Question Paper Code:ACS013

# INSTITUTE OF AERONAUTICAL ENGINEERING

(Autonomous)

Dundigal, Hyderabad - 500 043

## MODEL QUESTION PAPER

Four B.Tech VIII Semester End Examinations, May – 2020

**Regulations: IARE - R16**

### INFORMATION SECURITY

[CSE/IT]

**Time:3Hours**

**Max Marks:70**

---

**Answer ONE Question from each Unit**

**All Questions Carry Equal Marks**

**All parts of the question must be answered in one place only**

---

#### UNIT-I

- |    |    |   |    |
|----|----|---|----|
| 1  | a. | Explain security attacks, security services and security mechanisms with neat diagrams.   | 7M |
|    | b. | Define Caesar cipher? And calculate the encryption and decryption for the plain text P="COME TO MY HOME" by using caser cipher with Key k=3?                      | 7M |
| 2. | a. | Explain Caesar cipher and mono-alphabetic ciphers with examples?  | 7M |
|    | b. | Convert the following plain text message P="Hide the gold in the tree stump" into cipher text with key k="play fair example" by using play fair cipher technique? | 7M |

#### UNIT-II

- |   |    |  |    |
|---|----|--|----|
| 3 | a. | Explain the Advanced Encryption Standard algorithm. Write the difference between DES and AES.                            | 7M |
|   | b. | Explain briefly which parameters and design choices determine the actual algorithm of a feistel cipher.                  | 7M |
| 4 | a. | Explain why do some block cipher modes of operation only use encryption while others use both encryption and decryption. | 7M |
|   | b. | Explain linear and differential cryptanalysis in a detail manner.  | 7M |

#### UNIT-III

- |   |    |  |    |
|---|----|--|----|
| 5 | a. | Describe briefly what are the different kinds of the authentication requirements are there for message authentication? | 7M |
|   | b. | Describe the message digest function in digital signatures and explain with an example?                                | 7M |
| 6 | a. | Describe the Kerberos security mechanism and explain why it is important in real time for providing security?          | 7M |
|   | b. | Explain the message digest function in digital signatures with an example?   | 7M |

#### UNIT-IV

- 7 a. What is PGP? Discuss in detail about Pretty Good Privacy with example. 7M  
b. Generalize why in spite of symmetric key, public key and private key, uses three separate requirements what are those and explain why are used? 7M
- 8 a. Define S/MIME? Explain in detail about the importance of S/MIME in E-mail security. 7M  
b. Define what parameters to identify an SA and what parameters characterize the nature of particular SA? 7M

#### UNIT-V

- 9 a. What is Intrusion? Discuss Intrusion detection system with neat diagram? Explain the need of Intrusion detection. 7M  
b. Demonstrate how does the intrusion detection system work when the contents of the network message are encrypted? At what level can this packet be read and analysed? 7M
- 10 a. Define term intruders? Discuss about intrusion detection password management? 7M  
b. Discuss how intrusion prevention is achieved through password management? 7M

**INSTITUTE OF AERONAUTICAL ENGINEERING**  
**(Autonomous)**  
**Dundigal**

**COURSE OBJECTIVES:**

**The course should enable the students to:**

|     |   |
|-----|---|
| I   | Learn the basic categories of threats to computers and networks                           |
| II  | Understand various cryptographic algorithms and be familiar with public-key cryptography. |
| III | Apply authentication functions for providing effective security.                          |
| IV  | Analyze the application protocols to provide web security.                                |
| V   | Discuss the place of ethics in the information security area.                             |

**COURSE OUTCOMES:**

|     |  |
|-----|--|
| CO1 | Understand the basic Concepts of attacks on computer, computer security. |
| CO2 | Understand the concepts of symmetric key ciphers.                        |
| CO3 | Describe the message authentication algorithm and hash functions         |
| CO4 | Understand the concepts of e-mail security.                              |
| CO5 | Understand the concepts of web security.                                 |

