable schedule or non serializable schedule. Explain?		
2	<b>Analyze</b> which of the following concurrency control protocols ensure both conflict serializability and freedom from deadlock? Explain the following: a. 2-phase locking b. Time-stamp ordering	Apply	7
3	Consider the transactions T1, T2, and T3 and the schedules S1 and S2 given below. T1: r1(X);r1(Z);w1(X);w1(Z) T2: r2(Y);r2(Z);w2(Z) T3: r3(Y);r3(X);w3(Y) S1: r1(X);r3(Y);r3(X);r2(Y);r2(Z); w3(Y);w2(Z);r1(Z);w1(X);w1(Z) S2: r1(X); r3(Y); r2(Y); r3(X); r1(Z); r2(Z); w3(Y); w1(X); w2(Z); w1(Z) <b>Analyze</b> which one of the schedules is conflict-serializable?		
4	Suppose that there is a database system that never fails. <b>Analyze</b> whether a recovery manager required for this system?	Apply	7
<b>UNIT – V</b>			
1	Consider a B+-tree in which the maximum number of keys in a node is 5. <b>Calculate</b> the minimum number of keys in any non-root node?	Apply	11
2	In the index allocation scheme of blocks to a file, <b>Calculate</b> on what maximum possible size of the file depends?	Apply	11
3	A clustering index is defined on the fields of which type? <b>Analyze</b> them.	Apply	11
4	<b>Calculate</b> the minimum space utilization for a B+ tree index?	Apply	11
5	Consider the B+ tree index of order d = 2 shown in Figure  <ol style="list-style-type: none"> <li>Show the tree that would result from inserting a data entry with key 9 into this tree.</li> <li>Show the B+ tree that would result from deleting the data entry with key 8 from the original tree, assuming that the left sibling is checked for possible redistribution</li> </ol>	Apply	11

Prepared by: Dr. M, Madhu Bala, Professor