**COURSE LEARNING OUTCOMES:**

**Students, who complete the course, will have demonstrated the ability to do the following:**

|           |  |
|-----------|--|
| ACS013.01 | Understand the different types of attacks, security mechanisms, security services.                             |
| ACS013.02 | Explain various substitution techniques such as play-fair cipher, mono-alphabetic cipher and hill cipher.      |
| ACS013.03 | Understand various Transposition techniques such as row transposition and rail-fence.                          |
| ACS013.04 | Describe the role of private and public key in encryption and decryption and key size.                         |
| ACS013.05 | Apply the symmetric algorithm for message transmission and analyze the security level of it.                   |
| ACS013.06 | Understand various asymmetric key encryption algorithms for message encryption and decryption.                 |
| ACS013.07 | Understand the block cipher modes of operation for encryption and decryption.                                  |
| ACS013.08 | Describe the need of stream ciphers in message encryption.   |
| ACS013.09 | Understand the role of elliptic curve cryptography in security.  |
| ACS013.10 | Analyze the drawbacks of RSA and able to design a security algorithm which overcomes that drawbacks.           |
| ACS013.11 | Explain the role of the message authentication in message transmission.  |
| ACS013.12 | Explain the need of digital signature in message transmission.   |
| ACS013.13 | Explain and demonstrate the role of different types of hash functions for providing security.                  |
| ACS013.14 | Understand the differences between the symmetric and symmetric cryptography algorithms for providing security. |
| ACS013.15 | Explain S/MIME and PGP for transmitting mail from sender to receiver.  |
| ACS013.16 | Explain IP security for internet protocol and analyze how it provides security.                                |
| ACS013.17 | Describe the security socket layer and transport layer security for web security.                              |

|           |   |
|-----------|---|
| ACS013.18 | Analyze various types of intrusion detection techniques.                      |
| ACS013.19 | Understand various types of viruses and its vulnerabilities.                  |
| ACS013.20 | Describe various types of firewalls and analyze the security levels of these. |

**MAPPING OF SEMESTER END EXAMINATION TO COURSE LEARNING OUTCOMES:**

| SEE Question No. |   | Course Learning Outcomes | Course Outcomes   | Blooms Taxonomy Level |            |
|------------------|---|--------------------------|---|-----------------------|------------|
| 1                | a | ACS013.02                | Explain various substitution techniques such as play-fair cipher, mono-alphabetic cipher and hill cipher. | CO1                   | Understand |
|                  | b | ACS013.01                | Understand the different types of attacks, security mechanisms, security services.                        | CO1                   | Remember   |
| 2                | a | ACS013.01                | Understand the different types of attacks, security mechanisms, security services.                        | CO1                   | Understand |
|                  | b | ACS013.03                | Understand various Transposition techniques such as row transposition and rail-fence.                     | CO1                   | Remember   |
| 3                | a | ACS013.05                | Apply the symmetric algorithm for message transmission and analyze the security level of it..             | CO2                   | Understand |
|                  | b | ACS013.06                | Understand various asymmetric key encryption algorithms for message encryption and decryption.            | CO2                   | Understand |
| 4                | a | ACS013.05                | Apply the symmetric algorithm for message transmission and analyze the security level of it..             | CO2                   | Understand |
|                  | b | ACS013.06                | Understand various asymmetric key encryption algorithms for message encryption and decryption.            | CO2                   | Understand |
| 5                | a | ACS013.11                | Explain the role of the message authentication in message transmission.                                   | CO3                   | Understand |
|                  | b | ACS013.13                | Explain and demonstrate the role of different types of hash functions for providing security.             | CO3                   | Remember   |
| 6                | a | ACS013.11                | Explain the role of the message authentication in message transmission.                                   | CO3                   | Understand |
|                  | b | ACS013.11                | Explain the role of the message authentication in message transmission.                                   | CO3                   | Understand |
| 7                | a | ACS013.15                | Explain S/MIME and PGP for transmitting mail from sender to receiver.                                     | CO4                   | Remember   |
|                  | b | ACS013.16                | Explain IP security for internet protocol and analyze how it provides security.                           | CO4                   | Remember   |
| 8                | a | ACS013.15                | Explain S/MIME and PGP for transmitting mail from sender to receiver.                                     | CO4                   | Remember   |
|                  | b | ACS013.16                | Explain IP security for internet protocol and analyze how it provides security.                           | CO4                   | Remember   |
| 9                | a | ACS013.18                | Analyze various types of intrusion detection techniques.  | CO5                   | Understand |
|                  | b | ACS013.17                | Describe the security socket layer and transport layer security for web security.                         | CO5                   | Understand |
| 10               | a | ACS013.20                | Describe various types of firewalls and analyze the security level of these.                              | CO5                   | Understand |
|                  | b | ACS013.17                | Describe the security socket layer and transport layer security for web security.                         | CO5                   | Understand |
